# VOX GLASS TOP CONFERENCE TABLE OPTIONS

Laminated glass tops are 1/2" thick with a solid opaque white inter-layer. Glass types include regular float glass or low-iron (true clear) glass in either satin or polished finishes.

Low iron glass allows the opaque interlayer to maintain its true hue.

Standard sizes range from 36" to 54" wide and 72" to 168" long.

For each table shape there are three different base design options that offer both aesthetic and functional benefits.

Power, data and AV connections are fully integrated in the glass top and are available in a large number of standard or personalized Vox Forum options.

Taper Base – The very thin profile of the Taper base design is ideal for reducing obstruction under a table. Available in polished aluminum or silver metallic paint.

T-Base – The vertical section of this base integrates a wire management channel that can accommodate excess cable and allow the routing of cable to and from the floor. The entire base is available in 5 standard anodized colours.

Duo Base – The design of the Duo base provides the greatest capacity for storing cabling inside the curved leg panels. Base panels are available in a variety of laminates and veneers while vertical aluminum legs are available in 5 standard anodized colours

The manufacturer shall not be liable for defect wholly attributable to normal manufacturing process. Replacement or repair of the Product shall be the sole remedy of the Customer, and the manufacturer shall not be liable for any direct, indirect, incidental, or consequential loss or damage suffered by the Customer by reason of any defect in workmanship or manufacture of the Product or inability to use the Product. Moreover, this warranty does not cover accidental damage, abuse, alteration, ordinary wear and tear of Goods, negligence and misuse nor variations over which we have no control such as heat or humidity or damage to which the Goods are connected that is not attributable to the failure of the goods themselves. This warranty is null and void when the product is installed with hardware other than that supplied and/or when installed differently than recommended in the installation guide. Modification to the product or hardware may result in failure of the product and cause damage and/or injury.

## WOOD FINISHES

Nienkämper offers a wide variety of standard light finishes on cherry, mahogany and figured anigre wood veneers, and a clear natural finish on figured anigre, figured sycamore, maple, bird's eye maple and curly maple.

Light finishes do not mask the grain and other characteristics of each wood species. It is important to understand that pieces of the same type of wood will not look identical when a light finish is used. The appearance of the finish will also depend on the natural color of the veneer. Cherry darkens over time as the wood ages. Pin knots and gum pockets are inherent traits.

Wood is a naturally variable raw material; its variances are not within the furniture manufacturer's control and are therefore not considered defects under this warranty.
