

RAISING The Standard

Formations[™] Cloud Kits give you a great custom look using standard components — eliminating the hassle, cost, and risk associated with custom installations. Panel options offer great spot acoustics, too. Formations cloud kits make installing clouds quick and easy!

Formations[™] Clouds with ULTIMA® Tegular panels and Axiom® 4" Classic trim

Creating a Cloud Kit

FORMATIONS™ Circles

FORMATIONS™ Squares/ Rectangles

FORMATIONS™ Staggered

FORMATIONS™ Planks

FORMATIONS™ for Drywall

FORMATIONS™ with Integrated Lighting

FORMATIONS™ with DC FLEXZONE™

For Every Space

With a wide variety of options — including configurations, panels, sizes, trim color, lighting, and applications — the possibilities are endless.

Great Acoustics

Formations cloud kits with acoustical panels provide greater sound absorption than a continuous ceiling of the same area.

Fewer Wires

Kits come complete with our proven StrongBack™ carrying channel, which eliminates 40% of the cables – minimizing visible wires.

Faster Installation

Aircraft cable allows for easy floor level installation – kits assemble and install up to 50% faster than stick built clouds.

FORMATIONS™ Cloud Kits Formations Cloud Kits Make it Easy to Create Unique Ceiling Designs

Start by choosing the FORMATIONS cloud type that fits your design vision.

CLOUD TYPE DESCRIPTION FORMATIONS™ Soften and guiet an open room design by adding a few curves. Curves • 16 suspension system/trim colors · 3 standard trim heights • 16 shapes and sizes FORMATIONS™ Create a bold, captivating ceiling design with outstanding sound absorption. Squares/Rectangles • 16 suspension system/trim colors · 3 standard trim heights 15 shapes and sizes $\textbf{FORMATIONS}^{\text{\tiny{TM}}}$ Create visually interesting clouds the easy way. Staggered • 16 suspension system/trim colors · 3 standard trim heights • 78 shapes and sizes FORMATIONS™ Reduce the amount of visible suspension and create a sleek, clean look. **Planks** • 16 suspension system/trim colors · 3 standard trim heights • 30 shapes and sizes FORMATIONS™ Improved floating visual compared to field constructed track and for Drywall channeled clouds. · 3 standard trim heights • 21 shapes and sizes $\textbf{FORMATIONS}^{\text{\tiny{TM}}}$ Distribute safe, low-voltage direct current electrical power through with Integrated the acoustical ceiling suspension system (grid) for more efficient lighting. Lighting · 2 standard trim heights · 3 suspension systems 4 shapes and sizes FORMATIONS™ with Distribute safe, low-voltage direct current (DC) electrical power through DC FLEXZONE the acoustical ceiling suspension system (grid) for more efficient lighting. · 2 standard trim heights · 2 suspension systems · 12 shapes and sizes

FORMATIONS™ Curves Cloud Kits

Specify kits, colors, and panel selections.

HOW TO SPECIFY

Based on the cloud size and shape you choose, you need to specify and order the suspension and trim kit item number, the special factory-cut curved Vector® panel kit number, and any extra cartons of the infill panels you may need.

Standard circle and rounded square clouds feature 15/16" PRELUDE® suspension system and your choice of 2", 4", or 6" high AXIOM® Vector® trim.

EXAMPLE:

C4VES 0606C _

4" High 6' x 6' Color AXIOM® Cloud Suffix* Vector

Also order OPTIMA® Vector® Curves Panel Kit: 3970

Custom options available that include a wide range of AXIOM® trim and suspension system options.

* If specifying a color other than White, remember to add the color suffix at the end of the Suspension Kit item number.

FORMATIONS™ Planks Cloud Kits

Specify kits, colors, and panel selections.

HOW TO SPECIFY

Based on the cloud size and shape you choose, you need to specify and order the suspension and trim kit item number and the panel item number you select.

Standard plank clouds feature 15/16" PRELUDE® suspension system and your choice of 2", 4", or 6" high AXIOM® Vector® trim.

