Sit-Stand Panel Desks

adapt/ə'dapt/
Make (something) suitable for a new use or purpose; modify.

We are all unique...

Your company is unique, with its own set of goals and challenges, made up of employees with their own individual needs. Whether a job involves deep concentration, working remotely, hot-desking, shift working, agile working or collaborating with other teams, a well-designed workspace can play a vital role in helping businesses achieve their goals.

Adapt provides companies all over the world with ergonomic office furniture solutions designed to help increase employee well-being and productivity. If you're looking for high quality desking solutions to meet the current and future needs of your business then please get in touch.

A better way to work...

Here at Adapt we're passionate about creating workspaces that work. All of our office furniture and equipment has been ergonomically designed to help employees perform their activities more efficiently and comfortably.

Our products are built to stand the test of time and undergo rigorous testing to ensure they meet stringent quality standards. That's why, as a customer, you'll enjoy a lifetime guarantee on all Adapt manufactured office furniture and accessories.

Reduce noise, improve focus...

Common challenges of working in an open plan office include background noise and interruptions, which are often cited as two of the top workplace distractions.

Adapt's sit-stand panel desks help overcome these challenges. Designed to reduce background noise and visual distractions, they allow employees to concentrate and focus on the task at hand, improving their overall productivity.

#1

Noise ranks as the #1 office distraction

(Report published by Oxford Economics, 2016)

75%

of workers say they are more productive when workplace distractions are reduced.

(Research published by Udemy, 2018)

70%

of employees feel distracted while at work.

(Survey by Udemy)

All workspaces are not created equally...

The environment in which we work has a critical impact on our well-being, productivity and overall performance. A well-designed ergonomic workspace is vital for helping employees:

