The Belgian Linen Series is a rectified glazed porcelain. Influenced by textiles, this series has a simplistic, modern appeal. Piece to piece variation in shade or color is inherent in all fired clay products; therefore, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. When mixing sizes within a series, shade, texture and calibration differences should be expected. Because this material is a porcelain product, minimal maintenance is required. This series is suitable for residential and commercial applications.

For proper bonding, LHT/LFT mortar for large format and heavy tiles should be used when installing tiles with a dimensional length greater than 15" and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary and, in some cases, back buttering of tile may be required.

When installing rectangular or square tiles 15 inches or longer with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.
