FLEXCO®
AMERICAN-MADE FLOORING

hen you partner with FLEXCO®, you're working with a proven resilient flooring manufacturer that has been producing premium American-made flooring products for over 65 years. We source safe and sustainable raw materials and produce the highest quality products to meet your stringent needs.

Coordinated
FLOORING SYSTEMS

Categories
+ MARKETS

With performance-driven flooring products across all product lines, FLEXCO® is taking flooring quality, selection and service to even higher levels. From tile and sheet to treads, wall base and accessories, our products work together in color, performance and style to deliver cohesive design, installation and maintenance.

Rubber Flooring + Vinyl Flooring

Stair Treads

Wall Base + Accessories

FlexOne Pricing

FlexOne pricing from FLEXCO® affords you an easier way to choose product. With our FlexOne pricing structure, you pay the same price for any color within the same color palette in that product line. This allows you to focus on developing floor designs that achieve your desired environment or function without worrying about price differentiation.

Just imagine a confetti of colors for a cafeteria floor or bold lines for wayfinding in a healthcare facility. Create custom flooring designs for hotel ballrooms and conference centers or install a serene expanse of solid color from wall to wall. FlexOne pricing makes it easy for you to achieve all of your design objectives.

Healthcare

Whether it's the rush traffic of a trauma center or the soothing environment of a nursing home, FLEXCO® rubber and vinyl flooring handles the high traffic while delivering styles that contribute to a caring atmosphere. Specialized wall base and slip-resistant treads keep facilities clean and safe for patients and medical staff.

Education

It's a lesson in design, durability and daily resilience. From inspiring learning experiences in today's modern classrooms to taking on class changes in the hallways, FLEXCO® rubber and vinyl flooring adds visual interest while making maintenance a breeze.

Hospitality

Go with a look of stone or wood, or create exciting splashes of color with custom patterns and designs. FLEXCO® products give you complete flexibility to make your flooring an integral part of your atmosphere.

Retail

Advances in today's vinyl materials make products like Natural Elements Premium LVT a natural fit for busy retail environments that want to upgrade their style and performance.

Sports

With FLEXCO®'s sports and multipurpose flooring, style is just one of our strengths. Choose from various recycled rubber products that are ready for a daily workout, while lending unique colors and versatility for weight rooms, tracks, entryways and other applications that need to stand tough.

Coordinating rubber and vinyl stair treads, custom logos and custom colors are available to complement any environment.

Life Cycle
B E N E F I T S

R U B B E R + V I N Y L
F L O O R I N G S Y S T E M S

In highly used, highly abused environments like the healthcare sector, the "cheapest" flooring products can be the most expensive choice over the lifetime of the floor. More expensive floors – like rubber – can actually be the cheapest at a little over half the cost of the next closest option over the lifetime of the floor. Even at five years, payback for some of the more expensive floors had disqualified the cheaper floors. Theoretically, in a large hospital over 15 years' time, millions of dollars could be saved by installing floors that do not require finishing. Rubber seems to be the best product overall. It doesn't move over years, decay or wear like most other products.

FlexTones® COLORS

eaturing 57 colors, FlexTones® coordinate across tile, tread, wall base and accessories for consistent color and flexible design. The raised and textured patterns allow dirt and water to drain off of the walking surface, increasing traction and improving slip resistance. Our low profile versions are ideal for areas with small-wheeled vehicular traffic, such as retail stores, healthcare facilities, airport terminals and more.

FlexTuft® is miles away from ordinary rubber tile. Made from recycled tires, it can withstand repeated water dousing, high traffic, heavy loading and exposure to the elements. With FlexTuft® rubber tile, what's good for the environment is also good for the most challenging indoor and outdoor settings. In fact, this durable, anti-slip flooring meets ADA recommendations for ramps and is ideal for foyers, exercise facilities and stairways.

Repel™

OIL & GREASE RESISTANT RUBBER FLOORING

FLEXCO TOP 5

1. Won't absorb oil or grease
2. PFOA Free
3. Exceeds ADA recommendations for slip resistance
4. Color-coordinates with wall base and tread
5. Formulation inhibits discoloration

Every detail matters.
All layers phthalate-free

Durable ceramic bead top layer for ease of cleaning and disinfection

28-mil commercial wear layer delivers long-lasting resilience

High-definition printed design layer creates natural-looking beauty

Supplemental stabilization layer provides noise reduction

Recyclable core layer adds dimensional stability

Heat-resistant balance sheet prevents cupping and curling

CROSSWIRE™

Woven Vinyl Flooring

FLEXCO TOP 5

1 **The look of carpet with the durability of vinyl**
2 **Triple-Defense waterproof protection for the warranted life of the product**
3 **Easy to clean and disinfect**
4 **Stain- and wear-resistant**
5 **Backed with a 20-year limited commercial warranty**

floor score

TRIPLE-DEFENSE
WEAR LAYER SYSTEM

100% RECYCLABLE

20-Year Commercial Warranty

t's one thing for flooring to look nice on day one, it's another to still look good after years of use. Daily foot traffic, cleaning and disinfecting and regular wear and tear inflict serious abuse. In heavy-use commercial environments, you need a solution that lasts.

