

Plexus

busk + hertzog

Plexus

busk + hertzog

PLEXUS dares to push the boundaries of design and engineering. The elegant wood base design is the key design element of this table. It features beautiful detailing of carefully crafted finger joints with a refined curve inset along the exterior of the leg. It has a shape that is both evocative and contemporary and features a wide range of options and finishes with impeccable details that reveal the highest manufacturing capabilities. With two base sizes Plexus is ideal for executive boardrooms, conference rooms and small meetings rooms. The wood base allows for power and data connections via a discrete conduit to the floor. Exquisite in detail and minimalistic in design it even lends itself for applications in private offices; a truly versatile table that blurs the line between commercial and residential design.