EXAMPLE:

1210 V4P 26V

12' x 10' 4" High 2' x 6' Cloud AXIOM® OPTIMA® Vector Vector Trim Panels

Also order OPTIMA® Vector® Plank Panel Kit: 3906 (2' x 6' - 1 carton).

DRYWALL CLOUD SHAPE AND SIZE SELECTION

FORMATIONS™ with Integrated Lighting

5 Specify kits, colors, and panel selections.

HOW TO SPECIFY

Based on the cloud size and shape you choose, you need to specify and order the suspension and trim kit item number, the panel item number, and the Philips Ledalite light fixture you select.

EXAMPLE:

L0608T	_ *	<u>A</u> <u>\</u>	_	
6' x 8' Cloud	Susp. System		6" or 8" AXION	Suffix

* PD = Prelude 15/16" Vector height SF = Suprafine 9/16" LD = Interlude 9/16"

All clouds come in the color White.

All clouds have a 4" wide opening in the center specifically designed for the integration of a Philips Ledalite TruGroove LED fixture.

SPECIFY YOUR COMPATIBLE LEDALITE LIGHTING FIXTURE

Example based on 2200 lm (nominal per 4'), 4000K

. ,	
Total Output	2187 lm
Efficacy	78.4 lm/W
CCT	4039K
CRI	84
R9	17
Distribution	0% Up / 100% Down
Spacing Criteria (0/90/180°)	1.41/1.75/NA

Meets RP-1-04 recommendations for VDT-Normal spaces

Values per 4 ft unit

Fixture photometry has been conducted by an NVLAP accredited testing laboratory in accordance with IESNA LM-79:2008

Lumen maintenance of the LEDs has been tested by the manufacturer in accordance with IESNA LM-80:2008

IES files for this and other photometric options can be downloaded online at www.ledalite.com

TRUGROOVE PHYSICAL DATA

Housina

Die-formed 20 gauge cold-rolled steel. Multiple upper wire entrances available for continuous row mounting of fixtures.

Weight

Maximum 3.5 lbs/ft.

Optical System

Performance version: White light emitted from the LED sources is internally reflected and laterally redirected by a biconvex lens. Light is then reflected by Miro-Silver panels and exits through the optical lens assembly. This assembly contains acrylic extrusion profiles to retain a layer of MesoOptics film, creating both an uninterrupted continuum of light and an optical batwing distribution.

Definition version: Light passes through a diffuse white acrylic lens to deliver a highly uniform luminous continuum.

Standard Driver

Dimming: 0-10V, 5-100%. Output is Class 2 rated.

Lumen Maintenance

At an ambient temperature of 25°C in non-insulated contact applications, the LED lumen maintenance expectation for each lumen package is:

K: L80 (12k) 71,000 hrs

G: L80 (12k) 68,000 hrs

E: L80 (12k) 54,000 hrs

Mounting

Mounting brackets on housing sides support T-Grid installation. 1/16" diameter aircraft cable with self-locking, tamper-resistant, miniature cable gripper provides vertical adjustment for drywall. Aircraft cable, crimp, and gripper independently tested to meet stringent safety requirements.

TRUGROOVE ELECTRICAL SPECIFICATIONS

Input Voltage	120V	277V
Input Voltage	27.9W	27.9W
Input Current	0.237A	0.115A
Power Factor	0.983	
Total Harm. Distortion	16.5%	
Tacted values - contact tech	nical cupport for rated	value

Tested values – contact technical support for rated values Off-state power zero unless certain controls are specified.

Joints

Self-aligning joining system with handsfree pre-joining wire access.

Electrical

Factory pre-wired to section ends with quick-wire connectors.

Approvals

Certified to UL, CSA, and IES standards. Insulation Contact (IC) rated.

Finish

Extruded aluminum trim and die-cast endplates coated with electrostatically applied and thermally cured polyester powder coat paint finish.

Environment

Rated for dry or damp locations in operating ambient temperatures 0-40°C (32-104°F).