Built to last.

Woven fabric layer brings depth and texture

Core layer mitigates noise and absorbs heavy loads

Design emboss layer provides a textured grip for installation

Waterproof surface creates a hygienic system that is easy to clean and resists stains

Commercial protection layer enhances textile integrity

Curl-resistant balance sheet for dimensional stability

The effects and annual losses attributed to electrostatic discharge (ESD) are estimated to run into the billions of dollars just in the electronics industry alone. To control the static charge, FLEXCO® combines conductive or dissipative vinyl tile with a specially formulated conductive adhesive. This creates a conductive pathway which allows the static to flow through the tile and along the adhesive to the ground point. That makes FLEXCO® ESD static control vinyl flooring an effective first-choice solution to control unwanted human body voltage in areas where mobility cannot be restricted by wrist straps.

Smooth + Ribbed Rubber Inserts

FLEXCO® stair treads with smooth and ribbed inserts provide a tactile surface that's durable and easy to clean. In addition, the low-profile 2" strips are available in FlexTones® colors and 075 Canary for easy coordination with our wall base, tiles, risers, stringers and accessories.

> Available in FlexTones® colors plus Canary Yellow.
> Ideal for vinyl and rubber treads.
> Available to meet ADA requirements for contrasting color.
> Canary smooth and ribbed inserts meet OSHA safety standards.
> 2" strips meet California Code of Regulations, Title 24.

smooth order prefix: **SVI**   ribbed order prefix: **RVI**
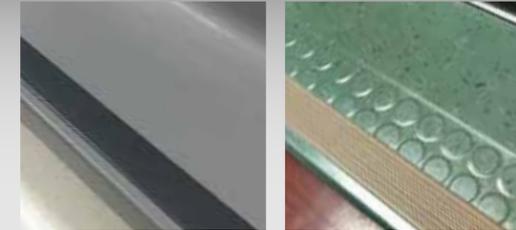

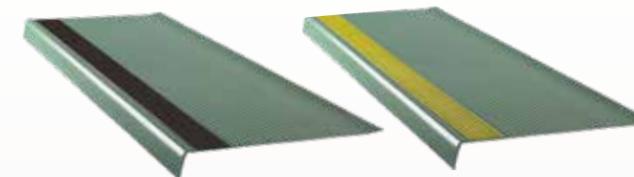

Abrasive Strips

order prefix: **GRIT**

Rubber and vinyl stair treads with abrasive grit strips are available in Glow-in-the-Dark and other colors to meet OSHA, ADA, CA Title 24 and DIN requirements. The 3/4" strips for the 130 treads are available in black only and the 2" strips are available in all colors listed below.

> Available to meet ADA requirements for contrasting color.
> Yellow stripping meets OSHA safety standards.
> Glow-in-the-Dark luminescent safety strips comply with UL 1994 for Luminous Egress Path Marking Systems.
> 2" strips meet California Code of Regulations, Title 24.

LEXCO® Vinyl Type TV wall base offers a superior color finish and quality construction, yet it's made from vinyl, which makes it more economical than rubber for certain applications. When you're looking to save some expense, look no further than FLEXCO® vinyl. No limitations means just that: all wall base sizes are available in all colors, and no matter which shade you choose, all colors in each line are all priced the same.

Welding Beads

R U B B E R   +   V I N Y L

The FLEXCO® Unitized Installation System allows rubber and vinyl tile to be seamlessly installed as a one-piece floor. Pre-grooved floor tiles are fused together with welding beads in matching or contrasting colors. The process is easy, fast and permanent, and the result is a completely seamless "unitized" floor. Welding beads are ideal in areas that have stringent requirements for added hygiene, including operating theaters, laboratories, clean rooms and other areas subjected to continual and extensive wet cleaning.

FLEXCO®
AMERICAN-MADE FLOORING

Rubber order prefix: WBR

FLEXCO® Rubber Welding Beads are available in matching or contrasting colors for rubber tiles or sheets that can be welded.

> Welding Beads are .160" (4mm) in size.

Die Cut (Straight Edge)	Pre-Grooved Tile (Heat Weld)
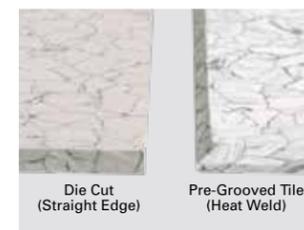

Pre-grooved 24" x 24" and 36" x 36" tile speeds installation.

Welding bead is placed in the groove and fused by heat application.

Welding bead is trimmed in two steps, with an initial trim using a trim plate.

FLEXCO® tile may be installed as self-cove.

CERTIFIED SUSTAINABILITY ASSESSMENT

NSF/ANSI 332 – RESILIENT FLOORING PLATINUM

Made in the U.S.A.

W hen the surface of one subfloor is higher or lower than another, it not only creates a formula for poor aesthetics, it increases the chances of accidents – particularly in high traffic environments. Leave it to FLEXCO® accessories to make the rough spots easy, allowing you to leave more complex approaches behind while looking forward to your next big task at hand. FLEXCO® subleveling systems can put you back on even ground with perfect solutions for all kinds of installations, from educational institutions and retail outlets to hospitality sites and travel centers.

