General Information

This price book supercedes all previous versions.

Before placing your order, confirm you have all required information necessary. Lead times for orders begin after all required information is included and correct.

Delivery Information

We know lead times are important and sticking to them even more so. We work to maintain a 6-8 week lead time on all standard products in this book from receipt of a clean order. All orders are acknowledged with an approximate shipping date and will be invoiced with the price in effect at the date the purchase order is received.

Shipping charges are prepaid (within the continental U.S.). Therefore, pricing is a delivered price based on normal ground transportation. If you have special instructions, need to ship by air, or are shipping to Alaska or Hawaii, contact NuCraft Customer Service. NuCraft can also help arrange to have products blanket wrapped for an additional charge. Contact the NuCraft Customer Service team or specify it on your purchase order.

Minimum Freight Charge: Any order below \$2,100 net will be assessed a \$285 net minimum freight charge (one per order).

Orders are subject to acquiring the materials required for manufacturing. Fulfillment can be affected by strikes, fires, embargoes and acts of government. These elements are beyond our control.

NuCraft offers a variety of services to accommodate a wide range of delivery requirements. Availability of these services is dependent on a number of factors and may not be offered with all shipments. Examples of delivery services that have additional fees include:

- Specific date within our standard 3-5 day delivery window (for orders under \$50,000 net)
- Specific time of day, morning or afternoon (for orders under \$50,000 net)
- Delivery to a warehouse before delivery to its final destination (unless product is picked up at the warehouse)

Contact the NuCraft Customer Service team for availability and pricing on these services.

Freight Terms

Shipping charges for NuCraft products are prepaid for standard delivery in the continental United States. Standard delivery is defined as follows: Product is delivered on a 53' trailer being pulled by a long-haul tractor (total length of 85'). Facility will receive delivery Monday through Friday between the hours of 8:00 AM and 4:00 PM. Facility has docks with levelers and a fork truck for unloading. Product will be loaded on load bars two levels high. Receiving facility is responsible to have personnel on hand to unload the truck upon arrival, drivers do not unload. Delivery sites or times that do not meet this criteria will be accommodated, but will typically incur a charge to cover additional shipping costs. Please notify NuCraft in advance of the shipment if this is the case and the additional charge (if any) will be determined by NuCraft.

Product ships FOB dock. The customer obtains title to their product and materials, and assumes the risk of loss for them, upon shipment from NuCraft's facilities.

Storage

NuCraft has no storage facilities for finished product. If a customer cannot accept an order when it is ready for shipment, the customer must designate an alternative shipping address. If no address is provided, NuCraft may, at its discretion, transfer the product to storage. If product is transferred to an off-site storage facility, the customer may be charged for transportation to the facility and for any associated storage fees. NuCraft considers transfer of the product to a storage facility the equivalent of shipment, including invoicing and payment. Customers assume the risk of damage or loss during storage.

Transportation Times and Delays

Third party carriers that NuCraft contracts with will make reasonable efforts to accommodate requested delivery times and dates. Scheduled delivery appointments may, however, be delayed for a variety of reasons, including inclement weather, traffic, transportation equipment problems, and delays encountered at other delivery locations along the delivery route. NuCraft does not recommend scheduling activities that depend on the delivery appointment (for example, scheduling furniture installers to install furniture the day of the delivery appointment). NuCraft shall not be liable for any costs incurred as a result of a missed delivery appointment.

Shipment Damage Claims

Legal title to merchandise passes to the buyer upon acceptance by the carrier. **Inspect all cartons upon delivery.** Details of visible damage should be noted on the delivery receipt. Do not install product if damage is found upon inspection. The carrier should be notified by the buyer to inspect the merchandise, and file a claim immediately. If visible damage is not apparent, sign the delivery receipt "No visible damage." This will allow recourse for a concealed damage claim. Although most claims for transportation damages must be filed against the carrier within nine months of the date of delivery, concealed damage claims must be filed within 15 days of receipt.

Do not destroy packing materials until shipment has been inspected. Then proceed to file a claim with the carrier.

Failure to make any claims against NuCraft within 10 days shall constitute acceptance of the merchandise and a waiver of any defects, errors or shortages discovered upon inspection.

