Product Features

- Includes wood top and attachment hardware.
- Wood veneer top has 3mm edgeband on user and guest edge, and 1mm edgeband on sides.

To Order, Specify:

- 1) Product number.
- 2) Wood finish color for top.

Common Product Features

- Attaches to separately specified X Series attached lateral file(s), attached storage cabinets, attached combination units, and/or attached pedestals to create a credenza.

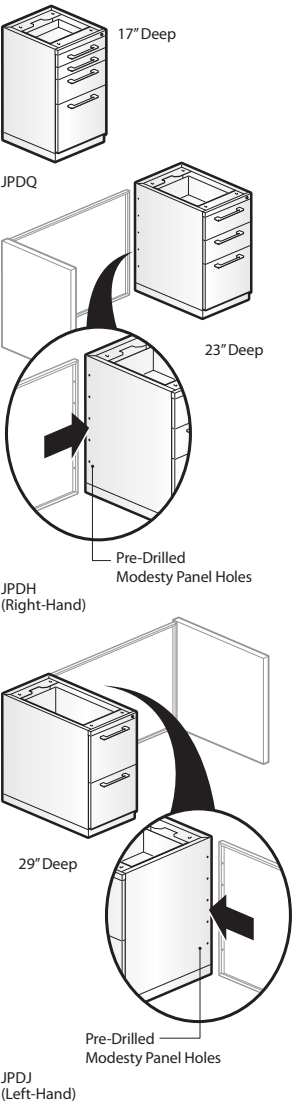

Specification Tips

- Not for use with X Series Desk Pedestals; modesty panel mounting holes on the side of the desk pedestal will be visible.
- Not for use with X Series Freestanding Files, storage tops are included with freestanding caseloads.
- Designing a storage credenza with attached storage pieces less than 24"(610mm) deep will result in an overhang at the back of the credenza top.
- When using attached pedestals the recommended nominal depth is 24"(610mm) to minimize overhang of the top. The actual depth of a 24"(610mm) deep attached pedestal is greater than other storage pieces; the recommended application is to place the pedestal(s) at the end(s) of the credenza to conceal the depth difference. 18"(457mm) nominal depth pedestals are less deep than other storage pieces and therefore not recommended.
- For a storage credenza with attached pedestals and lateral files, specify a proud front attached lateral (not inset front) to match the pedestal front.
- When designing a credenza to support a Vertical Storage Unit, both ends of credenza must be 24"(610mm) deep attached pedestals.

- Pedestal orientation can be field-changed from left to right or right to left. Order hole plugs (qty. 8) from eParts to cover exposed mounting holes.
- When specifying pedestals for standard rectangular or standard bow top desks, nominal depth of pedestal must match nominal depth of desk top. When specifying pedestals for executive rectangular or executive bow top desks, nominal depth of pedestal must be 6"(152mm) less than nominal depth of desk top. See table.

Product Application – X and V Series Credenza Guidelines

Creating Credenzas

- Credenza tops attach to X Series or V Series attached filing and storage products to create credenzas.
- The combined width of the storage pieces cannot exceed the width of the Credenza Top.
- 2H attached lateral files, storage cabinets, or combination units do not match the depth of the credenza top. When using these products, there will be an overhang at the back.
- When using pedestals to create a credenza, specify 24"-deep attached pedestals (Using 18" depth pedestals will result in an overhang at the back)
- A credenza with an overhang at the back cannot accept a Vertical Storage Unit, unless both ends have full depth pedestals. (overhang in center only)