---
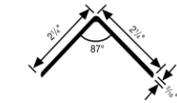

193 | Corner Guard
2-1/4" return corner protector
Colors: FlexTones
Packing /Ctn: 6 / 54" sections
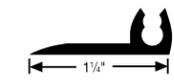

101 | Aluminum Single Flange Track
Smooth single flange used with snap-down dividers
Packing /Ctn: 12 / 12' sections
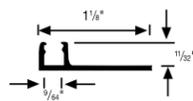

102 | Plastic Single Flange Track
Plastic single flange used with snap-down dividers
Colors: Black only
Packing /Ctn: 10 / 12' sections
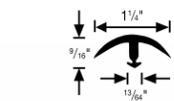

Adapters/Transitions
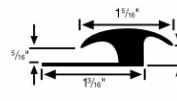

160 | 3/8" Ceramic/Wood Carpet Transition
Molding for joining 5/16" carpet to 3/8" ceramic/wood flooring
Colors: FlexTones
Packing /Ctn: 10 / 12' sections
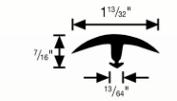

163 | Snap-Down T Edge Divider
Joins carpets
Colors: FlexTones
Packing /Ctn: 20 / 12' sections

167 | Tile and Carpet Joiner
Joins 1/4" carpet to 1/8" tile
Colors: FlexTones
Packing /Ctn: 5 / 12' sections

161 | Snap-Down Edging
1-1/4" wide removable section joins tile to wood
Colors: FlexTones
Packing /Ctn: 20 / 12' sections

162 | Snap-Down Divider
Joins carpet to tile
Colors: FlexTones
Packing /Ctn: 20 / 12' sections

164 | Snap-Down Super Edge
1-7/8" wide removable section joins carpet to wood/ceramic
Colors: FlexTones
Packing /Ctn: 5 / 12' sections

168 | Resilient-to-Carpet Transition
Provides smooth carpet-to-tile transition
Colors: FlexTones
Packing /Ctn: 20 / 12' sections

Edge Guards

183 | 1/4" Transition Edge Guard
1/4" butting gauge undercut
Colors: FlexTones
Packing /Ctn: 5 / 12' sections

185 | 3/16" Transition Edge Guard
Undercut, flange and transition combined
Colors: FlexTones
Packing /Ctn: 20 / 12' sections

184 | 5/16" Transition Edge Guard
5/16" butting gauge undercut
Colors: FlexTones
Packing /Ctn: 5 / 12' sections

186 | 1/4" Carpet Edge Guard
Undercut 1/4" with 2" transition
Colors: FlexTones
Packing /Ctn: 10 / 12' sections

Cove Caps

174 | Tapered Carpet Cove Cap
Trim for coved carpet
Colors: FlexTones
Packing /Ctn: 20 / 12' sections

197 | Square Resilient Cove Cap
1/8" square cap for coved sheet vinyl
Colors: FlexTones
Packing /Ctn: 50 / 12' sections

175 | Square Carpet Cove Cap
Cove cap for 1/4" carpet
Colors: FlexTones
Packing /Ctn: 40 / 12' sections

197R | Tapered Resilient Cove Cap
Cap for coved sheet goods or vinyl tile
Colors: FlexTones
Packing /Ctn: 50 / 12' sections

Stair Nosings

171 | Carpet Stair Nosing
Undercut nosing for 1/4" and 5/16" carpet
Colors: FlexTones
Packing /Ctn: 5 / 12' sections

189 | Top Set Stair Nosing
Square nose for light-duty applications
Colors: FlexTones
Packing /Ctn: 5 / 12' sections

187 | Lap Type Square Stair Nosing
Lap type for butting 1/8" tile
Colors: FlexTones
Packing /Ctn: 10 / 12' sections

201 | Overlap Stair Nosing
Square nosing, ribbed safety surface
Colors: FlexTones
Packing /Ctn: 10 / 12' sections

202 | Double-Butt Carpet Stair Nosing
Butt to 1/4" carpet
Colors: FlexTones
Packing /Ctn: 5 / 12' sections

Fillets/Tub Mouldings
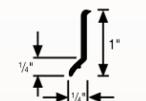

140 | 1" Tub Moulding
High-gloss, self-stick finish cove for bathtub, counters and shelves
Colors: White or Almond
Packing /Ctn: 24 / 5' sections

194 | Fillet Moulding
Superb backing for flashing up the wall
Colors: White only
Packing /Ctn: 25 / 5' sections

141 | 1-1/2" Tub Moulding
High-gloss, self-stick finish cove for bathtub, counters and shelves
Colors: White or Almond
Packing /Ctn: 24 / 5' sections

195 | Cove Stick Fillet
Superb backing for flashing up the wall
Colors: Black only
Packing /Ctn: 10 / 12' sections

Reducers
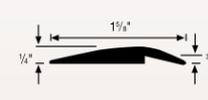

156 | Underslung Reducer
Binder-bar edging for resilient flooring undercut
Colors: FlexTones
Packing /Ctn: 2 / 35' coils

