

Intersection

Intersection Floor to Ceiling Presentation/Divider System

- > Where people, ideas and open space meet, Intersection is a unique system that can pair a variety of materials to create a presentation/divider system not confined or anchored to the wall.
- > Choose from standard materials of Glass, porcelain steel Marker or Chalk Boards, Fabric or Acoustic Felt panels, and perforated steel or mesh, in single or double sided applications.
- > Sliding panels in various materials can be incorporated in some configurations adding even more functionality.
- > Strong, lightweight frames available in clear satin finish or black.

Dimensions:

Frame Widths up to 4'
Frame Heights up to 12'

- > Contact coronaVISUAL for pricing, custom size and finish options.