Cancellations

Cancellations must be reviewed by our Customer Service team. Because we build your products to order, orders cannot be cancelled once processing has begun. Processing includes but is not limited to development of shop drawings and other engineering drawings. If cancellation is approved, a processing fee of 20-100% will be assessed based on the status of the order.

Change Order Policy

NuCraft will make every attempt to honor any reasonable change request to product provided that the request is received prior to start of production. Change orders will be accepted only if the request is made in writing and received in time to make the change. NuCraft reserves the right to increase our acknowledged price and ship date if necessary to make the requested changes. Please submit any change order request to our Customer Service team. NuCraft will assess charges to the customer as stipulated in the following:

- Standard Orders: Change orders received prior to production will be charged \$200 net to cover print and administrative costs.
- Special Orders: Change orders received prior to production will be charged \$200 net to cover print and administrative costs. There may be additional costs associated with engineering labor required for the change order.
- Change orders received after production must be evaluated by NuCraft. If approved, the charge will be \$200 net plus any restocking charges accumulated. There may be additional costs associated with engineering labor required for the change order.

General Information

Repair Authorization

Prior written approval is required for repairs of merchandise charged to NuCraft. Failure to do so will result in customer funded repairs.

Payment Terms

Deposits are required at the time of order due to the custom nature of our products. See information regarding Cancellations above.

Credit terms are available to qualified customers. Please contact AR@NuCraft.com to start the application process. Note that the credit application process requires a valid sales tax exemption or resale tax certificate, Form W-9, and three current trade references.

Credit Card Payments are accepted via web portal. Please contact AR@NuCraft.com for payment instructions. Note that a 2% convenience fee will be added for using this payment method and no early pay discounts are allowed on credit card payments.

Warranty

NuCraft warrants that each piece of furniture it manufactures will be free from defects in materials and workmanship for a period of ten years of single-shift use. Textiles, decorative trim, electrical components, lamps, mechanical devices, casters and custom-made products not described in NuCraft's catalog are warranted for one year from the date of original delivery. Height adjustable desk mechanisms are warranted for two years. This warranty is applicable only if the furniture is given normal and proper care and is properly installed and maintained in an office environment. This warranty extends only to products manufactured and sold in North America and only to original purchasers acquiring new NuCraft products through authorized dealers, or from others specifically authorized by NuCraft to sell its products.

NuCraft's sole obligation under this warranty is to repair or replace, at NuCraft's discretion, products which prove to be defective during the warranty period. Purchasers may be required to establish that a claim is within the warranty period. To initiate a warranty claim, the purchaser should contact an authorized NuCraft dealer.

This warranty does not cover: 1) Damage caused by a carrier 2) COM (Customer's Own Material) specified by the customer that is not a standard product offering 3) Color, grain or texture of wood and other covering materials (due to the natural variations over which NuCraft has no control) 4) Damages resulting from user modification, attachments to a product, misuse, abuse, alteration or negligent use.

NuCraft extends no other warranties, expressed or implied, including warranty of merchantability or fitness for a particular purpose. NuCraft shall not be liable for loss of time, inconvenience, commercial loss, incidental or consequential damages.

Environmental Statement

NuCraft is committed to supporting responsible environmental policies and practices in all that we do. We strive for sustainability, weighing our business decisions against the costs to the ecological, social and economic systems they affect.

Our products are manufactured to meet the credit requirements of the U.S. Green Building Council's LEED rating systems in one or more of the following categories:

- Recycled Content
- Certified Wood
- Low-Emitting Materials

Computer Aided Planning

NuCraft products and pricing are available on CD via 2020 Cap, an AutoCAD®-based space planning tool.

2020 Cap is an integrated software system developed specifically for interior designers and facility planners to enhance workplace performance. This modern suite of applications works together seamlessly, in concert. Navigate catalogs, select products, design in plan view and 3D, assign options, create worksheets and build a project where you want, when you want. Take your pick. It's dynamic and interactive. Design projects are a work in progress. And now you can perform any of the many discrete tasks that go into a project any time, any place.