158 | 3/8" Carpet Edge Reducer
Designed especially for 3/8" carpet
Colors: FlexTones
Packing /Ctn: 10 / 12' sections

157 | 1/2" Reducer
For carpet, ceramic tile or wood floors
Colors: FlexTones
Packing /Ctn: 10 / 12' sections

177A | 3/8" Carpet Edge Reducer
Designed especially for carpet
Colors: FlexTones
Packing /Ctn: 10 / 12' sections

177B | 5/16" Carpet Edge Reducer
Reducer for 5/16" material including FlexTuft®
Colors: FlexTones
Packing /Ctn: 10 / 12' sections

192A | 1/8" Tile Reducer Strip
Beveled edge for resilient flooring material
Colors: FlexTones
Packing /Ctn: 50 / 3' sections

INSTALLATION PRODUCTS

FOR TILE, TREAD + WALL BASE

Tile. Sheet. Wall base. Stair treads. Optimum performance starts with quality installation, and Excelsior™ Adhesives position you to get expected results time after time. They're the perfect match for our products and your production schedule.

Spread Rates

SP-500 Acrylic Aerosol Pressure-Sensitive Adhesive
CASE QTY

Acrylic aerosol pressure-sensitive adhesive used for installation of LVT and rubber flooring products. Water-based and VOC free, it is highly aggressive with high resistance to moisture and plasticizers. It has excellent initial grab and shear strength making it ideal for fast track construction and commercial installations.

Coverage: Rubber Flooring – 100 sq. ft. per unit; Vinyl Flooring – 150 sq. ft. per unit.

AW-510 Acrylic Adhesive
G **4**

Acrylic adhesive used for the permanent installation of dimensionally stable vinyl, rubber and quartz flooring and stair tread products. Water-based, low VOC and solvent-free, yet highly aggressive with a high resistance to moisture and plasticizer migration. Adhesive is suitable for heavy traffic or rolling loads and is easy to clean up.

Porous Coverage 160 sq.ft. per gallon / Non-porous Coverage 225 sq.ft. per gallon.

AP-520 Acrylic Roll/Trowelable Pressure-Sensitive Adhesive
3

Acrylic, roller or trowel applied pressure-sensitive adhesive products. It is water-based and VOC free, yet highly aggressive with high resistance to moisture and plasticizers. Suitable for heavy traffic of rolling loads. After installation flooring is immediately usable when using AP-520 and can be immediately heat welded.

Roller Coverage: 1200 sq. ft. per unit

Trowel Coverage: 675 sq. ft. per unit

WB-600 Acrylic Wall Base Adhesive
C **G** **4**

Solvent-free, high performance, acrylic wet-set adhesive specifically designed for permanent installation of rubber, TPR and vinyl wall base products and pre-formed corners on vertical surfaces.

Trowel Coverage: 180-340 lin. ft. per gallon depending on trowel/base size

Cartridge Coverage: 30-70 lin. ft. per cartridge depending on base size

EN-610 Epoxy Nose Filler Adhesive
C

Two-component, solvent-free epoxy caulk adhesive designed for use with indoor installations of stair treads and stair nosings. Designed to prevent flex, indentation and premature wear or damage to rubber or vinyl stair treads and stair nosings.

½" Coverage: 25 lin. ft. per cartridge

¼" Coverage: 50 lin. ft. per cartridge

TP-620 Pressure-Sensitive Tape Adhesive
CASE QTY

Solvent-free, pressure-sensitive tape-based adhesive designed for use with indoor installations of stair treads, risers, stringers and cove fillet sticks. It is designed specifically to permanently adhere rubber or vinyl products. Allows for installations to resume use immediately.

Dimensions: 1" x 164' (6 per case); 4" x 164' (3 per case); 9.5" x 164' (1 per case)

C-631 Water-Based Contact Adhesive
Q

A highly aggressive contact adhesive used for the permanent installation of vinyl and rubber resilient flooring, stair treads, wall base, flash coving and accessories in horizontal or vertical installations over porous and non-porous substrates in indoor applications. It is a low odor, non-flammable and solvent-free product.

Coverage: 20-40 sq. ft. per unit; 120-140 lin. ft. per unit

U-705 Urethane Wet-Set Adhesive
3

Premium, water resistant, single component urethane adhesive used for the installation of resilient flooring products, athletic flooring including recycled or crumb rubber flooring products. It is free of water, solvents and VOCs. With extremely high sheer strength it is the perfect choice for areas with heavy traffic and rolling loads. It can be installed over porous and non-porous substrates in indoor and outdoor applications, allowing for the installation of flooring materials in entrances or areas that are not temperature controlled.

Porous Coverage: 160 sq. ft. per gallon

Non-Porous Coverage: 235 sq. ft. per gallon

Athletic Flooring Porous Coverage: 135 sq. ft. per gallon

Athletic Flooring Non-Porous Coverage: 160 sq. ft. per gallon

EW-710 Epoxy Wet-Set Adhesive
G

Non-flammable two-part urethane-modified epoxy adhesive used for permanent indoor installation of vinyl, rubber and quartz flooring products. It is low VOC and solvent-free, yet highly aggressive and cures to an incredibly hard, chemically resistant film for superior adhesive. It can be installed over porous and non-porous substrates in indoor and outdoor applications, allowing for installation of flooring materials in entrances or areas that are not temperature controlled.

