A unique fusion of urban textures and expressive elements.

Inspiration from nature brought about a dramatic live wood edge headboard crafted from exotic black limba. The natural elements transition through to the thin, free floating shelves, while the genuine leather upholstered back panel creates movement from hard to soft. This low-profile concept creates a boutique allure highlighting a sophisticated minimalist design. The Organic Collection, preceded by Cosmo, is the second design introduced within the four part Imagination Series.

The Imagination Series shares a variety of ancillary items to coordinate with each headboard personality. Featuring the light, airy, and openness of European influence, these can be built to fit most any design concept. Select from dressers, desks, consoles, tables or combinations using the modular components of the series. To further personalize your furniture, choose from our standard veneer and laminate offering, finish palette, and hardware options. Or, select materials unique to your project!

Let your creativity lead you selecting the material and style to coordinate with your design project. It's all up to you. Evoke your imagination...

Design by Interior Image Group.