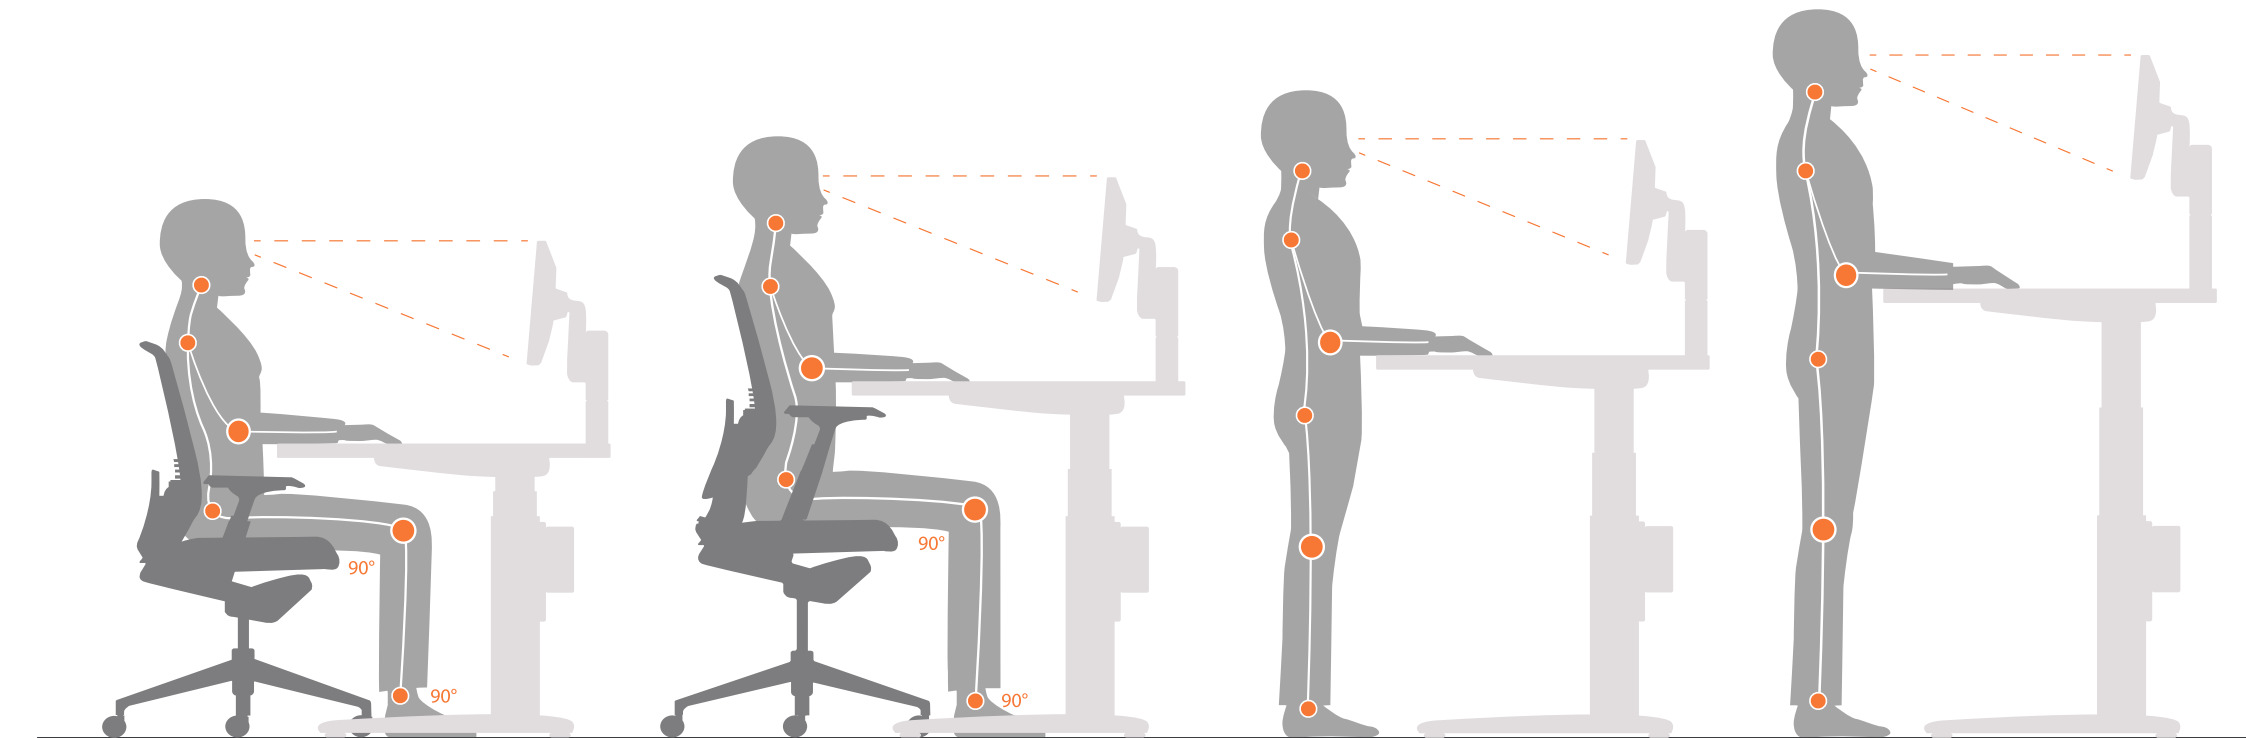

- Concentrate better on tasks and increase performance
- Maintain good health by remaining physically active throughout the day
- Remain alert, especially if they are based at their desk for long periods of time
- Make the most of the ever-changing technology available to them
- Meet the demands of flexible working patterns

Adapt's sit-stand panel desks will help you make the most of your workspace now and in the future. The flexible design means that we can offer a tailored solution to suit the needs of your business and working environment.

A healthier, happier workforce...

Studies have shown that sitting for prolonged periods of time can increase the risk of heart disease, type 2 diabetes, obesity, high blood pressure and some types of cancer. Used properly, sit-stand desks have a number of health benefits that help combat a sedentary lifestyle, including:

- Better focus and concentration
- Increased alertness
- Improved blood circulation
- Flexibility to adjust your working position to suit each task
- Relief from aching muscles caused by static posture
- Burning more calories

50%

of workers say they have suffered from back pain caused by sitting for too long.

(source: research commissioned by Solgar UK)

91%

of workers at companies that support **well-being** efforts say they feel **motivated** to do their **best**.

(source: American Psychological Association)