FORMATIONS™ with DC FlexZone™

Specify kits, colors, and panel selections.

HOW TO SPECIFY

Based on the cloud size and shape you choose, you need to specify and order the suspension and trim kit item number, the panel item number you select, and any lighting or control options you choose to include.

Standard DC FLEXZONETM clouds feature DC FLEXZONETM 9/16" SUPRAFINETM or SILHOUETTETM 1/4" Reveal suspension system and your choice of 4" or 6" high AXIOMTM VectorTM trim.

EXAMPLE:

DC1014 TSL AV4

10' x 14' SILHOUETTE® 4" High Cloud 1/4" Reveal AXIOM® Vector

Also order ULTIMA Panel Kit: 1912 (2' x 2' – 3 cartons).

Order compatible lighting, power supply, cables, and controls through DC FLEXZONE™ partner sites.

DC FLEXZONE CLOUD SHAPE AND SIZE SELECTION

10' x 14'

SYSTEM OVERVIEW

DC FLEXZONE $^{\text{\tiny{TM}}}$ Suspension System

- . DC FLEXZONE™ suspension system is a "Power Distribution Platform"
- Each main beam becomes its own electrical circuit 24VDC, 100 Watts, "Safe to Touch", Class 2
- Powered main beam: SUPRAFINE® has 1 circuit SILHOUETTE® has 2 circuits
- Only the main beams receive power, all other ceiling and suspension components are standard
- DC FLEXZONE" suspension system is installed like any other acoustical ceiling; electricians simply "wire up" the grid instead of every light fixture
- At least 2.0 watts/SF of power is delivered through the ceiling, more than enough for lighting and other plenum-based electrical devices like sensors

Power Supply

- · A power supply connects to the building's AC power and converts it to 24 Volt direct current (DC)
- Optional for the power supply to be directly connected to a renewable on-site source, like solar

Power Cables

- Power cables bring power from the power supply to the DC FLEXZONE™ suspension system via special connector slots on the grid
- Each main beam receives power so it's available wherever you need it

Devices

- Device cables bring power from the DC FLEXZONE™ suspension system to devices anywhere along the main beam – just "plug and play"
- Compatible fixtures from lighting companies include:
- Recessed 24" x 24" and 24" x 48", Pendant, and Downlight fixtures
- Compact Fluorescent, Fluorescent, and LED lighting technology

Controls

- Standard off the shelf controls can be used that are separate from this plug and play DC power infrastructure
- Typically 0-10v control circuits will be used or relays and low voltage switches
- DC FLEXZONE™ compatible wireless control solutions are also available

FORMATIONS™ Cloud Kits

- 1 Recommend specifying a Roal Electronics4 channel Safe Energy Server.
- 2 Recommend specifying TE Connectivity 10' power feed cable assemblies.
- 3 Recommend specifying this quantity of lighting fixtures, each with a 5' TE load device cable assembly.
- * All electrical devices shall be ordered from the electrical manufacturer and through normal electrical distribution channels.

All electrical items and quantities are strictly recommendations. All electrical devices shall be Armstrong® DC FLEXZONE™ compatible. Armstrong World Industries does not warrant, and

assumes no liability for the accuracy, completeness, or performance of another manufacturer's product. The specifier is advised to consult with a duly licensed engineering or lighting designer in the particular locale of the installation to assume compliance with all legal requirements for the electrical design and layout.

For sample DC FLEXZONE™ for FORMATIONS™ layouts with compatible lighting and controls, visit www.armstrongceilings.com/dcflexzone

DC FLEXZONE™ COMPATIBLE PARTNERS

Products from each of the categories below need to be specified and ordered separately for a complete DC FLEXZONE™ Formations™ Cloud. Armstrong provides the DC FLEXZONE™ suspension system and ceiling panels.

The other product categories are provided by our DC FLEXZONE™ compatible partners through their normal electrical channels. For more information on DC FLEXZONE™ compatible partners' products, visit www.armstrongceilings.com/dcflexzone.
