TECHNICAL SPECIFICATIONS

Cabinet Construction

Cabinets are constructed with $\frac{3}{4}$ " thick composite panels consisting of industrial grade particleboard cores with high pressure laminate on the faces and PVC or ABF banding on the edges. Cabinets are fully assembled and glued and doweled together. Plinth bases are supported by adjustable glides at the four corners. Units are also available with steel legs with adjustable glides.

Top Constructions

Tops are made from 1" thick panels consisting of industrial grade particleboard cores with high pressure laminate on the face and PVC or ABF banding on the edges. Solid surface tops are fabricated from seamless homogeneous acrylic resin sheet materials. The solid surface is backed, bonded and sealed to form a finished top thickness of one inch. Tops feature a field renewable smooth finish that resists fungal and bacterial growth and will withstand heat up to 160 degrees F and is chemical and stain resistant.

Drawer Construction

Drawers are made from four $\frac{3}{4}$ " thick composite panels with thermally fused melamine faces and PVC or ABF banding on the edges. Drawer bottoms are captured by a groove in the drawer sides, glued and stapled in to the groove and constructed of $\frac{1}{4}$ " thick medium density fiberboard laminated with thermally fused melamine sheets.

Drawer and Door Fronts

Drawer fronts are constructed with $\frac{3}{4}$ " thick composite panels consisting of industrial grade particleboard cores with high pressure laminate on the front and back with 3 mm thick PVC or ABF banding on the edges.

Shelves

Shelves are $\frac{3}{4}$ " thick composite panels consisting of industrial grade particleboard core with thermally fused melamine on the surfaces and PVC or ABS banding on the edges.

Drawer Slides

Drawer slides are rated 120 lb each set ball bearing extension slides. Drawers are easily removable by releasing the drawer slide lock when the drawer is in the fully extended position.

Door Hinges

Door hinges are concealed and provide 165 degrees of motion.

Keying Options

All locks and keys are double bit locks. Locks can be keyed alike with other Dante casegoods. Specify the room number on the order.
