P.E.I. RATING: n/a**FROSTPROOF:** Yes**DYNAMIC C.O.F. WET:** 0.50

**DCOF Rating is a measurement of a tiles frictional resistance. It is the specifier's responsibility to ensure the chosen tile is appropriate for each interior and exterior application.

The Vega Series is a rectified through body porcelain that emulates a concrete. It is available in six colors, with a slight variation between pieces, that provide an industrial and commercial aesthetic to any environment. When mixing sizes within a series, shade, texture and calibration differences should be expected. Because this material is a porcelain product, minimal maintenance is required. This series is suitable for residential and commercial applications.

For proper bonding, LHT/LFT mortar for large format and heavy tiles should be used when installing tiles with a dimensional length greater than 15", and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back buttering of the tile may be required.

When installing rectangular or square tiles 15 inches or longer with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.