For additional information, you may contact 2020 Cap direct at 800-227-0038.

iSpec®

NuCraft offers a free online product configuration and specification service that saves you time and allows you to be creative while leaving the nuts and bolts to someone else. No specific software is required, nor is there any learning curve. This service applies to all NuCraft products. For additional information, call 1-877-NUCRAFT and ask for the iSpec Team or log on to www.nucraft.com/ispec.

Finish Information

Surface Materials Palette

We crafted our materials palette using the same demanding standards that distinguish our furniture. Thoughtful design and attention to every detail elevate your possibilities.

Anchored by NuCraft veneers, unrivaled for clarity, quality, and depth of finish, our collection of surface materials comprises a sophisticated set of balanced elements that supports your design vision.

Some elements have their roots in NuCraft's rich heritage. Others are new materials and reflect current trends and taste. Together, they ensure that you're ready for today and positioned well for the future. Beautifully.

Custom Finishes

NuCraft specializes in expert custom finish matching. For a nominal upcharge we can provide custom finishes, and we are frequently asked to match the finishes of other furniture manufacturers. For orders over \$5000 list, a finish sample will automatically be sent for approval prior to entering the order. Additionally, for finishes that appear unusual to match or for customers directly requesting a sample, a finish sample will also be sent for approval prior to entering the order.

Custom finishes requiring colored varnishes to create a painted look can only be applied to Maple veneer and require one extra week in addition to the standard leadtime. NuCraft's standard black finish (G82) can be applied to all NuCraft standard veneers. Walnut is the standard black veneer. Other species must be specified when ordering.

Custom finishes carry a 10% upcharge per item, per finish.

Do not add the finish upcharge to any item that is not wood. Example: casters, ganging connectors.

Treatments

Note: Default veneer sheen will vary per finish and were determined by a team of experts who reviewed the colorways to determine if gloss or matte best highlighted the natural characteristics of the species of wood and the color of the stain. Default finish is bolded on pages 5-6. If no direction is provided on incoming orders, default sheen will be selected.

Gloss: Gloss is a durable finish that tends to nicely mask normal wear and leaves wood grain visible to the eye. It achieves a medium gloss open pore appearance (40 – 50 sheen range). Finish numbers preceded by the letter "G" indicate a Gloss finish.

Matte: Like Gloss, Matte is durable, tends to nicely mask normal wear and leaves wood grain visible to the eye. It achieves a low luster, open pore appearance (10 – 20 sheen range). Finish numbers preceded by the letter "M" indicate a Matte finish.

Since each veneer type responds differently to both types of treatment, all will have a distinctive look and feel when finished. For example, a Walnut veneer with a Gloss treatment will remain much more textured than a Cherry veneer with the same treatment.

About the Wood

All NuCraft veneers are carefully selected for uniformity of color and grain. Still, wood is a natural substance and minor variations may occur due to its own uniqueness. Because of this, the furniture you receive may not be an exact match to our samples.

NuCraft takes great pride in our finish color consistency. However, wood is a natural product that will have color variation within a single piece of furniture, as well as from one piece to the next. Other factors also affect color over time, such as exposure to light (both intensity and duration). For example, lighter finishes cause more variation in colors over time.

In cases where a returning customer wants a precise match with existing furniture, we recommend sending a sample of the existing furniture finish. Please contact NuCraft Customer Service to determine an appropriate sample. This will ensure a finish match between old and new orders. This type of order is considered a control sample. There will be a 10% upcharge on an order of this type. Due to natural aging of veneers, natural finishes may vary.

Care and Maintenance of Wood Finishes

Our finish material is a crystal clear, urethane acrylic blend. This type of finish may be repaired in the field by a qualified refinisher.

NuCraft recommends using a damp cloth to clean your fine wood furniture. Always wipe with the grain of the wood. Should your wood furniture require a more thorough cleaning, we recommend using a mild cleaner such as Joy dish soap or Murphy's oil soap, thoroughly diluted in water (one part soap to thirty parts water). Water will not damage NuCraft's finish, but will leave surface spots when it dries. To avoid this, dry the surface with a soft cloth after it is cleaned. Marks that cannot be removed with the cleaning methods above may be able to be removed using naphtha, a mild degreasing solvent.

Caution: while the use of polishes that contain wax, petroleum solvents or silicones may immediately enhance the "shine" of a product, it may also eventually remove the fine original finish applied in our factory. Silicone on the surface of wood may also make it very difficult to respray or refinish.

