

SHEETROCK® Brand Latex Additive

Mixing

Follow mixing instructions on package. SHEETROCK Brand Latex Additive may be added to the texture wet-mix at a rate of 1 to 2 pints per 25, 32, 40, and 50 lb. bag of finish. The more latex additive used (up to 2 pints), the greater the bond and hardness of the dried surface. Adjust water quantity to account for the amount of additive used based on 1:1 replacement ratio. Surface priming recommendations on the texture bag still apply.

Cleanup

For cleanup, follow directions on texture bag.

Trademarks

The following trademarks used herein are owned by United States Gypsum Company or a related company: SHEETROCK.

Note

Products described here may not be available in all geographic markets. Consult your U.S. Gypsum Company sales office or representative for information.

Notice

We shall not be liable for incidental or consequential damages, directly or indirectly sustained, nor for any loss caused by application of these goods not in accordance with current printed instructions or for other than their intended use. Our liability is expressly limited to replacement of defective goods. Any claim shall be deemed waived unless made in writing to us within thirty (30) days from the date it was or reasonably should have been discovered.

SAFETY FIRST!

Follow good safety practices. Read material safety data sheets and related literature on products before specification and/or installation.
