Gates™ Collection

Gates Collection

With its sleek, contemporary design, the Gates collection offers a wide variety of furnishings for waiting areas and patient rooms. Box-panel stitching and rectilinear arms distinguish the unique styling of Gates seating, which includes bariatric options, recliners, patient seating, and sleepers.

Gates seating and tandem seating is made from locking mortise-and-tenon construction. Products with interior frames utilize sealed plywood made from hardwoods. The antimicrobial finish inhibits growth of bacteria while the lacquer provides a strong defense against the harshness of cleaning solutions.

Gates seating pairs well with casegoods and sleepers from other collections, such as Conover.

Occasional tables complement the portfolio to offer endless options and a cohesive look throughout your facility.

Contemporary styling

Gates collection guest and tandem seating solutions accommodate up to five people. Tandem seating is offered with or without a center arm. Hip chairs and stools are positioned at the proper seat height to facilitate ingress and egress for orthopedic patients. Two bariatric seating options—armchair and loveseat—are available for patients who need extra room, or to accommodate loved ones.

Seating for every patient

A wide variety of patient seating—including medium and high-back or stationary and flex-back models—offer variety and choice for your organization's needs.

Variety and choice

The Gates collection features a comprehensive suite of recliners and sleepers for the patient room. Choose from sleep, Trendelenburg, and three-position recliners.

A pull-out sleeper easily accommodates family members who need to stay overnight. The compact sleeper bench is designed for smaller spaces.

Features

Seating:

- Hard maple with locking mortise-and-tenon construction
- Armcaps available in wood, Thermofoil, or Kydex
- Multi-density, Cal 117-2013 compliant urethane foam seats
