WoodWorks® Linear Veneer panels in tapered visual and Natural Variations™ Light Cherry finish

These unique tapered or traditional wood panels offer a variety of linear looks.

KEY SELECTION ATTRIBUTES

Veneered Panels

- Panels in nominal 4" or 6" widths
- Create continuous looks and clouds with veneer-wrapped and painted aluminum trim
- Hook-on panels (for standard 15/16" suspension system) provide safe and secure downward accessibility
- Complete standard system from one manufacturer (suspension system/panels/trim)
- Factory-edge banded for superior quality
- 100% Biobased content
- BioAcoustic™ infill available for increased acoustical performance

VENEERS Due to printing limitations, shade may vary from actual product.

Natural Variations™ (Real Wood Veneers)

Application Considerations
 Variation among panels may occur due to the natural characteristics of the wood and grain.
 Use of large wood panels may result in deflection up to 1/8" and cause alignment inconsistency due to size and ambient conditions.
 It is very important that WoodWorks® panels are climatized prior to installation. Relative humidity between 25% and 55%, and temperatures between 50°F and 86°F, must be maintained throughout the life of the product.

Design Considerations
 Cloud installations with total panel width less than 6' wide are not recommended.
 Cloud installations with total panel length less than 16' wide cannot be done.

Specification Consideration
 Attention: For FSC®-certified wood products to maintain their CoC certification, products must be sold to a CoC-certified distributor or directly to the installing contractor. Failure to do so breaks the CoC.

Seismic Restraint
 WoodWorks® Linear panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.
