HUMAN-CENTRIC LIGHTING

DIM TO WARM

Create a comfortable, welcoming ambience with the familiar glow of incandescents using warm dimming LEDs to provide intimate lighting in restaurants, hotels, and high-end residences.

TUNABLE WHITE

Support human-centric design through adaptive, individualized lighting using tunable white light to promote wellness in healthcare facilities, enhance concentration in classrooms, and improve productivity in workspaces..

CONNECTED LIGHTING

POWERED BY PLATFORMATICS

Empower your properties to function at a higher level by incorporating PoE lighting technology.

Maximize employee comfort and productivity with smart sensors and environmental monitoring.

Accurately assess and manage each location by aggregating your properties' utilization data.

Merge lighting information and business transactions to optimize lighting and space conditioning to maximize sales.

Use networked lighting to automate separate IP systems into one easily controlled solution.

Maximize building efficiencies with simple-to-integrate sensors and PoE technology.
