

OathTM Task Chair

a simple balance of versatility and comfort

Easy adjustments
optimize ergonomic comfort

Lumbar Support

Built-in lumbar support automatically adjusts to the user for comfort.

Seat Height

To lower, lift the lever while seated – to raise, lift the lever with your weight off the seat. Proper seat height allows your feet to be firmly supported by the floor – hips will be parallel to or slightly above your knees.

Back Tension

Weight-activated motion is designed to adjust the recline tension as you move – when you recline, the seat lifts your weight and provides the correct amount of tension.

Arm Height

Push button (located inside arm support) to raise and lower the height of the armrests to support forearms and keep shoulders relaxed.

Back Position

Push the lever back to unlock the back tilt position and move freely. Push the lever forward to lock the back in one of four upright positions.