46%

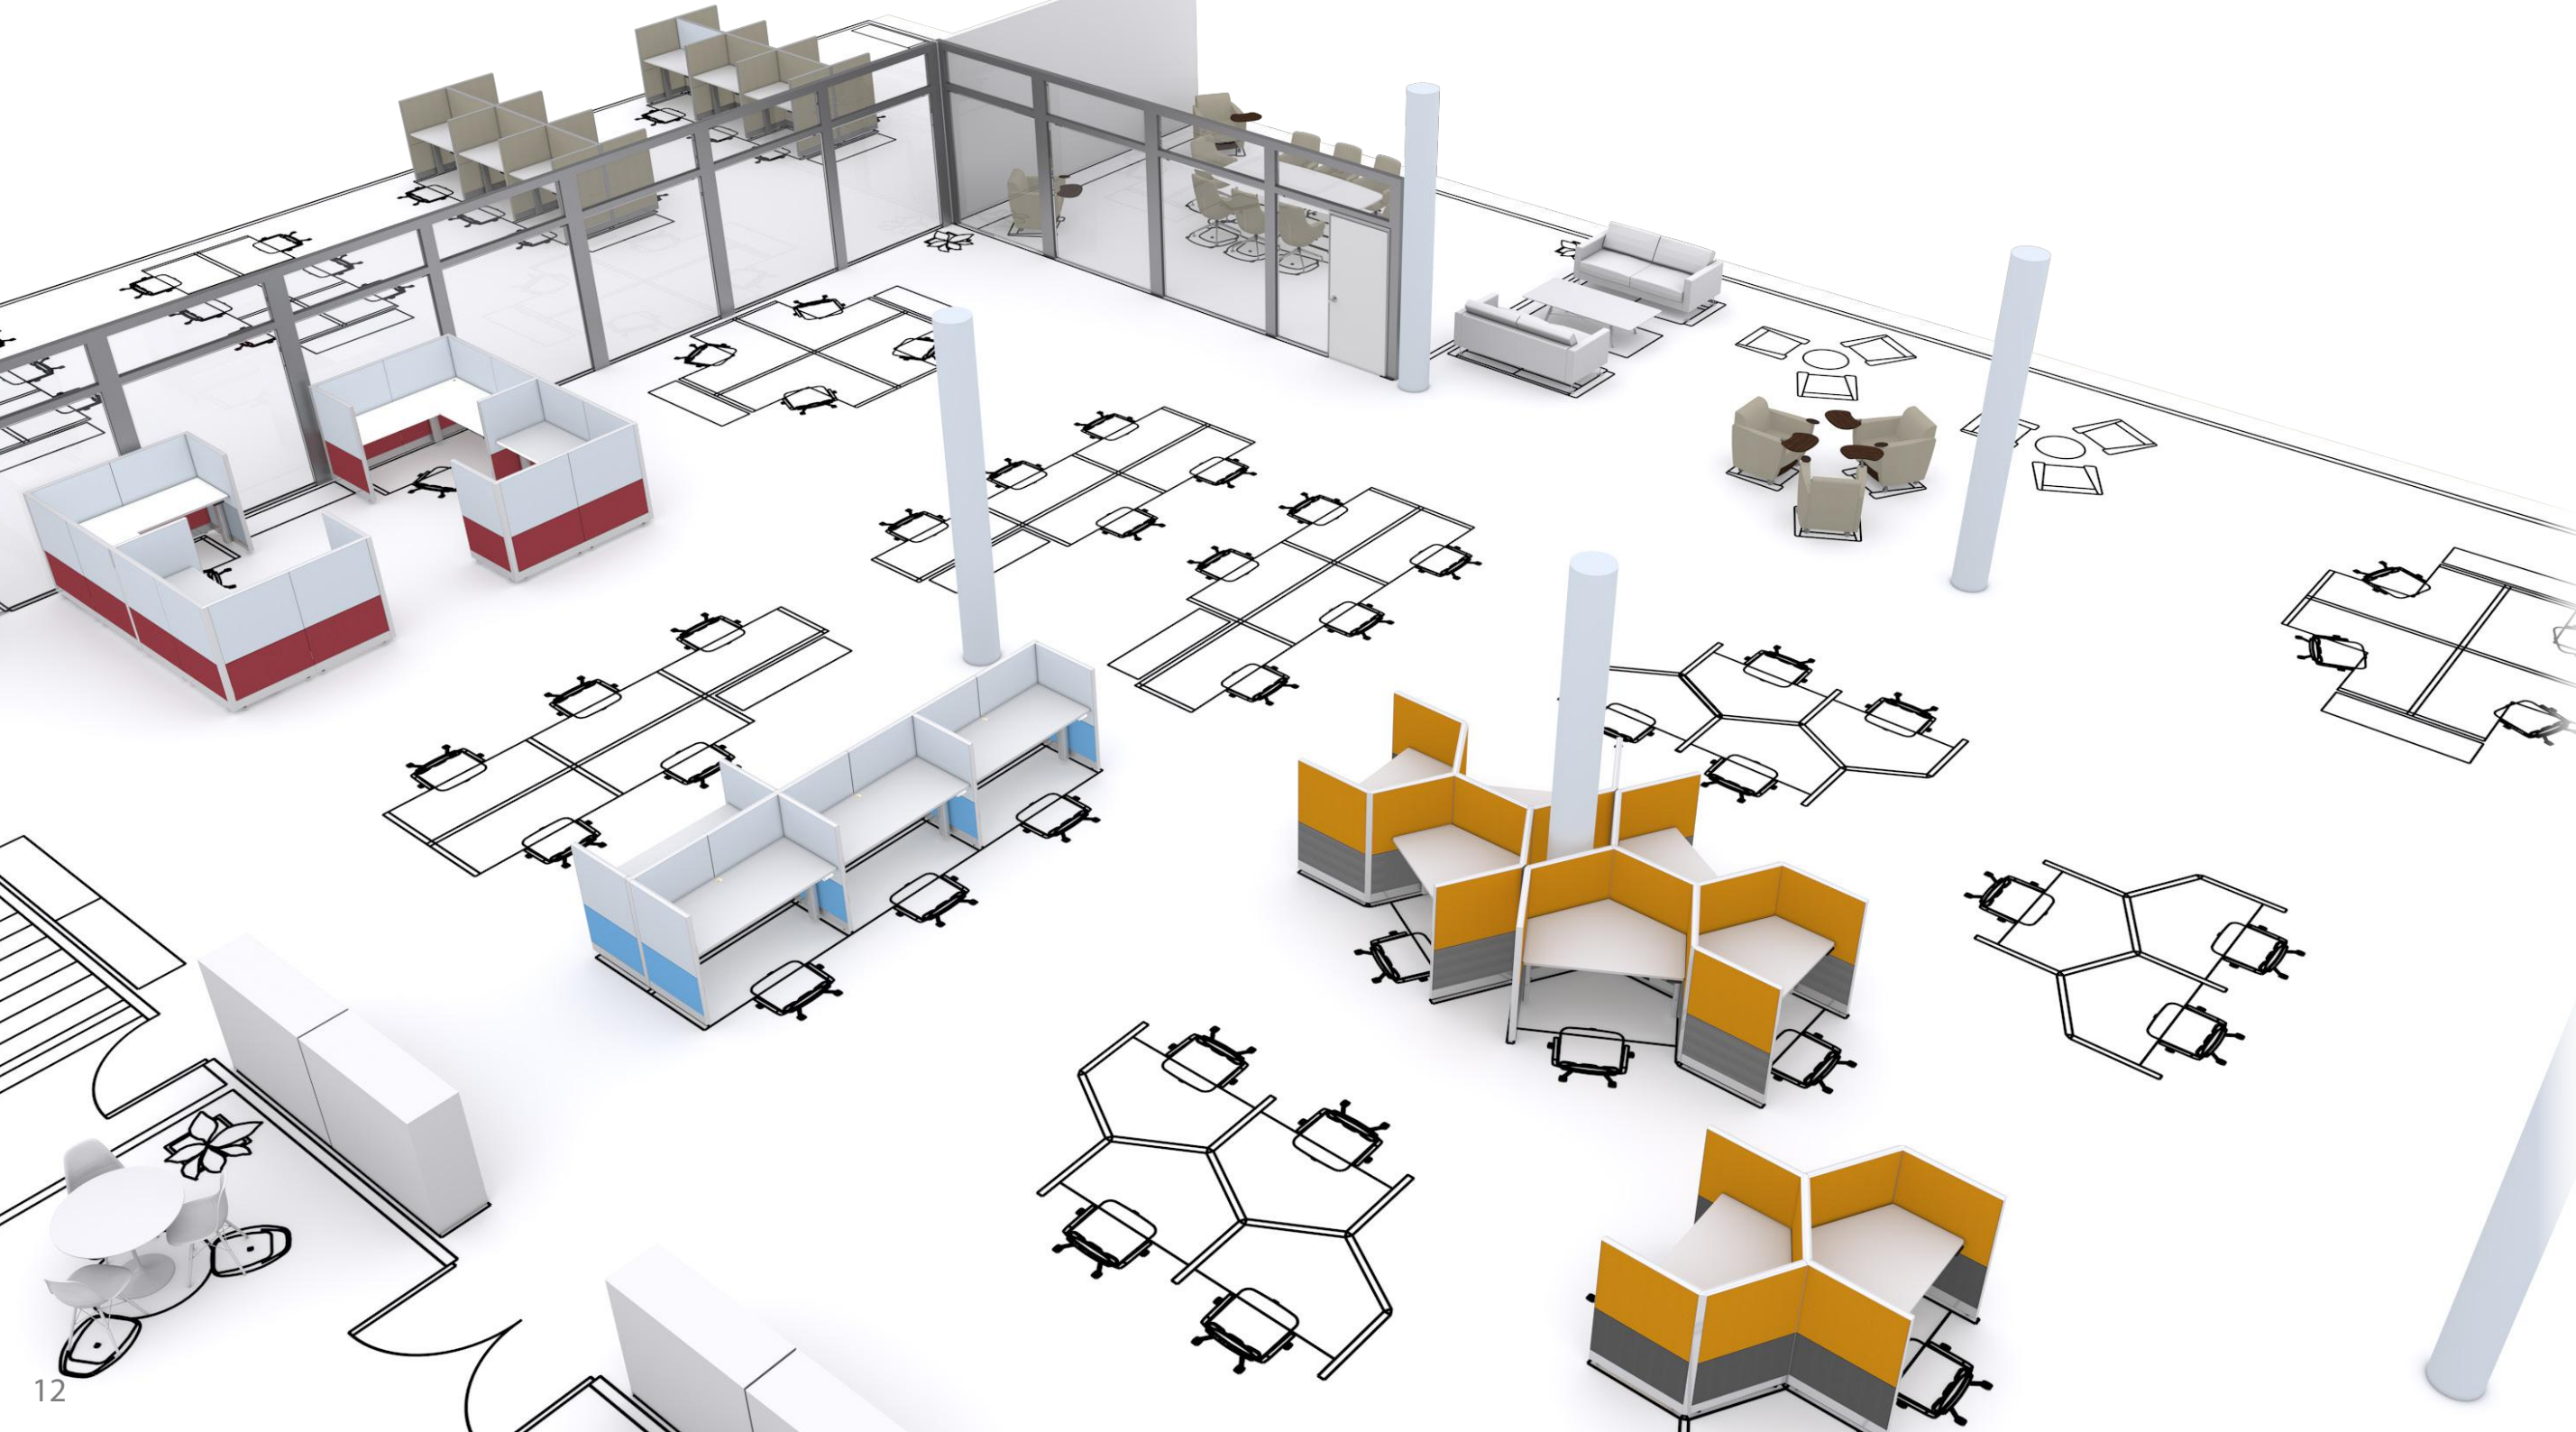

is the **increase in productivity** when using sit-stand desks compared with traditional sitting desks.

