The WF series is a glazed porcelain. Digital print technology creates the varied appearance of this series. The warmth of the four colors, available in several sizes and formats, will enrich spaces in a continuous flow of colors, hints and nuances. Because this material is a porcelain product, minimal maintenance is required. It is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. When mixing sizes within a series, shade, texture and calibration differences should be expected. This series is suitable for residential and commercial applications.

When installing rectangular or square tiles 15 inches or longer with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.