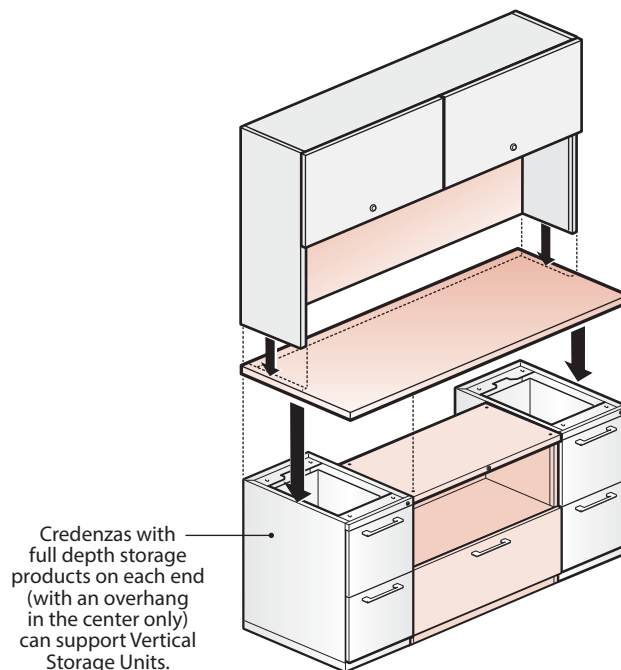

Don't

- A credenza with an overhang at the back cannot accept a Vertical Storage Unit,

Do

- Credenzas that have full depth storage products on both ends (overhang in center only) can accept Vertical Storage Units.

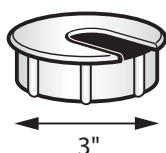

Product Application – Grommet Guidelines

Grommet Application with End Panel and Pedestal

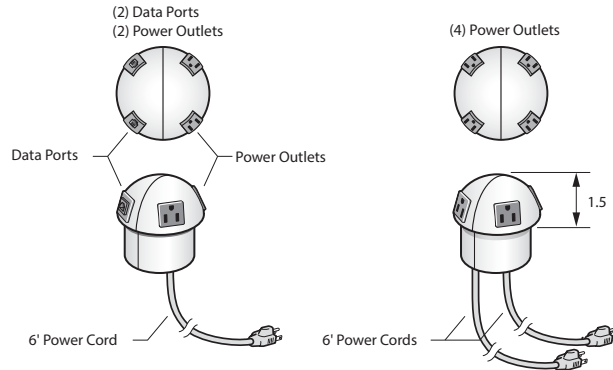

- The Power/Data Dome is not used with the grommet.
- For additional cord management, specify wire management accessories separately.

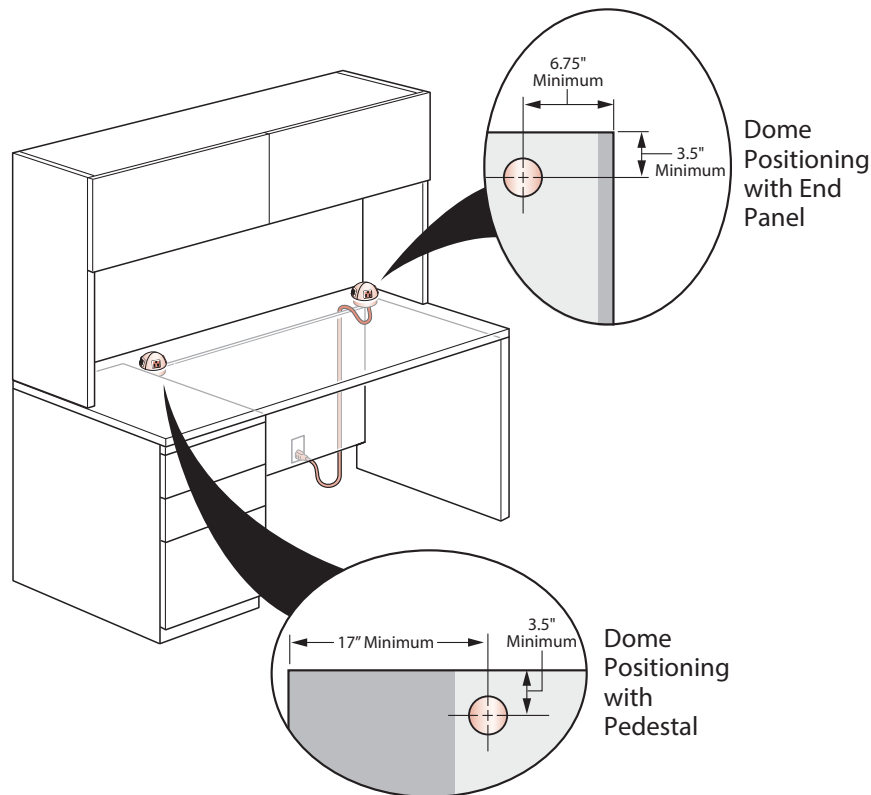

Product Application – Power/Data Dome Guidelines

Power/Data Dome

- Domes are 3" diameter and provide desk height access to power and data.
- Domes are separately specified and field drilled/installed - locations are dependent upon the presence of end panels, modesty panels, and/or lower storage.
- Receptacles are rated 15-amp and include a breaker and 6' cord. Domes include adaptor plates for data port installation. Data ports are not supplied by Haworth and must be purchased locally.