(source: Texas A & M Health Science Center School of Public Health)

70%

of offices are predicted to be **agile workplaces** by 2020. Workstations must be adaptable to suit multiple users.

(source: research by Mitie)

Endless possibilities...

Space availability, future planning and interior design are all key considerations when choosing the right desking solution for your business. Adapt offers customised options to create a workspace environment that meets your needs, both functionally and visually.

All of our panel desks are perfect for open plan offices and offer the following benefits:

- Visual privacy, ideal for duties that involve handling sensitive information
- Reduced background noise, helping to improve focus and concentration
- Built in cable management, reducing the risk of tripping over loose wires
- Modular design, allowing you to add more workstations cost-effectively as your business grows
- Easy-to-swap panels which can be changed to reflect your office interior
- Inbuilt memory function records the height settings for up to three people, ideal for environments used for desk sharing or agile working
- You can mix and match from an extensive range of panel colours and workstation finishes

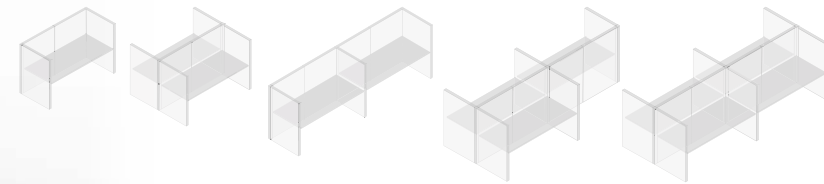

Straight Sit-Stand Panel

Is it right for my business?

This best-selling sit-stand desk is ideal for a wide range of office environments and is large enough to accommodate multiple screens.

Configurations

Corner Sit-Stand Panel

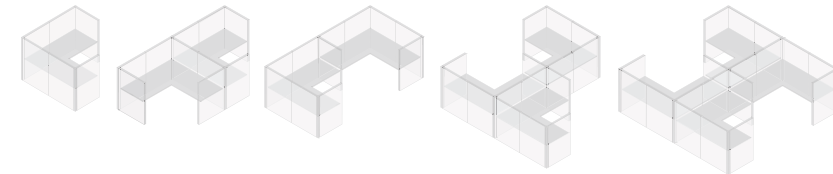

Is it right for my business?

The corner panel desk is a spacious, sit-stand desk, offering high levels of visual privacy, making it an ideal option for employees who work using multiple screens.

The L shape of the desk allows workers to position potential distractions such as mobile phones outside their field of vision, helping to further improve their focus and concentration levels. Workers also have the option to divide their desk into working zones between computer based, paper-based and telephone activities.

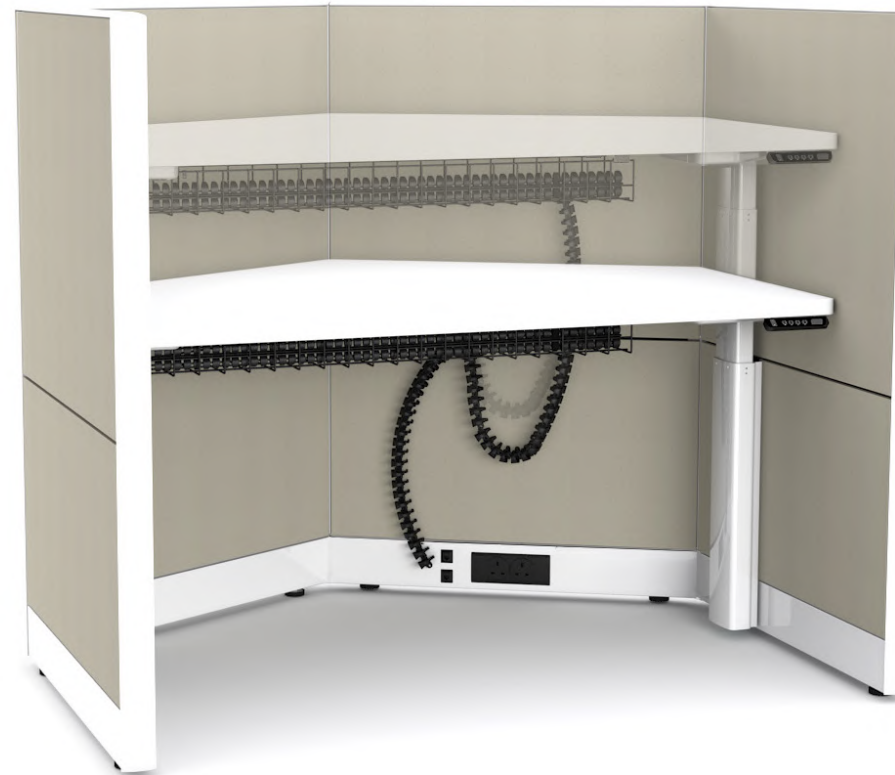

Configurations

Please note: All corner panel desks are supplied to meet with country-specific compliance rules and regulations.

