

LED CYLINDER COLLECTION

Whether you want to make a unique statement or add an elegant touch, the Williams LED Cylinder collection lets you decide how the light shines.

Designed for architectural interiors such as museums, lobbies, churches, and universities, the LED cylinders provide versatile down or up/down illumination.

For even greater impact and light output, LED Cylinders have the unmatched ability to hub mount groups of fixtures together. With a variety of sizes, colors, and options, the look and feel you can achieve with our cylinder collection is limitless.

3-Cylinder Helical

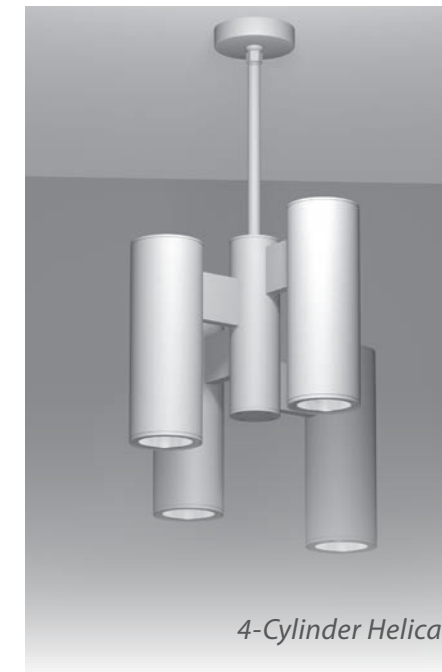

Hub mount accessories are available to create cylinder groupings. Five configurations plus center mount option can be used with multiple fixture sizes and options to create a one-of-a-kind custom light.

Designed for high ceiling applications, multiple cylinder combinations deliver increased lumen output.

Additional hub configurations are available by request.
