4-Flathead Phillips #10-2 3/8" Wood Screw 4- Panhead Phillips #8 X 5/8" Wood Screws 2-Cable ties.

1— Power Supply Bracket

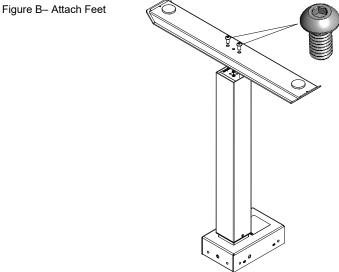

# Figure A Assembled Product Column Foot

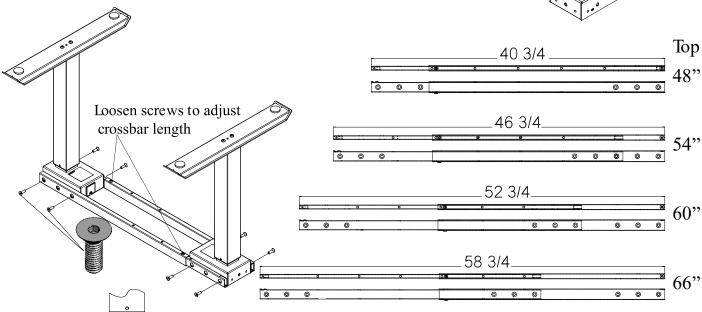

### Installation

Figure C- Attach Cossbar

- Assemble Feet to the Columns using supplied Socket Round 5/16-18 X <u>5/8"</u> screws. Tighten Screws Firmly. See Figure B. <u>IMPORTANT</u>: Make sure the correct screws are used. Using longer screws may destroy the internal parts of the column.
- Loosen the set screw and set the Crossbar length based on top size as seen in Figure C below. Attach the crossbars on the long side of the bases using supplied Socket Flat Head 5/16-18 X 1" screws. See Figure C.

<u>IMPORTANT</u>: Make sure the correct screws are used. Using longer screws may destroy the internal parts of the column.

Do not use middle hole of cross bar

Proper product installation, in accordance with these instructions, is the responsibility of the installing agent. If you have any questions concerning these instructions, please call Kimball Customer Care.

# XSEDE® Height Adjust

# **Base-Only Assembly**

### Installation Continued

- Attach sidebars to crossbars with Phillips Flathead 1/4-20" X 5/8" screws. See Figure D
- 4. Place adhesive bumpers on the crossbars. The bumpers should be places as close to the fixing screws as possible. The bumpers come in two thicknesses. The thicker, square ones are used on the inner tube. See Figure E.
- Slide Power Supply Bracket over crossbar as shown in Figure F.
- 6. Attach Base to a worksurface using supplied Panhead #8X3/4" and flathead #10X2-3/8" wood screws. Route handset Cable between the Crossbar and the surface prior to attaching. The shorter screws goes in the sidebars. The longer screws go into the crossbars. See Figure G. IMPORTANT: supplied screws are designed to work with a worksurface with a minimum thickness of 3/4"
