RENLITA
Custom Opening Solutions

*Shed Some Light With a Renlita
System.*

The Renlita Sovereign, a contemporary sectional door, window or wall system that opens effortlessly with vertical folding panels. This system is constructed from all aluminum and is suitable for commercial, retail, and residential applications. Leaving no ceiling tracks, the Sovereign creates a superior environment and an efficient space management solution.

Renlita provides a turnkey solution including specified finish, glass or cladding, and installation. This system is the ultimate in style and strength.

SOVEREIGN

MADE IN THE USA

FEATURES

The Sovereign system offers visibility and security with a vertically operating system without overhead ceiling tracks. The Sovereign System is suitable for commercial, retail, and residential applications including sports facilities, restaurants, patios, bars and countertops, as well as residential applications. The versatility of the Sovereign allows customers the ability to accommodate individual design needs.

From concept to completion, Renlita provides turnkey service that includes specified finish, glass or cladding, installation, and service. Renlita's single source service provides customers with the confidence that all aspects of the project are properly coordinated and designed while providing a single warranty for entire system.
