PUZZ

"Our process for developing the rug graphic was similar to how we approach architecture. We began by looking at our sculptural studies for a pop-up store that was composed of large curved puzzle pieces. The challenge was how to translate a three dimensional object into a two dimensional graphic. Through a series of back and forth investigations, we refined the two dimensional graphics based upon the constraints of traditional rug making while still maintaining the dynamism of the three dimensional objects." - **Frank Gehry**
