

RAMA

landscapeforms

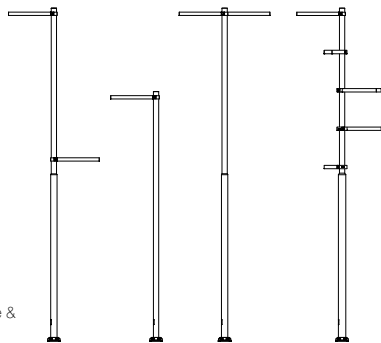

Rama is a Tree of Light

Architectural in form, minimalist in expression, and universal in aesthetic, the Rama area light from Landscape Forms' Barcelona partner Santa & Cole has earned the ADI-FAD Silver Delta Award from Spain's Association of Industrial Design. With multiple distribution types and drive currents, Rama is a versatile light that provides appropriate light levels for a variety of outdoor spaces and lighting requirements. It comes in three pole heights ranging from 4.5 to 8 meters tall and accommodates one to five luminaires that can be mounted in different directions and heights to put light where it is needed. Energy-efficient, warm white LEDs offer excellent performance and superior color rendering. The luminaire has heat-dissipating extruded aluminum frames with a natural aluminum powdercoat finish; poles are offered in a selection of colors. Rama is available with a clear or frosted glass lens, is dimmable, and ships pre-wired.

Streetscape &
Pedestrian

Available in 4.5m, 6m and 8m pole heights
