Sophisticated Tables for Conferencing, Meeting and Training

In today's modern office, flexibility is key. Spaces must support a variety of collaborative and individual work, all while staying connected to technology.

Propeller® offers a multi-purpose portfolio of training and conference tables for the evolving office landscape. Characterized by intelligent design, a sophisticated aesthetic and ease of reconfiguration, Propeller is the solution to the multi-tasking workplace.

Emanuela Frattini Magnusson is a Milan-born architect and designer based in New York. Her work spans architecture, interiors, and product design.

Allows for diverse applications across the classroom or workplace

- + Privacy and modesty screens attach easily to the worksurface without tools.
- + Tables gang together with a simple click-to-lock release mechanism.
- + Standing height tables are also easy to configure and reconfigure.

Refined, Modular Design

Propeller Conferencing is designed for beauty and performance throughout the workplace. With a modular design that's offered in a variety of bases, it accommodates a group as small as four to a large boardroom. Paired with a multitude of storage solutions, Propeller Conferencing adds grace and sophistication to the modern office.

Advanced solutions for wire management

- + With enhanced space in the base for vertical wire management and the ability to conceal floor monuments, Peanut and Drum are ideal solutions. Panels on the base can be easily removed without tools for easy access.
- + Large conference tables, top right, incorporate a structural frame which also serves as a horizontal wire management channel.
- + The modular raceway kit, shown above right with a wire management basket, offers a hard-wired electrical connection for Propeller training table applications.
