Mounting

"One of the best big lights that B-K offers has to be the K2™. This fixture can light anything you throw it at, from a 60' tall palm tree, to a church steeple or stadium entrance. I was thrilled to hear about the K2's new color tuning ability in the LED version which also happens to be dimmable! Can't forget the metal halide version either, a mainstay of our firm for years."

Ryan Linton, Grenald Waldron Associates, BKU Spring 2012