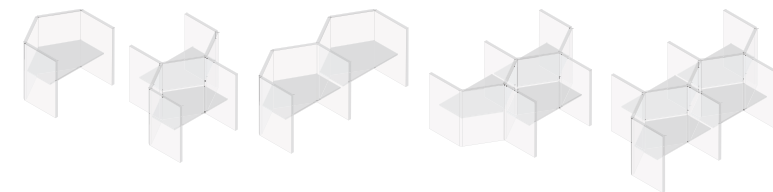

120° Sit-Stand Panel

Is it right for my business?

These sit-stand workstations are compact in design while still offering protection against office distractions. This makes them a popular choice for busy environments such as call centres and offices where space is at a premium.

Configurations

1230 Sit-Stand Panel

Is it right for my business?

A more compact version of the straight panel desk, this sit-stand option is ideal where space is at a premium but visual and acoustic privacy is still a must.

Configurations

Superior Panels

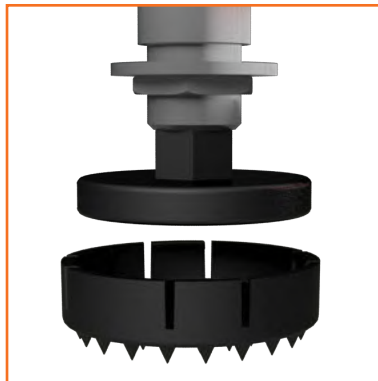

Corner posts

- Interchangeable and can easily be removed to allow the panel system to be extended.
- Raised so cables can be fitted into the base of the panel, minimising exposed wiring.
- Can be ordered with an extension post for ceiling drop down cabling, keeping wires covered and work spaces clean and tidy.

Panel clips

- Holds panels firmly into place with no rattle or movement.
- Easily unclipped from the aluminium frame for the changing of damaged or dirty panels.
- Makes panels interchangeable, should you wish to change the colour.

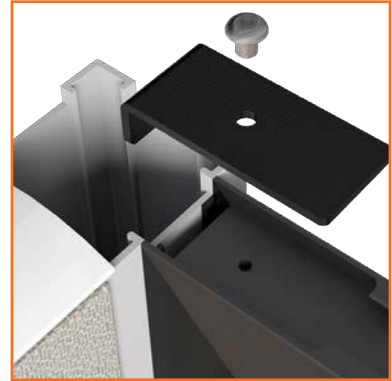

Feet

- Designed to be rigid on hard surfaces, ensuring stability.
- Can be adjusted up to 25mm to ensure the desk surface remains level, even in environments where flooring is uneven.
- Plastic spiked cap can be easily fitted on the original foot, giving a firm grip on carpets and softer surfaces.

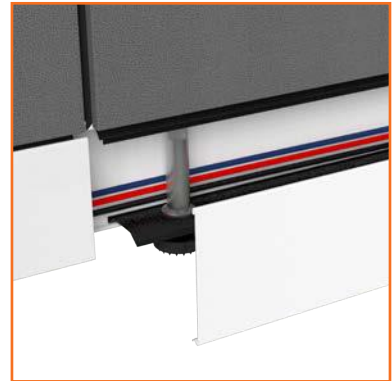

Post bracket

- Firmly pulls the panel frame and posts together eliminating rattle or movement.
- A single screw holds the frame and post together for quicker installation or extension to the panel system.
- Low profile design means all screws and brackets fit easily under the panel frame, giving a smooth finish to each panel.

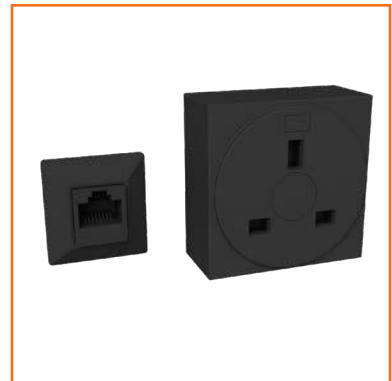

Cable management

- The cable channel in the base of each panel allows for the safe trunking of wires.
- Cable channel covers run the length of the desk and can be accessed from both sides.
- Desks are kept tidy and free from wire hazards.

