ALIGN
Nienkamper

ALIGN follows your movement and promotes a healthy sitting position. Especially developed for people who work at height-adjustable desks, the seat can be adjusted between low and high working positions, enabling you to be more dynamic in your movements while still balanced. Its curved foot makes sure you get lots of healthy movement while sitting. This is also reflected in the design, which is clear and minimalistic while providing pleasurable haptics and a dynamic appearance. The triangular seat is extremely comfortable at your normal seating height; at your standing height, it offers a good hold without being confining. The Align stool supports and facilitates change of posture to accommodate task and a more natural back posture.