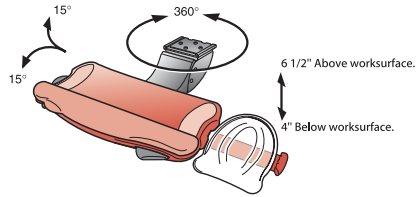

Dome Application with End Panel and Pedestal

- The Power/Data Dome is not used with the grommet.
- For additional cord management, specify wire management accessories separately.

Product Application – Adjustable Keyboard Pads (AKPs) Guidelines

Keyboard pads are designed to work with double pedestal desks, single pedestal desks, desk shells, corners, extended corners, and extended transitional corners.

Boogie Board Keyboard Tray with Palm Rest and either with or without integrated mouse pad (HKTC-17-M, HKTE-17-M, HKTC-21-M, HKTE-21-M):

- Keyboard tray adjusts 6 1/2" (165mm) above worksurface and 4" (102mm) below
- Keyboard tray tilts +/- 15°
- 360° rotation

Adjustable Keyboard Tray (AKPM-17-SLM, AKPM-21-SLM):

- Keyboard adjusts 6" (152mm) below worksurface
- Keyboard tray tilts +/- 15°
- 360° rotation

Adjustable Keyboard Tray (AKPM-23-SFM):

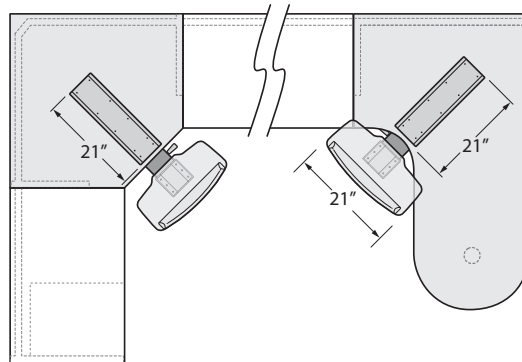

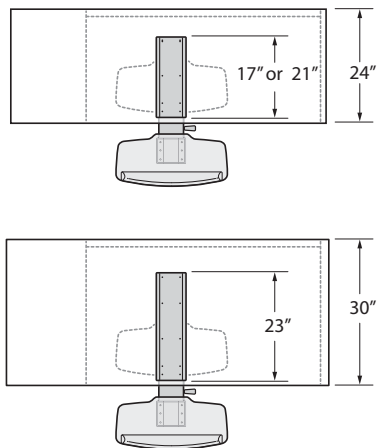

- Keyboard adjusts 5 1/4" (133mm) above worksurface and 6 3/4" (171mm) below
- Keyboard tray tilts +/- 15°
- 360° rotation

For use on double pedestal desks, single pedestal desks, and desk shells –

Adjustable keyboard pads with 17" and 21" tracks can be used on caseloads that are 24" deep or deeper. Adjustable keyboard pads with 23" tracks can be used on caseloads that are 30" deep or deeper. Any width of keyboard tray can be used.

For use on curved wrap around corners, extended corners, and extended transitional corners –

For an adjustable keyboard pad to adjust above the top, a 21" minimum track depth is required. A 21"-wide keyboard tray is recommended.

Vertical Storage Unit Spanning Multiple Components

Vertical Storage Units can span multiple casework components, as long as the width of the Vertical Storage Unit matches the width of the combined caseworks below.

Dimensions for Vertical Storage Unit widths are based on dimensions for casework widths, but not depths.

