

X Series®

Personal Storage Tower

Like all elements of X Series storage, the Personal Storage Tower is convenient, secure, and versatile to help people perform more effectively and feel in control of their workspace. The tower consolidates storage into a single multifunctional unit that takes advantage of vertical space while holding a variety of work and personal items. It complements compact workstations and integrates seamlessly with any X Series product, from open plans to executive offices.

HAWORTH®

A Versatile Solution for Efficient Workstations

Space-saving X Series Personal Storage Towers perform multiple storage functions as they optimize real estate and create workstation boundaries. By keeping important files, books, and supplies—as well as coats and bags—at hand and in one place, Personal Storage Towers make it easy to stay organized and keep projects flowing productively.

Features

With configuration options including a pedestal, valet, and upper storage (hinged-door or bookcase with shelves), the Personal Storage Tower helps minimize workstation footprints. Tower depth matches worksurface depth for a refined, finished look. Choose from a variety of configurations, heights, and widths to suit your workstyle and design requirements. You can rely on the superior ease of use, durability, strength, and security features of X Series—all backed by a lifetime warranty.

Pedestal drawer arrangements – Meet personal needs with box/file, box/box/file, file/file, box/box/file/file, or file/file/file configuration.

Full-extension steel ball-bearing drawer slides – Enable complete drawer access and smooth operation.

Double-walled pedestal drawer fronts – Keep small items from getting lost in cracks.

Side-facing bookcase – Position on the right or left side of the tower to face inside the workstation for easy access and discreet storage; one or more adjustable shelves included.

Hinged doors on the cabinet and valet – Open 100 degrees and available with or without a touch latch; cabinet has a removable shelf; valet has a coat rod or hook.

Lockable doors and drawers – Choose standard locking features or individual drawer locking options.

Frame inserts in the tower back – Promote durability and prevent racking.

Wear-resistant finish and rust inhibitor – Keep components in good condition over the long term.

One-piece formed-steel case – Create a clean and finished look with no overlapping seams.

Colors, Materials, Finishes

By sharing a generous collection of finishes, materials, and pull styles, X Series Personal Storage Towers coordinate with other X Series components for a unified look throughout an environment. Tower top options include steel, laminate, and translucent. Doors, drawer fronts, and lockbar can be steel, wood, or laminate.