All NuCraft furniture is inspected and polished before it leaves our factory. In some instances, the packing materials may imprint on the factory polish. Cleaning and polishing the furniture once it is unpacked will normally restore the furniture to its original beauty.

In some cases, the rubber support feet used on the bottom of common office equipment (teleconferencing phones, laptops, microphones, copiers, etc.) can create unsightly marks in the surface of wood tops, due to oxidation of the lacquer finish. We suggest these machines be placed on a protective type of padding, such as felt.

Wood will fade as a result of exposure to UV light. This is particularly prevalent with light finishes. If color changes due to fading are a concern for your application, the impact can be minimized by selecting medium to dark stains for your wood surfaces. Our top coat includes a UV inhibitor which makes the finishes less prone to fading.

Finish Information

Laminates

Selected Formica® and Nevamar® laminates are available on Training Tables, Conference Tables, Conference Room Furniture and select Occasional Tables. For standard laminate and wood pricing, refer to individual item pricing columns.

Care and Maintenance of Laminate and Novawrap

Laminate and Novawrap surfaces may be cleaned with a damp cloth and ordinary soap or non-abrasive household liquid detergent. Dry the surface with a clean cloth or soft paper towel to prevent streaks from appearing.

Care and Maintenance of Metal

Metal surfaces can be wiped with a damp cloth and rubbed dry. A mild non-abrasive household liquid detergent can be used if necessary. Regular maintenance of metal components, including tightening of fasteners and light lubrication of moving parts, will extend the life of your furniture.

Satin Etched Glass

Glass color may vary slightly on multi-piece conference table tops over 180" x 60" when satin etched glass is specified due to the iron content and etching process of the glass.

Care and Maintenance of Glass

Clear or frosted glass may be cleaned with commercial glass cleaner. Be sure to use a lint-free cloth if cleaning the frosted side of the glass.

Stone and Solid Surface Material

Despite its reputation for durability, natural stone can easily be broken during handling and/or installation if proper techniques are not followed. In addition, Nucraft is not responsible for the installation of natural stone or solid surface materials on its products. Therefore, installers specifically trained in the installation of these materials must be utilized to ensure a quality installation. Nucraft shall not be liable for any damages incurred during the handling and/or installation of natural stone or solid surface materials on its products.

Care and Maintenance of Granite

Granite surfaces may be cleaned with a damp cloth and ordinary soap or non-abrasive household liquid detergent. Dry the surface with a clean cloth or soft paper towel to prevent streaks from appearing.

Care and Maintenance of Leather

Genuine leather requires very little care. Nucraft recommends that leather be dusted regularly. If a more thorough cleaning is needed, use lukewarm water and a mild, non-abrasive soap. Generate some lather and lightly rub the surface with cheesecloth. Rinse off any soap film with clean water and towel dry. The leather may dry dull. To restore the leather to a normal gloss, rub it with a clean towel. Never use furniture polish, oil, varnish or ammonia. Saddle soap may be used to prevent the leather from becoming brittle or cracked and to maintain the original supple finish.

Touch Up Finish Kits

Model #	Description	Price
KIT-M	Metal Kit	80
KIT-P	Paint Kit	80
KIT-S	Stain Kit	80

REQUIRED INFORMATION:

(ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

- Kit model number
- Quantity of kits
- Specify finish (See pages 5-6)

General Information:

- Touch-up kits must be ordered on a purchase order separate from Nucraft product due to Hazmat shipping

WOOD FINISHES

STANDARD

Default veneer sheen will vary per finish and were determined by a team of experts who reviewed the colorways to determine if gloss or matte best highlighted the natural characteristics of the species of wood and the color of the stain. Default finish is bolded. If no direction is provided, default sheen will be selected.

Upholstery Fabric

Applies to Benches

Nucraft is pleased to have partnered with KnollTextiles, Spinneybeck, and UltraFabrics to offer a concise selection of standard upholstery fabrics pre-approved for use on our products, with prices that are figured into our graded-in system. We've carefully curated a selection of each of the textile's color lines to coordinate with our materials offering. However, all colorways are approved and available as standard. Please contact fabric manufacturer for sampling support.

