

Bariatric Seating Solutions

comforting support, strength and stability

Furnishing Knowledge®

Bariatric Seating

Today's facilities should carefully consider the needs of the bariatric client. The prevalence of obesity has steadily increased over the years, and in turn, standard practice suggests that 10-20 percent of a facility's seating space should accommodate bariatric needs.

KI offers bariatric collections that create design continuity throughout any facility. Create distinct spaces by specifying contrasting fabrics with a variety of high-performance textiles including Pallas® Textiles, KI Ingrades, and COM. An optional moisture barrier is also available. When using suitable textiles, the chairs meet TB 133 requirements.

Cycle tested to uphold KI's bariatric weight rating standards to safely accommodate and support various users. Chairs offer a structural steel inner frame and active seat suspension for maximum strength and stability.

KI's bariatric seating also features replaceable components, clean out spaces between the seat and back for easy cleaning and a lifetime warranty to ensure years of use.
