

SERPEN TINA[®] Waves[™] Curved Metal Clouds

Inspiring Great Spaces[®]

Armstrong[®]
CEILING SOLUTIONS

Curves That EBB & FLOW

Enhance your space with the visual power of our pre-engineered Serpentina® Waves™, available in ready-to-install kits.

The Serpentina Waves system is a curved, extruded aluminum system that features flexible, large-size panels with a narrow 1/4" black reveal. The suspension system is hidden. All you see are waves!

Choose from one of 60 kit options using just a single item number. Everything needed for installation is in the kit.

- ▶ Pre-cut
- ▶ Sizes range from 4' x 4' up to 12' x 12'.
- ▶ Hill, Valley, or Combination
- ▶ 30- or 45-degree arc.

If none of our kit sizes work for your project, you can create other sizes, lengths, and arcs using standard Serpentina components.

Striking Visual Impact

Serpentina® Waves™ Acoustical Clouds 2' x 8', 2' x 10',
and 2' x 12' with R062 perforation in Silver Satin ▶
Lewis & Clark Community College, Godfrey, IL

Designing Your SERPENTINA Waves™

1 Define Your Space

To define the size, consider the dimensions of the space you're addressing:

- A minimum horizontal distance of 24" is required on the straight perimeter end where the panels will be installed.
- A 12" minimum vertical distance to the ceiling is required above the straight perimeter trim where the panels will be installed.
- A minimum distance of 8" is needed on the remaining three sides of the Serpentina® Waves™ cloud. This is to allow installation of our perimeter hold down clips. The clearance on the sides can be eliminated by installing the perimeter panels before the adjacent field panels.

2 Choose Your Panel Color and Perforation

COLOR SELECTION* Due to printing limitations, shade may vary from actual product.

Metal Infills

Wood Look Architectural Film Colors (Not available with perforated or corrugated panel options)

*Custom colors and wood finishes available. Contact Armstrong Customer Service at 1-877-276-7876 and select options 1-1-2.

COLORATIONS® COLORS (partial list)

* Other colors available. See Colorations® Brochure (BPCS 4798).

PANEL PERFORATION OPTIONS

(UPA) Unperforated Panel

(R042) Perforated Panel
Perfs: 3/64" Dia. @ 1/8" O.C.
Open area: 11% – No border

(R062) Perforated Panel
Perfs: 1/16" Dia. @ 1/4" O.C.
Open area: 6% – No border

(R125) Perforated Panel
Perfs: 1/8" Dia. @ 3/16" O.C.
Open area: 41%
Nominal 3/4" border

(R250) Perforated Panel**
Perfs: 1/4" Dia. @ 0.32" O.C.
Open area: 58%
Nominal 3/4" border

(R188) Perforated Panel***
Perfs: 3/16" Dia. @ 1" O.C.
Open area: 4%
Nominal 3/4" border

(R375) Perforated Panel***
Perfs: 3/8" Dia. @ 1-1/8" O.C.
Open area: 9%
Nominal 3/4" border

(S250) Perforated Panel
Perfs: 1/4" x 1/4" @ 3/4" O.C.
Open area: 11%
Nominal 3/4" border

(S375) Perforated Panel***
Perfs: 3/8" x 3/8" @ 1-1/8" O.C.
Open area: 11%
Nominal 3/4" border

(S500) Perforated Panel**
Perfs: 1/2" x 1/2" @ 5/8" O.C.
Open area: 64%
Nominal 3/4" border

(CR125) Perforated Corrugated Panel
Perfs: 1/8" Dia. @ 3/16" O.C.
Open area: 41%
Nominal 3/4" border

(CUPA) Unperforated Corrugated Panel

* Laminated acoustical fleece is not available on Perforated Panel R250 and S500 due to open cell percentage.
*** Acoustical fleece comes standard

3 Select Your Wave

Check the "Kit Options" charts on pages 5 – 7 to see which size and configuration best suits your design intent. Remember, if there's not a configuration on the chart that suits, you can still create a Wave using standard Serpentina® components, shown on page 8.

EXAMPLES:

Your Space is 80' x 120'. You want the two rows to come across the 120' length as though mimicking the tide breaking ashore. Your working area, once you deduct 24" from one wall and 8" from the opposite, is 1,408" or 117' 4". In the example below, you'll be working right to left.

OPTION: Choose eighteen 12' x 8' Hill/Valley combos.

Your Space is 20' x 30'. You want to create a Wave in the center of the space like a floating cloud.

OPTION: Select a 12' x 12' Wave kit.

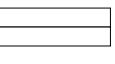

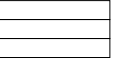

SERPENTINA[®] Waves[™] CEILING SOLUTIONS

Over 60 pre-engineered kits that are
easy to specify and install.

CAD drawings available on armstrong.com/serpentina

Serpentina main beams are identified by arc length. For example, a 690 hill main beam has a 5' 4-1/2" chord length and will occupy 5' 4-1/2" of ceiling area.