GRADED-IN FABRIC PROGRAM

Top quality upholstery and fabrics from some of the biggest names in the textile industry have been graded into this price list. For a current list of graded-in manufacturers and additional information on our graded-in fabrics program, please go to www.nucraft.com. All Graded-In and COM fabrics will require pre-approval for use on Talis and Arena benches. Please contact Nucraft Customer Service for assistance with this process.

COM Specification

For COM orders please include the following:

- Name of customer
- Customer's purchase order number
- Model number and quantity of piece(s) to be covered
- Specify right-way or railroad application (railroad is the default if no selection is made)
- If fabric is a stripe or pattern, specify vertical or horizontal application
- Supplier's name, material number and description

YARDAGE ESTIMATING

All yardages in the price list are based on 54" wide plain (no match) fabric. The following is a guide for fabrics that are less than 54" wide or have a pattern match.

Fabric Less Than 54" Wide

For 50" wide fabrics allow 10% additional fabric
For 48" wide fabrics allow 15% additional fabric
For 45" wide fabrics allow 20% additional fabric
For 36" wide fabrics allow 50% additional fabric

For Pattern Match Fabrics

3" to 14" repeat allow 15% additional fabric
15" to 19" repeat allow 20% additional fabric
20" to 27" repeat allow 25% additional fabric
28" to 36" repeat allow 30% additional fabric

Nucraft may add a charge for sewing, cutting and matching unusual COM or COL materials to cover additional costs. Call customer service for pricing.

It is the sole responsibility of the customer to determine that the fabric is appropriate for the application in which it will be used.

Once COM/COL is accepted, Nucraft assumes no responsibility for its overall appearance, flammability, normal durability, color fastness or any other quality after upholstered on a Nucraft product beyond our normal quality standards.

All Graded-In and COM fabrics will require pre-approval for use on Talis and Arena benches. Please contact Nucraft Customer Service for assistance with this process.

The fabric should be sent to the following address:
Nucraft Furniture Company
5151 West River Drive
Comstock Park, MI 49321
Attn: Order Processing

FIRE RESISTANCE

Nucraft will only work with textiles that meet the ACT Voluntary Performance Guidelines:

- Nucraft fabric tack panels incorporate fabrics that meet the ASTM E 84 standard US flammability test for wrapped panels.
- Nucraft upholstery fabrics for benches and cushions must meet one or more of the following flammability tests; NFPA 260, NFPA 701, or CAL 117.
- All COM fabrics must meet the required flammability standards per fabric application.
- Nucraft reserves the right to decline any fabrics that do not meet ACT standard flammability requirements.

COM LEATHER SPECIFICS

The following is a guide for specifying leather requirements. The guide is based on the following general information.

A full "domestic" hide is approximately 50-60 square feet. A specialty or calf hide is approximately 35 square feet. Of this footage there are various non-usable areas included in the hide's size. Conversion of fabric yardage to leather is approximately 1 yard = 18 square feet.

Bench Requirements

48" benches will require 1/2 domestic hide or 1 full calf hide.

60" benches will require 1 domestic hide or 2 calf hides.

72" benches will require approximately 1 full domestic hide or 3 calf hides.

The boxing around the seat, if required, will have 4-6 seams that will be placed aesthetically based on the yield and usable remains of the hides.

SEATED HEIGHT CONFERENCE TABLES

Pages 24-27

STANDING HEIGHT CONFERENCE TABLES

Pages 24-27

MONITOR TABLES

Pages 28-29

BENCHES

Page 30

Tesano is a high performance table that addresses the need for conference and standing height tables in collaborative settings. Such settings could include lobbies, conference rooms, or any open spaces in an office setting. Designed by Joey Rüter, Tesano is a combination of beautiful simplicity and elegantly executed functionality. With a variety of technology accommodation features and surface material options and finishes, Tesano can address a wide range of application needs.

Table Types

Tesano is available in two table types (Conference and Monitor):

- Conference Table – this style includes a panel base at both ends of the table and is available in three depths and in lengths from 48” to 132” (in 12” increments).

