WOODWORKS® Linear/ WOODWORKS® Linear Exterior

Solid Wood Panels

Now, standard linear solutions with the beautiful color variation and graining of solid wood for interior and exterior applications.

KEY SELECTION ATTRIBUTES

- Two plank widths nominal 3" and nominal 5"
- · Fast, easy installation screw into suspension system or install with backer clip
- · Create continuous looks and clouds with solid wood trim
- · Complete standard system from one manufacturer
- BioAcoustic[™] infill available for increased acoustical performance
- · Acoustical fleece available as an option for interior applications
- · Interior only panels are solid Poplar wood

· Western Hemlock panels excellent for exterior applications

INTERIOR - ONLY FINISHES

Due to printing limitations, shade may vary from actual product. Items 8176 and 8177 can only be used in interior applications.

Contact TechLine at 1 877 276 7876 for details.

WoodWorks® Linear Solid Wood Panels, as with other architectural features located at the ceiling, may obstruct or skew the planned fire sprinkler water distribution pattern, or possibly delay or accelerate the activation of the sprinkler or fire detection systems by channeling heat from a fire either toward or away from the device. Designers and installers are advised to consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

Application Considerations

Variation among panels may occur due to the natural characteristics of the wood and grain.

Design Considerations

Panels installed in exterior applications should be installed under overhangs, soffits or other covered spaces to protect them for direct contact with the elements. For interior-only panels, relative humidity between 25% and 55%, and temperature between 50 and 86 degrees F must

Installation Consideration
System is designed to have a 1" gap between panels. Backer clip can only be used for installation of interior-only panels.

Seismic Restraint

WoodWorks Linear solid wood panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.