- 12" wide single lockers must be attached to a Compose Panel, wall or ganged to another locker. All other lockers, group lockers, and cubby lockers can be freestanding.
- Lockers can be attach to a Compose panel using a separately specified Storage-To-Panel Bracket (ZNBT-1900, ZZBT-1900)
- When attached to Compose panel frames, lockers provide panel support; refer to Compose Specification Guide/ Support and Load section for application details.
- Same-height lockers can be ganged side-to-side using a ganging kit, available through eParts. (Ganging requires field drilling of lockers)

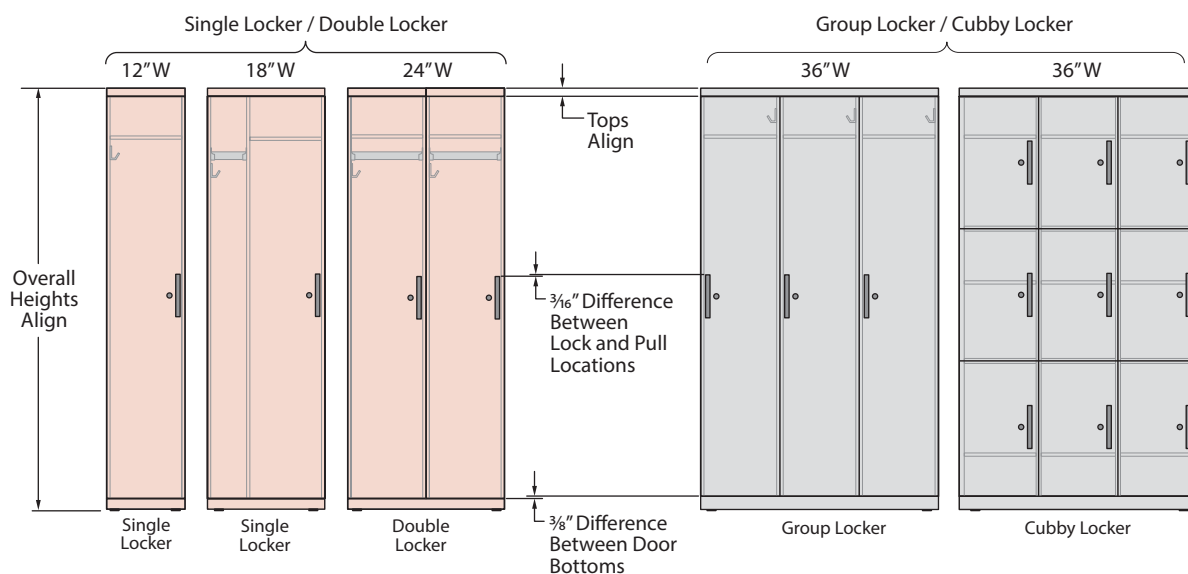

Product Application – X Series Locker Guidelines

X Series Locker Applications

Single Lockers and Double Lockers have slight aesthetic and dimensional differences when compared with Group Lockers and Cubby Lockers:

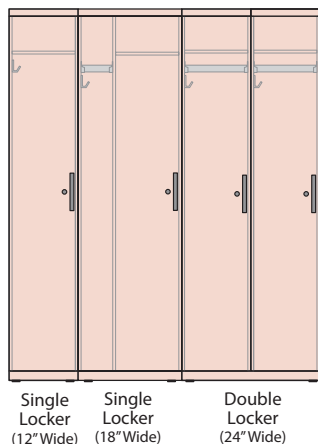

- The bottom of the doors will be offset by $\frac{3}{8}$ "
- The locks and pulls will be offset by $\frac{3}{16}$ " since they are centered on the door height
- The top of doors, and the overall height of the lockers will align

Do

- Single and Double Lockers have a consistent aesthetic and can be mixed together.

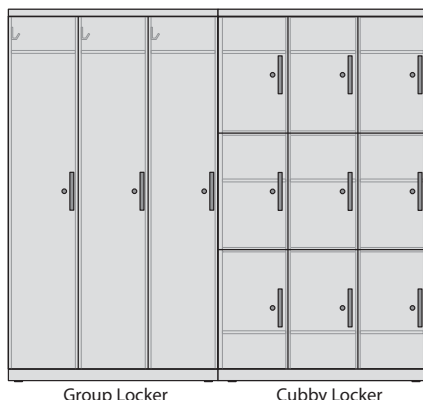

Application Combining Single Locker and Double Lockers

Do

- Group Lockers and Cubby Lockers have a consistent aesthetic and can be mixed together.