Power and data

- Reduces on extension leads and trip hazards.
- Power can be trunked directly up to the work surface.
- RJ45 or CAT5E data cabling allows easy connection of your PC or laptop to your network.
- Can be interlinked with other desks using fewer office plug outlets.

A leg system built to last

We believe that every solution can be improved upon and refined, so we took the very best height adjustable leg technology available today and re-engineered it from the bottom up.

Adapt's panel desks are unique in that the leg mechanisms mount directly to the panel frame; achieving great strength with no compromise to stability or personal leg room.

Every component of our height adjustable leg system is manufactured to our own exacting designs and specifications from premium materials (we're proud to offer a Lifetime Warranty.*)

We've invested time perfecting the design so that you can enjoy the benefits:

- Curved forms and tight tolerances help achieve strong and stable legs
- Engineering excellence produces smooth and quiet motion
- Aluminium construction reduces weight and improves recyclability
- Modular construction offers ultimate reconfigurability and ease of maintenance

More space

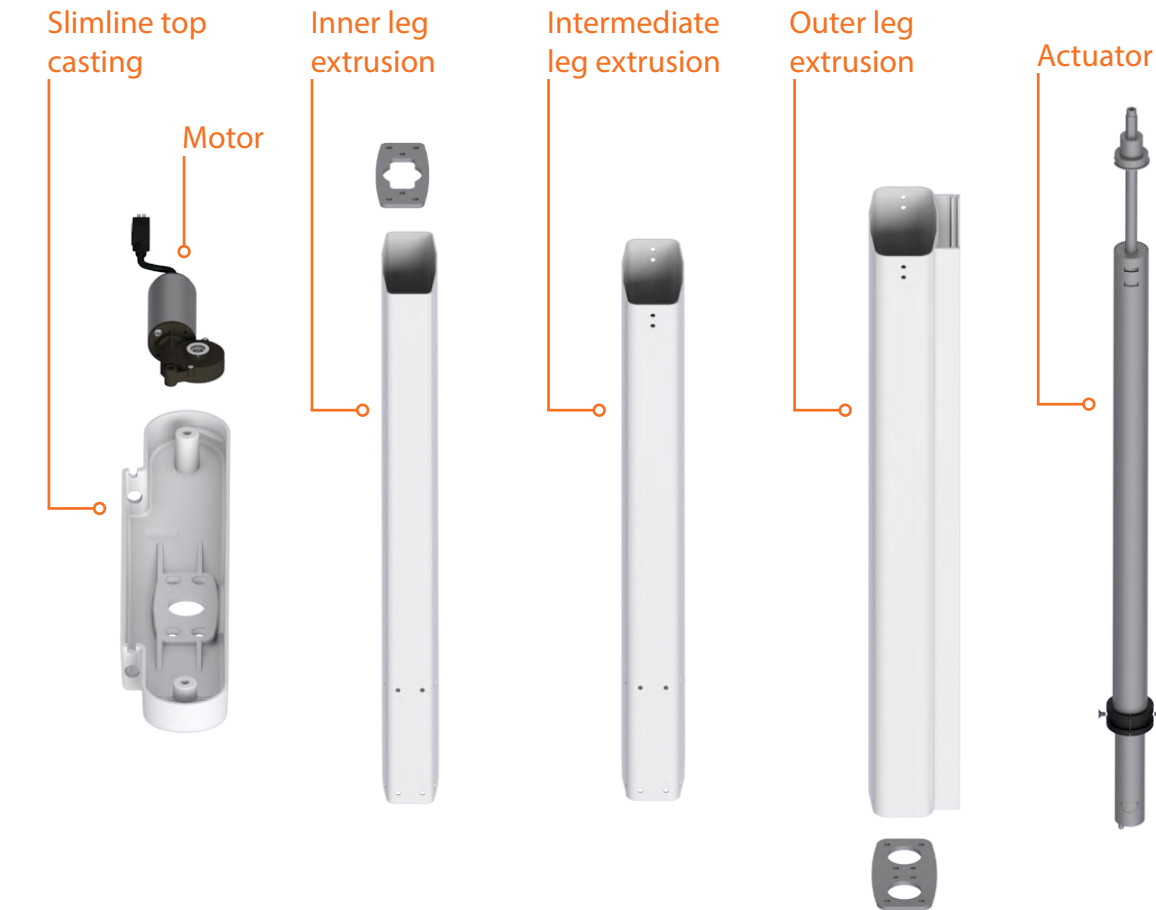

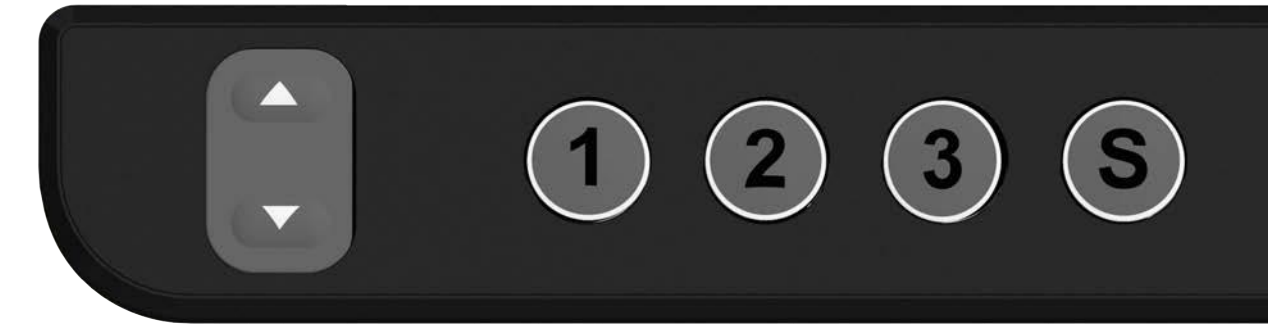

Cast aluminium top support castings have a compact form, free up space under the work surface and offer maximum strength and support.

Uniquely, the top support castings house our powerful leg motors and gears for smooth, direct power delivery, simple installation and ease of maintenance.

*Terms and Conditions apply

Easy to adjust

The hand controller allows you to store height positions for sitting and standing for up to three people. Simply hold the pre-set button to adjust to your desired height or use the arrow buttons to alter the position.

Strong and sturdy

Three part extruded aluminium leg shells, with plastic glides, provide the ultimate smooth, silent, strong and lightweight construction.

Quality every time

The Adapt panel system is based around an extruded aluminium frame. Our advanced manufacturing process means the frames are very strong, lightweight and completely recyclable.