Crumb Rubber Coverage: 120 sq. ft. per gallon

Smooth Porous & Non-Porous Coverage: 150 sq. ft. per gallon

Rough Porous Coverage: 135 sq. ft. per gallon

ASD-800 Acrylic Wet-Set ESD Adhesive
G

Acrylic wet-set adhesive designed for indoor installation of ESD vinyl and rubber flooring. When installed in conjunction with ESD tile and a grounding source, it will help dissipate static and electrical discharges to protect electrically sensitive equipment.

Coverage: 160 sq. ft. per gallon

USD-810 Urethane Wet-Set ESD Adhesive
G

Two-part, solvent-free urethane adhesive used for the permanent installation of ESD vinyl and rubber flooring products. Low VOC and solvent-free, yet highly aggressive and cures to a flexible ESD film for superior adhesion. Ideal for areas with heavy use, machinery or rolling loads.

Smooth Porous & Non-Porous Coverage: 150 sq. ft. per gallon

Rough Porous Coverage: 135 sq. ft. per gallon

excelsior™
INSTALLATION PRODUCTS

Installation
PRODUCTS

P roper subfloor preparation is the key to great looking and long-lasting floors. These Excelsior™ underlayments help you achieve your flooring goals.

CSU-400 Cork Sound Control Underlayment
3.5' x 100' x 1.9mm Roll

Rolled sound reduction underlayment designed for indoor use under vinyl flooring. CSU-400 reduces sound transmission from room to room while providing thermal insulation and comfort. It can be installed under glue-down or loose lay flooring options.

Coverage:
350 sq. ft. per roll

FSU-410 Floating Sound Control Underlayment
3.5' x 35' x 2mm Roll

Rolled sound reduction underlayment specifically designed for indoor use under resilient flooring products. FSU-410 can be installed directly over existing floor coverings such as VAT, Sheet Vinyl, Linoleum and Hardwood Flooring, where other adhesives cannot. FSU-410 is a loose lay product that does not require adhesive to be installed and may be used with floating and glue down resilient floors.

Coverage:
122.5 sq. ft. per roll

NC-900 All Purpose Cleaner

A pH neutral, all-purpose cleaner for the initial and daily cleaning of all rubber and vinyl resilient flooring coverings. NC-900 is specially formulated to remove the mold release that is applied during the manufacturing of rubber products and can be applied in many fashions including a mop, pump-up sprayer, sponge or auto-scrubbing machine.

CM-910 Cleaner & Maintainer

A pH neutral, biodegradable cleaner and maintainer for the daily cleaning or long-term preservation of the rubber flooring products. In addition to cleaning, CM-910 creates and leaves behind a protective film that helps maintain and condition the rubber, making future cleaning processes easier. CM-910 can be applied to the floor using a mop, pump-up sprayer, or using an auto-scrubbing machine.

FR-920 Vinyl Flooring Finish Remover

A highly concentrated finish remover designed to remove topically applied flooring finishes from vinyl resilient flooring products. FR-920 can be used to remove multiple layers of floor finish and can be used to remove finish from terrazzo, porcelain and ceramic tile, and more commonly from all vinyl floor coverings, including vinyl composition tile (VCT), vinyl enhanced tile (VET) and sheet vinyl products.

PR-930 High Performance Finish Remover

A finish remover specifically designed to remove topically applied flooring finishes over resilient flooring products that are sensitive to alkalinity, such as rubber flooring and crumb/recycled rubber flooring. PR-930 allows for the removal of these finishes without causing damage to pH sensitive flooring products and is designed to remove multiple layers of floor finish.

MF-940 Matte Acrylic Floor Finish

A durable, scuff-resistance acrylic floor finish, developed for vinyl and rubber resilient flooring products such as VCT, LVT, solid vinyl tile, quartz tile and rubber. MF-940 is developed with exclusive technology that combines ease of maintenance with exceptional finish clarity, allowing the flooring material to shine without the unsightly appearance of a high-build finish.

GF-950 Gloss Acrylic Floor Finish

A flexible, extended-wear acrylic floor finish, developed for vinyl and rubber resilient flooring products such as VCT, LVT, solid vinyl tile, quartz tile and rubber. GF-950 is a biodegradable finish developed with advanced polymers that provide excellent durability without creating unsightly buildup.

PF-960 High Performance Floor Finish

A flexible floor finish developed specifically for use over rubber flooring products but is compatible with most resilient flooring products. PF-960 is a biodegradable finish developed with advanced polymers that provide excellent durability without creating unsightly buildup.