Locker Slat Rail and Tools

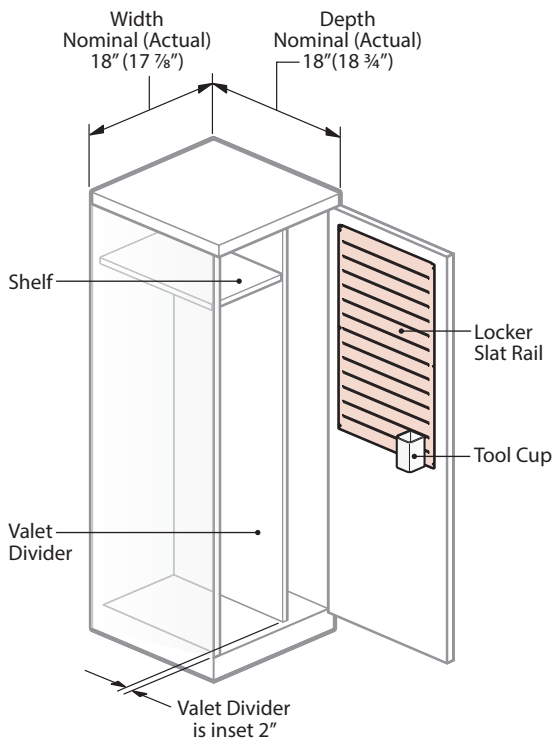

- Slat Rail attaches to Single Lockers and Group Lockers with 18" wide doors only.

✓ Do The Locker Slat Rail attaches to 18" wide locker doors only.
(will not work with 12" wide Locker doors)

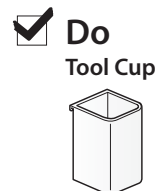

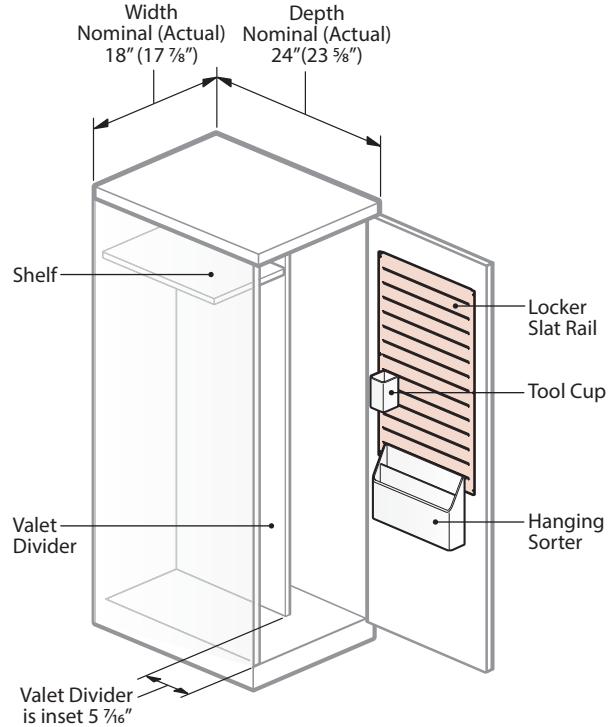

Locker Slat Rails may be used with the following separately specified Belong hanging accessories:

- 24" deep Lockers with a Locker Slat Rail can accommodate Tool Cups and Hanging Sorters.
- 18" deep Lockers with a Locker Slat Rail can accommodate Tool Cups (must be positioned to avoid interference with Valet Divider and Shelf)

18" Deep Lockers

24" Deep Lockers

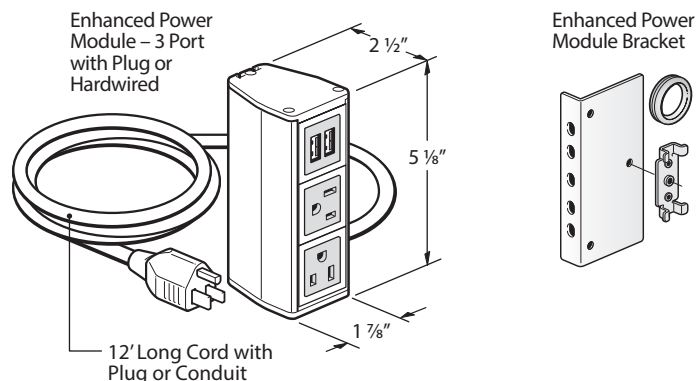

- Note**
- The Hanging Sorter should not be used with 18" deep Lockers since it would interfere with the Valet Divider and prevent the door from closing properly.
 - 18" Deep Lockers require that the Tool Cup be positioned on the Locker Slat Rail in a position providing adequate clearance from the Valet Divider.

