

A healthier home

90% of our time is spent indoors*

Did you know that formaldehyde, a volatile organic compound (VOC), can enter your home through products like engineered wood furniture, computers, carpeting, treated fabrics, hair sprays and cleaning materials? ** This potentially harmful VOC can circulate throughout indoor living spaces and affect the air you breathe.

Poor indoor air quality has been linked to headaches, fatigue, concentration problems, allergies, asthma and more. When you also consider that most people spend approximately 90% of their time indoors, indoor air quality presents an issue of real concern.

Now there's a product that is designed to help improve the indoor environment: AirRenew® is the only drywall that permanently removes formaldehyde from the air. So you can breathe easy and enjoy your home to the fullest.

AirRenew®

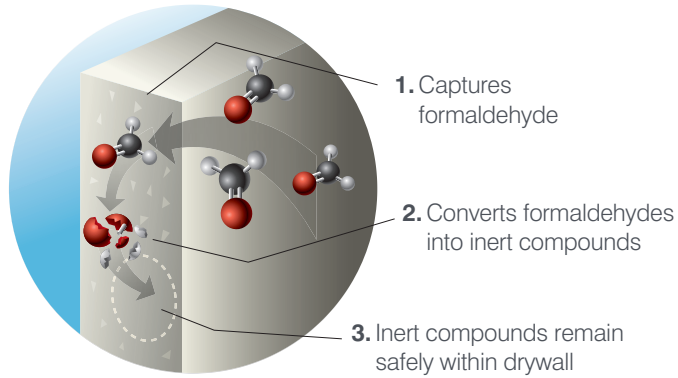

Indoor Air Quality Drywall

Good. Clean. Living.

CertainTeed
SAINT-GOBAIN

Comfortable living starts with better indoor air quality

Cleans formaldehyde out of your indoor air

AirRenew® drywall is the first-of-its-kind, patent-pending wallboard that actively cleans air by permanently removing formaldehyde found in indoor air.

When formaldehyde comes in contact with the board through normal air circulation, AirRenew drywall captures and converts it into a safe, inert compound.

Enjoy a healthier living environment

AirRenew® drywall actively cleans formaldehyde out of the air and keeps it out.

Breathe easier

AirRenew drywall protects you and your loved ones from potentially harmful formaldehyde, contributing positively to your home's indoor air quality.*

Improve indoor air quality for generations

AirRenew drywall actively absorbs airborne formaldehyde improving indoor air quality over the long term and has been validated by ULE through their Environmental Claims Validations program.

Add value

Upgrading to AirRenew drywall for your home is a smart long-term investment.

Protection you can count on

You get the added confidence of a wall product from CertainTeed, a leading North American manufacturer of building materials.

*The absorption rate of formaldehyde may be reduced by the application of primers and paints.

Cuts and installs like standard drywall

AirRenew® drywall is easy to handle and installs similar to other CertainTeed gypsum boards. Easily recycled in the same way as regular gypsum board. Can be sent to landfill (if permitted locally) and is safe to humans, animals, and ground water.