Height: 30", 42"
 Depths: 24", 30", 36", 42"
 Widths: 48", 60", 72", 84", 96", 108", 120", 132"

- Monitor Table – this style includes a panel base at one end and a column base at the other end, with a vertical panel (finished on the back side) onto which a monitor can be mounted. This style is available in three depths and in lengths from 48” to 108” (in 12” increments).

Height: 42"
 Depths: 30", 36", 42"
 Widths: 48", 60", 72", 84", 96", 108"

Design Details

Tesano features a variety of design details that make this hard working table as much a design statement as a highly functional addition to any environment.

3"-Thick Design

This overall thickness strikes an appropriate balance between mass and lightness, giving Tesano tables a sense of both structural integrity and clean lines. An internal steel frame provides structural support, allowing for 132"-long Tesano tables with just two bases.

Mitered Corners

This design element gives Tesano tables a more refined aesthetic and invokes a sense of solid wood.

Metal Accents

Each Tesano conference table includes two ½"-thick metal accents inset 9" from each end of the table and flush to adjacent surfaces. These accents are available in clear or black anodized aluminum, and provide an elegant touch of metal at the joints between the end panels and the center top section.

Wrapped Veneer Design

When specified with standard or premium veneers, Tesano features a unique reverse flip veneer lay-up design that results in a superior aesthetic. Each individual veneer leaf is flipped and reversed, resulting in a continuous flow of veneer that is both unidirectional and balanced, has no visible seams, and gives the table a natural appearance, reminiscent of a solid slab of wood. An optional Plank Veneer layup offers dramatic variations in veneer leaf color, length and natural characteristics, resulting in the appearance of randomly matched veneers.

Glass Top Option

Available on both Conference and Monitor tables, this top option is 1/4"-thick, tempered, back-painted glass in either standard gloss or satin etched top finishes. The glass top option covers the entire top of the table on Monitor tables. For Conference tables, it is only in the center section of the table, between the two metal trim pieces, and is flush with the top of the metal trim and the adjacent 9" end sections.

1/4" glass inlay

Tesano tables feature two base styles depending on the table type and base location.

Panel Base

This base is standard on both ends of Conference tables and on one end of Monitor tables. It is the same width as the table top and features a removable panel on the inside surface of the base to access the hollow core of the base for cable management. A scallop at the bottom of the base panel provides access and egress for cables.

With Panel

Panel Removed

Monitor Table Column Base

On the opposite end of the Monitor table from the Panel base is the Column base.

With Front Access Panel

With Back Panel Removed

Conference Table Foot Rail

Optional Foot Rail available on standing height conference tables. Tables more than 96" in length will include a center support. Available in powder coat and polished chrome finish options. Foot Rail is located 5" in from the edge of the base and measures 2.5" high x 1.5" deep.

Conference Table with Optional Foot Rail

Monitor Table Foot Rail

Optional Foot Rail available on monitor tables. Tables 96" in length and longer will include a center support. Available in powder coat and polished chrome finish options. Foot Rail is located 5" in from the edge of the base and measures 2.5" high x 1.5" deep.

Power Spec and USB Spec

This compact unit allows for the addition of power or data to a work surface in a discreet way. Available in round or square shapes, and multiple finish options.

Power Spec

- Spill-proof power simplex
- Compact design
- 1-3/4" cutout for installation
- UL Listed

Power Spec

USB Spec

- Used to charge devices or transfer data
- Compact design
- Offered with USB
- 1-3/4" cutout for installation

USB Spec

Power & Data

Tesano is offered with two power & data options:

Power Rail

This low-profile option addresses the need for power & data connectivity just below the table top. This is an ideal choice for those who desire a visually uninterrupted table top. Power Rails are available in three configurations:

- Two simplex receptacles
- One simplex receptacle and two USB chargers
- Blank faceplate designed for use with two Single Space Extron Architectural Adaptor Plates (AAPs)

Mounted to the underside of the table top near the edge of the long sides of the table, these units can be placed anywhere along the length of the table. The flexible mounting design allows units to be installed closer to the edge of the table top or recessed further back. Additional units can be added as necessary, or can be removed altogether when no longer needed.

Total maximum number of power rails that can go on the table	4	4	8	8	8	8	8	8

Charging Trac

Charging Trac is a low voltage, under surface power system with 2 USB ports per unit. It's modular configuration provides a customizable solution. Offered in a 2 or 4 unit kit of parts with a plug-in infeed. USB-A compatible.

