

# Vela Swivel Chair

Designer: Todd Bracher

# Product Overview

HBF Swivel Seating

A minimalistic design, Vela is an essential piece for the modern office. Inspired by “an honest expression of the evolving work-place,” Vela represents a democratic design language with its unadorned yet sophisticated presence in an executive office or grouped around a large conference table. Vela’s name (stemming from the word “velum” which means membrane) represents its ability to support and comfort the nuances of the body, while still offering structure and a streamlined look for the contract environment. Vela delivers necessary ergonomics for a wide range of body types with its S-curve back (available in a mid or high-back variant) plywood structure with molded foam cushioning, and angled, cast aluminum arms for a sculptural yet comfortable form.

- Both mid and high-back models are equipped with height adjustments and tension/locking mechanisms.
- Arms and base are standard in black metal. Available in polished aluminum for an upcharge.

- Mid Back Dimensions
  - OH 35.5"-40"
  - OW 23.25" (arms) 20" (armless)
