DASCH

⚠ Before starting, determine which fasteners will be best suited to secure the fitting, based on the material of the ceiling substrate.

1. Licensed electrician to terminate '240v AC input' and 'dimming input' to remotely mounted LED driver

2. Hang shade from ceiling using mounting hardware provided. See next page for additional detail

3. Mount canopy base to 4" Jbox

4. Fasten power cable strain relief grub screw

5. Insert 'DC out' power cable into canopy cover. Adust lengths of cable and trim if necessary. Connect DC out from driver to terminals provided in canopy

6. Place canopy over canopy mount and fasten 2x grub screws
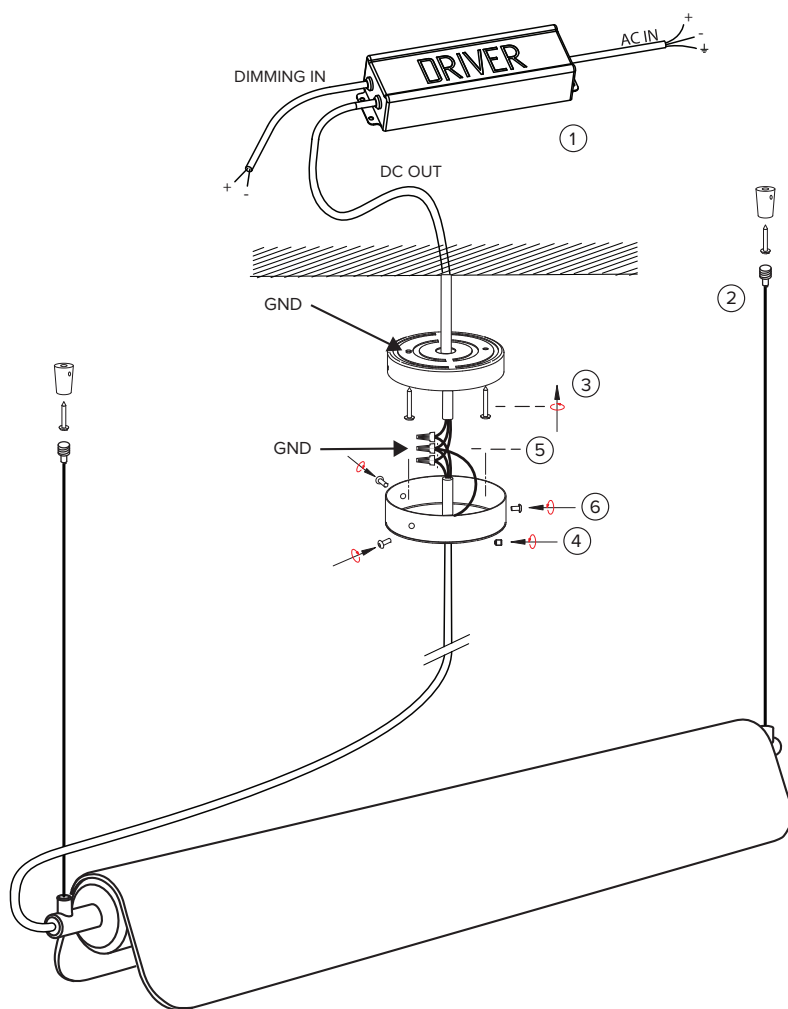

Note: Line voltage must be installed by a qualified electrician, in accordance with local electrical laws.