Tesano™ Planning

Freestanding Power Option: Charging Cube and Tech Zone

Charging Cube

Charging Cube addresses the need for portable power. The ability to take this device anywhere for collaboration and easy connectivity makes the Charging Cube ideal for those who appreciate flexibility in their workspace.

The Charging Cube can be placed anywhere, and allow up to three devices to be charged at once.

- Three 2 amp USB charging ports
- 11,600 mAh battery capacity
- Charges completely in 4.5 hours

Charging Cube - Top View

Charging Cube - Side View

Tech Zone

Simple, easy to use and portable, this freestanding table top power option allows you to easily charge all of your devices.

Available in three configurations with a variety of power and data connectivity options. Includes a 72"-long plug-in infeed cord.

Tech Zone - Side View

- ZONE-SPEAKER includes one simplex receptacle, one dual charging USB-A charging port and a Bluetooth speaker
- ZONE-DATA includes two simplex receptacles and two open data ports
- ZONE-USB includes two simplex receptacles, one data port and one dual charging USB-A charging port

Tesano™ Planning

Freestanding Power Option: Charging Stand

Battery-Powered Charging Stand

At table height, this battery-powered unit provides multiple charging options for collaboration anywhere with cordless power.

- Three 2 amp USB-A charging ports
- One USB-C (18W) charging port

Battery-Powered Charging Stand

Cordless Charging Stand

The corded unit offers various configurations to fit your needs, while still offering easy mobility. Includes a 10'-long plug-in infeed cord.

Three configurations to choose from:

STAND-1C

One simplex receptacle and two USB-A ports, and one USB-C port

STAND-3C

Three simplex receptacles, two USB-A ports, and one USB-C port

STAND-4C

Four simplex receptacles, two USB-A ports and one USB-C port

STAND-4C

Modular Electrical System

With either of the two power & data connectivity options on Tesano, a modular electrical system is available with the table with a direct plug-in connection or a hardwired connection. If the direct plug-in connection option is selected, all outlets will be on a single circuit. If the hardwired connection option is selected, the modular electrical system will have two circuits. The modular power system includes two duplex receptacles for tables 60" and shorter, and four duplex receptacles for tables longer than 60". The duplex receptacles are concealed beneath the table top and are designed to be used in conjunction with the Power Rail and Tech Node units.

- 4-wire, 20-amp modular electrical system
- One-circuit system with plug-in infeed two-circuit system when specified with the hardwired infeed connector
- All tables are pre-wired
- When specified with the hardwired infeed, a licensed electrician is required to complete hardwire connections to building's power source. The hardwire power connector is 84" long. The infeed will travel from the last duplex down the leg where there will be approximately 9" of cord that will extend beyond the base. It is important that the floor core is near or under the base.
- Neutral (white) wires are 10 gauge, hot and ground wires are 12 gauge
- All electrical components satisfy National Electrical Code (NEC) requirements and are UL listed
- When ordering Power Rails that require power (simplex receptacles), the maximum quantity per table will be based on the number of power receptacles included with the modular power system, as follows:
 - Tables 60" and shorter - four power receptacles
 - Tables over 60" long - eight power receptacles

Electrical Diagram — Hardwired Power Connection Only

Wire Management

Tesano tables specified with power options also require a modular electrical system, available with either a hardwired or direct plug-in connection option (if no selection is made, the table will ship with the direct plug-in option as standard). This power system is housed behind a metal shroud allowing access to duplex receptacles while concealing power jumpers. Cable management clips allow cables to be neatly stored and concealed beneath the table top.

Monitor Area

- Monitor area panel size: 27" H x Width of Table
- Monitor and attaching hardware are COM options
- We suggest not exceeding 43" sized monitors as the unit will overhang the tops or sides of the monitor panel

Tesano™ Conference Tables

Veneer, Premium Veneer, Plank Veneer

TETC-9630-42-V-FR

Options:

Satin Glass:	Add -TSSG	\$267 for 48"x30" – 72"x30" tables \$374 for 72"x36" – 96"x42" tables \$480 for 108"x30" – 120"x42" tables
Foot Rail:	Add -FR	\$998 for 48" – 84" and \$1315 for 96" – 132" (Available on standing height tables only)
Polished Chrome Foot Rail:	Add -PCFR	\$1315 for 48" – 84" and \$1838 for 96" – 132" (Available on standing height tables only)
Black Anodized Metal Accents:	Add -MBA	\$129
Power and Data Options:	See pages 31-34	

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 5-6 for surface material options.