Rubber Tile ASTM Tests and Results

COVERS TEXTURED RUBBER, RADIAL®, RADIAL® II, RADIAL® III, SQUARE², WEAVE, SPEXTONES™, AND EVOLVING STYLES® TILE

Standard Specification

ASTM F1344, Specification for Rubber Floor Tile, Class I, Type A

Durability

ASTM D3389, Abrasion Resistance: Passes, ≤1 gram lost

ASTM D2240, Hardness (Shore A Durometer): Passes, ≥85

Resilience

ASTM F925, Resistance to Chemicals: Excellent, list of chemicals available

ASTM F1514 Heat Stability: Passes, flat surface, Delta E≤8.0

Slip Resistance

ASTM D2047, Static Coefficient of Friction (Slip Resistance): Excellent, ≥0.60

Fire Test Data

ASTM E648 (NFPA 253), Critical Radiant Flux: Class 1, ≥0.45 W/cm²

ASTM E662 (NFPA 258), Smoke Generated by Solid Materials: Passes, ≤450

Fungi Resistance

ASTM G21, Fungi Resistance: Excellent

FlexTuft® ASTM Tests and Results

FOR VULCANIZED AND NON-VULCANIZED RUBBER BACKING

Fire Test Data

ASTM D2859, Pill Test: Passes and exceeds the minimum char radius of 3" (average char per 8 strips tested = 0.75" radius)

Slip Resistance

ASTM D2047, Static Coefficient of Friction (Slip Resistance): Exceeds 0.80

Tuflex® Force® ASTM Tests and Results

Standard Specifications

ASTM D2240 - Hardness, Shore A; ≥85

ASTM D3389 - Abrasion Resistance: Passes, ≤1 gram lost

ASTM D624 - Tear Resistance; 93 +/- 15 lbs/in

ASTM D2047 - Coefficient of Friction; ≥0.60

ASTM E648 - Critical Radiant Flux, Class I; ≥0.45 watts per sq cm

ASTM E662 - Smoke Density; ≤450

Prime Sports™ ASTM Tests and Results

Standard Specifications

ASTM D3389 - Abrasion Resistance: Passes, ≤1 gram lost

ASTM D2047, Static Coefficient of Friction (Slip Resistance): Exceeds 0.80

ASTM F373 - Thickness Tolerance: +/- 0.015"

ASTM D624 - Die C, Tear Strength: 70ppi

ASTM F137 - Flexibility: Passes - 6mm Mandrel

ASTM F1514 - Resistance to Heat: Delta E: 2.24 and AATCC Gray Scale: 3.85 average

ASTM F925 - Resistance to Chemicals: No Change. Staining Agent List - 5%, Acetic Acid, 70% Isopropyl Alcohol, Mineral Oil, 5% Sodium Hydroxide, 5% Ammonia, Bleach, 5% Phenol, Gasoline, Sulfuric Acid, Kerosene and Olive Oil.

ASTM F970 - Static Load Limit: 250 psi, (modified 400 psi)

ASTM D2240 - Harness Shore A: 60 +/- 5 minutes

ASTM D395B - Compression Set: 12% or less

ASTM D 792 - Density PCF: 65 lbs/cu/ft

Wall Base ASTM Tests and Results

Standard Specifications

ASTM F1861 (Wallflowers), Type TS, Group 1, Styles A and B

ASTM F1861 (Base 2000), Type TP, Group 2, Styles A and B

ASTM F1861 (Vinyl Base), Type TV, Group 1 or 2, Styles A and B

ASTM F1861 (Base Sculptures), Type TP, Group 1 or 2 , Style D

Resilience

ASTM F925, Resistance to Chemicals: Passes

ASTM F1515, Light Stability: Excellent

Fire Test Data

ASTM E648 (NFPA 253), Critical Radiant Flux: Class 1, ≥0.45 W/cm²

ASTM E662 (NFPA 258), Smoke Generated by Solid Materials: Passes ≤450

Rubber Stair Treads ASTM Tests and Results

Standard Specification

ASTM F2169, Type TS Class 1 & 2; Group 1 & 2 Grade 1

Durability

ASTM F137, Flexibility: Passes, 1/4" mandrel, no breaks or cracks

Resilience

ASTM F925, Resistance to Chemicals: Excellent, list of chemicals available

ASTM F1514 Heat Stability: Passes, flat surface, Delta E ≤ 8.0

Fire Test Data

ASTM E648 (NFPA 253), Critical Radiant Flux: Class 1, ≥ 0.45 W/cm²

ASTM E662 (NFPA 258), Smoke Generated by Solid Materials: Passes, ≤450

Slip Resistance

ASTM D2047, Static Coefficient of Friction (Slip Resistance): Excellent, ≥0.60 flat surfaces using Neolite sensors

Fungi Resistance

ASTM G21, Fungi Resistance: Excellent

Vinyl Stair Treads ASTM Tests and Results

Standard Specification

Durability

ASTM F970, Static Load Limit: 250 psi; Modified ASTM F970: 650 psi

ASTM D3389, Abrasion Resistance: Passes, ≤1 gram lost

ASTM F137, Flexibility: Passes, bend around a 1" mandrel, no breaks or cracks

Resilience

ASTM F925, Resistance to Chemicals: Excellent, list of chemicals available

ASTM F1515, Light Stability: Passes, flat surface, Delta E ≤ 8.0

Fire Test Data

ASTM E648 (NFPA 253), Critical Radiant Flux: Class 1, ≥0.45 W/cm²

ASTM E662 (NFPA 258), Smoke Generated By Solid Materials: Passes, ≤450

Slip Resistance

ASTM D2047, Static Coefficient of Friction (Slip Resistance): Excellent, ≥0.60

Chemical Resistance

All FLEXCO® products (except FlexTuft®) were tested for resistance to various chemicals by placing one cubic centimeter of each chemical on the tile surface and then covering it with a watch glass. The chemicals were allowed to remain in contact with the tile for one hour and for 24 hours. Tiles were then washed with soap and water and allowed to dry under room conditions for 24 hours. Visual evaluations were then made and classified as follows:

