1. The minimum pre-consumer, post-consumer, and total recycled content across all product recipes is listed.
 2. 91% of raw materials sources from tier 1 suppliers within a 500-mile radius of the Interface manufacturing facility.
 3. Product carbon footprint is based on a product recipe calculated using the sales-weighted average for yarn weight. Scope is cradle-to-gate.
 4. Made carbon neutral using retired carbon offsets, BV North America conducted an independent audit of the GHG Protocol Product Standard Report. The scope is raw material extraction to disposal.
 5. Percentage indicates internal recyclability. Product may be 100% recycled at end-of-life in certain infrastructures.
 6. All reductions benchmarked to production.
 7. Scope 1 and 2 emissions only. Carbon emissions reductions and total metric tons of CO₂eq calculated using a market based approach and financial instruments.
 8. Includes on-site solar PV generation, on-site landfill gas, purchase of RECs, and purchase of directed biogas.
 9. Includes both hazardous and non-hazardous material streams.