More floor space

Unlike any other product in the market, our height adjustable legs hang from the central rail of the frame. This creates a rigid structure and increases floor space.

Stylish and durable

Our panels are completed by curved, extruded aluminium panel trim and steel kick plates. These are both durable and functional, hiding power and data cables, whilst providing quick and easy access.

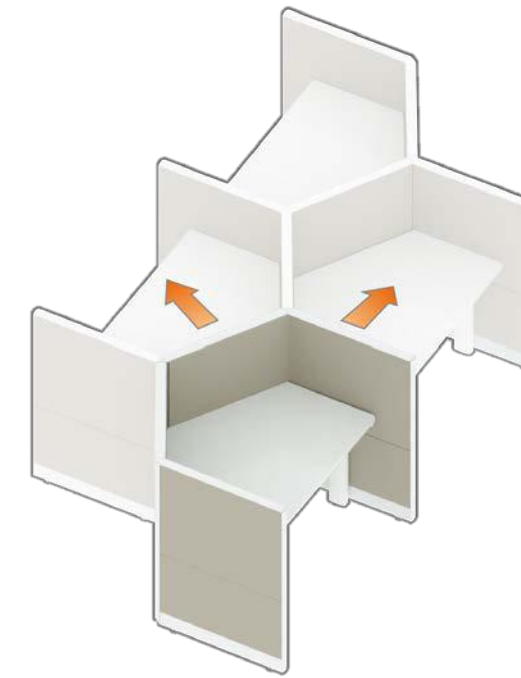

Environmentally friendly

The polyester we use is Class A fire retardant and manufactured from 80% recycled fibres. It's produced using a simple process of heat and pressure to create a stiff and durable end product.

Four choices of width and colour

Our panels are clad in 9mm thick, sound absorbing polyester board, covered with a coloured fabric of your choice to complement the look and feel of your individual office space. Choose from a wide range of frame sizes to suit a multitude of configurations.

- 700mm
 - 800mm
 - 900mm
 - 1230mm
- All panels are 1270mm in height

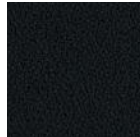

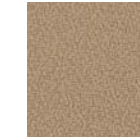

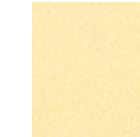

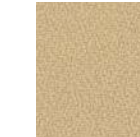

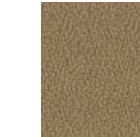

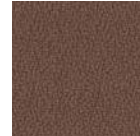

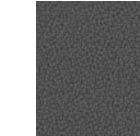

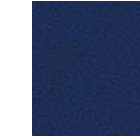

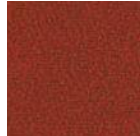

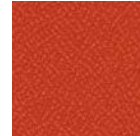

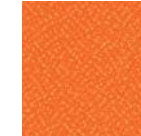

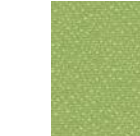

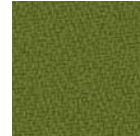

A future-proof solution

When you're designing your office interior, it's vital to choose a solution that can grow and adapt to reflect the needs of your business. The corner posts of our panel desks allow a wide range of configuration possibilities to meet your current and future needs. They are available in two versions, triangular (equilateral) or square – and three different configurations – 2-way, 3-way or 4-way, allowing up to four separate panels to be joined together.