No change = Chemical had no visible effect upon the tile or the effect would be eliminated in the course of ordinary maintenance

Surface dulling = Tile suffered loss of gloss

Surface attack = Tile suffered damage such as warping, swelling, blistering, peeling and raised or roughened areas

Stain = Tile discoloration

ESD Rubber Tile ASTM Tests and Results

Standard Specification

ASTM F1344, Specification for Rubber Floor Tile, Class I, Type A

Durability

ASTM F970, Static Load Limit: 250 psi; Modified ASTM F970: 1100 psi; Passes

ASTM F137, Flexibility: Passes, bend around a 1/4" mandrel, no breaks or cracks

ASTM D2240, Hardness (Shore A Durometer): Passes, ≥85

Electrical Resistance

ASTM F150, Electrical Resistance for Resilient Flooring; 1 x 10⁶ to 1 x 10⁹

Resilience

ASTM F925, Resistance to Chemicals: Excellent, list of chemicals available

Slip Resistance

ASTM D2047, Static Coefficient of Friction (Slip Resistance): Excellent, ≥0.60

Fire Test Data

ASTM E648 (NFPA 253), Critical Radiant Flux: Class 1, ≥0.45 W/cm²

ASTM E662 (NFPA 258), Smoke Generated by Solid Materials: Passes, ≤450

Fungi Resistance

ASTM G21, Fungi Resistance: Excellent

Delane® ESD Vinyl Tile ASTM Tests and Results

Standard Specification

ASTM F1700 - Specification for Solid Vinyl Tile; Class I, Type A

Durability

ASTM F970 - Static Load Limit; 250 PSI; Modified ASTM F970, 2500 PSI

Electrical Resistance

ASTM F150 - Electrical Resistance; • Conductive, 2.5 x 10⁴ to 1 x 10⁶ • Static Dissipative, 1 x 10⁶ to 1 x 10⁹ • ANSI/ESD S7.1, NFPA 99

Resilience

ASTM F925 - Resistance to Chemicals; Passes, List of chemicals available

ASTM F1515 - Light Stability; Passes

Slip Resistance

ASTM D2047 - Static Coefficient of Friction (Slip Resistance); ≥0.60; dry

---

Fire Test Data

ASTM E648 (NFPA 253) - Critical Radiant Flux; Class 1, ≥0.45 W/cm²

ASTM E662 (NFPA 258) - Specific Optical Density of Smoke Generated by Solid Materials; Passes, ≤450

Natural Elements Premium Luxury Vinyl Plank and Tile portfolio ASTM Tests and Results

Standard Specification

ASTM F1700, Specification for Solid Vinyl Tile: Class III, Type B

Fire Test Data

ASTM E648 (NFPA 253) - Critical Radiant Flux; Class 1, ≥0.45 W/cm²

ASTM E662, Smoke Density; Passes

Durability

ASTM F970, Static Load Limit: 250 psi; Modified ASTM F970: 2000 psi

Resilience

ASTM F925, Resistance to Chemicals: Excellent, list of chemicals available

ASTM F1515, Light Stability: Passes, flat surface, Delta E ≤ 8.0

Slip Resistance

ASTM D2047 - Static Coefficient of Friction (Slip Resistance); ≥0.60; dry

Solid Vinyl Tile ASTM Tests and Results

COVERS DELANE® AND GEODESY® TILE

Standard Specification

ASTM F1700, Specification for Solid Vinyl Tile: Class 1, Type A; Federal Specification SS-T-312B, Type III

Durability

ASTM F970, Static Load Limit: 250 psi; Modified ASTM F970: 2500 psi

Resilience

ASTM F925, Resistance to Chemicals: Excellent, list of chemicals available

ASTM F1515, Light Stability: Passes, flat surface, Delta E ≤ 8.0

Fire Test Data

ASTM E648 (NFPA 253), Critical Radiant Flux; Class 1, ≥0.45 W/cm²

ASTM E662 (NFPA 258), Smoke Generated By Solid Materials: Passes, ≤ 450

Slip Resistance

ASTM D2047, Static Coefficient of Friction (Slip Resistance): Excellent, ≥0.60

Crosswire™ ASTM Tests and Results

Fire Test Data

ASTM E648 (NFPA 253) - Critical Radiant Flux; Class 1, ≥0.45 W/cm²

ASTM E662, Smoke Density; Passes

Ethyl Alcohol	No change	No change			
Butyl Alcohol	No change	Slight surface attack	Formaldehyde (40%)	No change	No change
Alkalies			Creosote	Yellow stain	Dark brown stain, surface attack
Sodium Hydroxide (5%)	No change	No change			
Ammonium Hydroxide (28%)	No change	No change	Thimerosal	No change	Pink stain
			Iodine	No change	Dark yellow stain
Aromatics			Bleach (5.25% NaOCl)	No change	No change
Phenol	No change	Slight surface attack			
Benzene	No change	Slight surface attack			

* Rubber tile subject to surface attack at 24 hours.

