

ELLIPSIS

# Craft in a Modern Mode.

ELLIPSIS | BY BRIAN GRAHAM

Crafted of solid wood and shaped with a waterfall edge, Ellipsis tables work as a stand-alone piece or as a complement to FrameWork or other Decca furniture. Ellipsis serves as a desk, a conference table or dining/café table, drawing upon simple, familiar forms and projecting an image of quality in every detail.

## ELLIPSIS

A singular expression of fine wood workmanship, Ellipsis celebrates the craft of Decca's manufacturing capabilities applied to traditional materials.

- Available in solid Ash, Oak and Walnut.
- Select from 14 finishes that range from light warm tones to deep ebony hues.
- Rounded legs support round, square + rectangular tops, each with a sculpted edge that allows for a continuous grain appearance.

#### ABOUT BRIAN GRAHAM

Based in San Francisco, Brian Graham is a designer, advisor and advocate with deep roots in architecture and design. He is widely respected for his work with some of the best brands in the furniture industry. Graham is deeply committed to creating classic, sustainable design to enhance the ever-evolving workplace, helping to shape new and more creative ways of living and working.