- Choose Veneer Species & Finish
- Choose Glass Finish, if glass top option is selected (Satin Glass upcharges apply, see options above)
- Choose Metal Finish, if Foot Rail (-FR or -PCFR) is specified. Choose from Powder Coat or Polished Chrome metal finish options.

General Information:

- Metal accents on table top default to clear anodized aluminum unless black anodized aluminum (-MBA) is specified
- Glass top option is 1/4"-thick, back-painted low-iron glass, located between the metal accents
- Plank veneer is hand selected walnut veneers of varying character and color, with a clear coat finish, to accentuate the plank appearance
- Tables 96"x 30" or smaller in size will ship fully assembled. If the table is over 30" wide, the table will ship knocked down (KD).
- 24"-wide tables not available with table top power options
- Foot Rails on tables 96" and longer will have a center support

Tesano™ Conference Tables

Wood Grain Laminate and Novawrap

TETC-9630-42-V-FR

Options:

Satin Glass:	Add -TSSG	\$267 for 48"x30" – 72"x30" tables \$374 for 72"x36" – 96"x42" tables \$480 for 108"x30" – 120"x42" tables
Foot Rail:	Add -FR	\$998 for 48" – 84" and \$1315 for 96" – 132" (Available on standing height tables only)
Polished Chrome Foot Rail:	Add -PCFR	\$1315 for 48" – 84" and \$1838 for 96" – 132" (Available on standing height tables only)
Black Anodized Metal Accents:	Add -MBA	\$129
Power and Data Options:	See pages 31-34	

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 5-6 for surface material options.

- Choose Laminate, if applicable
- Choose Novawrap Color, if applicable: NW-30 White
- Choose Glass Finish, if Laminate with Inset Glass Top option is selected (Satin Glass upcharges apply, see options above).
If Novawrap with Inset Glass Top option is selected, finish defaults to back-painted white to coordinate with Novawrap.
- Choose Metal Finish, if Foot Rail (-FR or -PCFR) is specified. Choose from Powder Coat or Polished Chrome metal finish options.

General Information:

- Metal accents on table top default to clear anodized aluminum unless black anodized aluminum (-MBA) is specified
- Glass top option is 1/4"-thick, back-painted low-iron glass, located between the metal accents
- Tables 96"x 30" or smaller in size will ship fully assembled. If the table is over 30" wide, the table will ship knocked down (KD).
- 24"-wide tables not available with table top power options
- Foot Rails on tables 96" and longer will have a center support

Options:

Satin Glass:	Add -TSSG	\$267 for 48"x30" – 72"x30" tables \$374 for 72"x36" – 96"x42" tables
Foot Rail:	Add -FR	\$1208 for 48" – 72" and \$1628 for 84" – 108"
Polished Chrome Foot Rail:	Add -PCFR	\$1315 for 48" – 72" and \$1943 for 84" – 108"
Power and Data Options:	See pages 31-34	

REQUIRED INFORMATION: (ORDER CANNOT BE ENTERED WITHOUT THIS INFORMATION)

See pages 5-6 for surface material options.

- Choose Veneer Species & Finish
- Choose Glass Finish, if glass top option is selected (Satin Glass upcharges apply, see options above)
- Choose Metal Finish, if Foot Rail (-FR or -PCFR) is specified. Choose from Powder Coat or Polished Chrome metal finish options.

General Information:

- Glass top option is 1/4"-thick, back-painted low-iron glass
- Plank veneer is hand selected walnut veneers of varying character and color, with a clear coat finish, to accentuate the plank appearance
- Tables ship knocked down (KD)
- Footrails on tables 96" and longer will have a center support
- Monitor area panel size: 27" H x Width of Table
- Monitor and attaching hardware are COM options
- We suggest not exceeding 43" sized monitors as the unit will overhang the tops or sides of the monitor panel