** Rubber tile not affected.

IMPACT
PROGRAM

IMPACT
RETHINK + REUSE + RECYCLE =
RESPONSIBILITY

FLEXCO®
AMERICAN-MADE FLOORING

S ustainability is at the heart of FLEXCO manufacturing from sourcing to processing to recycling. IMPACT is a proven recycling program that recycles flooring for alternate uses at the end of the product life cycle. We will help you collect flooring, arrange for its take-back, and find new uses that will divert it from landfills and oceans.

How the IMPACT Take-Back Program Works:
1. Contact Marcus Hyde to participate in our IMPACT program. Call 1-800-862-7539, ext. 7224, or email impact@flexcofloors.com. We will ship a Gaylord collection container to your site for your qualified flooring materials for recycling.
2. Provide reporting information. Include the project name, location and contact information for sustainability reporting.
3. Secure return freight payment in advance. Once you are ready to recycle, contact a shipper to return your container to FLEXCO. You may use your own method for shipping, however it must be prepaid.
4. Return your container to FLEXCO. We will take care of the rest. Recycled flooring is then repurposed as new flooring and other practical products.

The Upcycle Impact
Responsible. Resourceful. Recyclable.

The Downcycle Impact
Replace. Reclaim. Repurpose.

WE DELIVER SUSTAINABILITY
Manufactured in an ISO 14001 certified facility

WE SOURCE RESPONSIBLY
Only the highest-performance raw materials

WE USE PRE-CONSUMER WASTE
Directly from our own manufacturing process

WE COLLECT IT
You remove end-of-life flooring and we arrange take-back logistics.

WE CREATE NEW USES FOR IT
Recycled flooring is repurposed as new flooring and other practical products.

WE REPORT IT
We send you waste diversion verification for sustainability reporting and LEED credits.

Inspirations

CUSTOM DESIGNS

No matter what you envision FLEXCO can make it happen with our Custom Design services. From all-purpose rooms, to sports courts to corporate lobbies and more, your design is fully integrated, extending through the thickness of every tile for a beautiful floor with uncompromising performance.

Custom Cut Designs

A logo. An emblem. An intricate pattern. Specify your custom design from our product portfolio for long-lasting, color-coordinated beauty.

> Choose from any FLEXCO color palette.

> Precision Waterjet Technology can replicate even the most detailed designs flawlessly for a look that can't be achieved by hand cutting.

Game Line Kits

Whether you have a full-size court, a multi-purpose gym or a smaller facility with reduced court dimensions, our Game Line Kits install as an integrated part of the flooring and stand up to high-impact use with two construction options available.

Waterjet-Cut Game Line Kits

> Kits available in 57 FlexTones colors or the base colors from Creative Elements or Wood Elements palettes

> Game Line Kits are waterjet-cut, field tile to be cut onsite

> Custom colors available; minimum quantity required
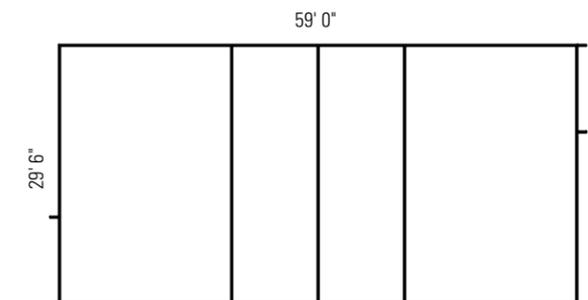

Painted Game Line Colors

> 2" wide lines

> 10 standard colors or virtually any color available with a custom formulation

Sample Requests

R U B B E R   +   V I N Y L

Our Xpress Ship flooring options provide expedited delivery of **six of our most popular products in eight colors.** Choose from coordinated wall base, tile and stair tread options that provide the products you need and the service you want.
Daily stock means fast delivery to keep your installation on schedule.

FLEXCO® has a variety of sampling kits and chain sets available to assist with making your flooring, wall base and accessory selections. FLEXCO® offers custom color matching for several of our products and custom cutting to help you bring your design vision to life. Contact customer service at 1.800.633.3151 or submit your request online at flexcofloors.com. You may also email your sample request to samples@flexcofloors.com.

Xpress ship daily stock availability

Wallflowers® Premium Wall Base	4" x 48"	30 pcs per box	250 cartons per color in stock daily
Base 2000™ Wall Base	4" x 48"	30 pcs per box	250 cartons per color in stock daily
Radial® RBT Tile	18" x 18"	20 pcs per carton	3,000 square feet per color in stock daily
Hammered Tile	18" x 18"	20 pcs per carton	1,000 square feet per color in stock daily
Radial® 550 Treads	48"	6 pcs per carton	200 pieces per color in stock daily
Hammered 1900	48"	6 pcs per carton	50 pieces per color in stock daily