- Tips**
- Consider placement of tools to prevent interference with interior valet divider, locker shelves, drawers, and hanging file frames.
 - The Beside Mini Shelf is not recommended for use on the Locker door, as items will slide off the shelf when the door is opened.
 - Other Belong Accessories will not fit due to interference with the Valet Divider.
 - Locker Slat Rails are constructed of painted aluminum and don't work with magnetic accessories.

Locker Power Components – Enhanced Power Module and Bracket

- The Enhanced Power module is designed to be used in open storage cavities of lockers, group lockers, cubby lockers, and combination units.

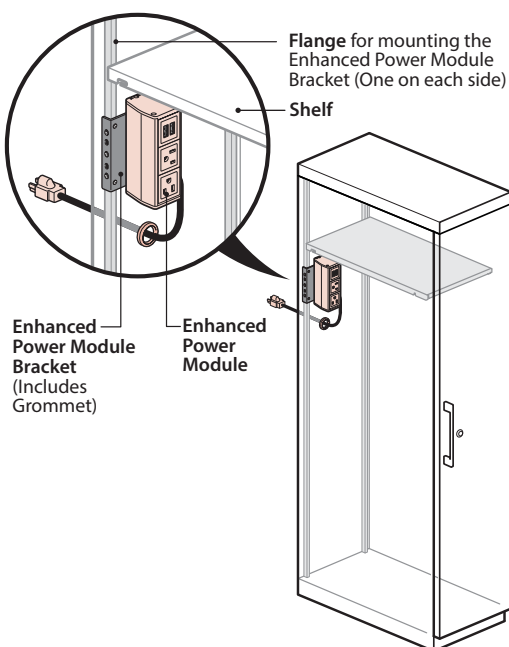

Enhanced Power Module – X Series Locker Applications

- The Power Module Bracket attaches to the flanges formed into the rear panel of the locker, allowing the power module to be attached anywhere vertically within the locker.
- Consider shelf location and desired placement of devices to be powered before installing power module.
- A gap between the Shelf and the back of the Locker allows for cable routing.

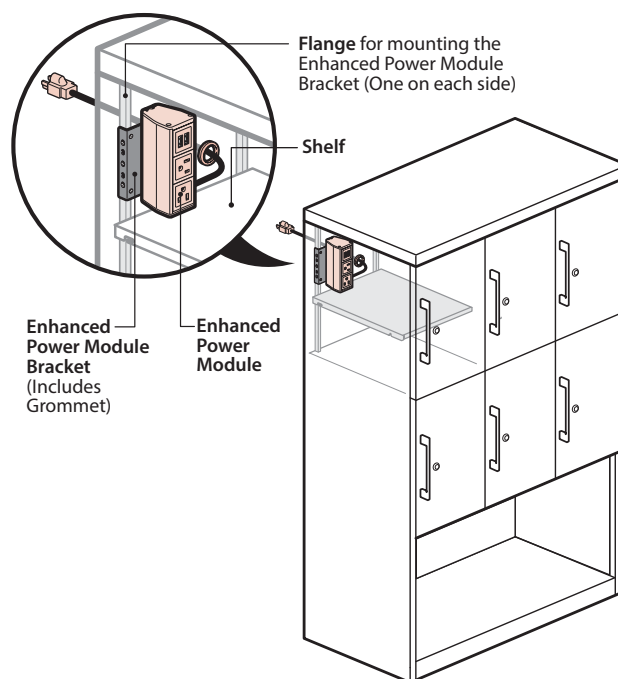

Locker – Power Application

- Shown with Power Module mounted under the Shelf.

Cubby Locker – Power Application

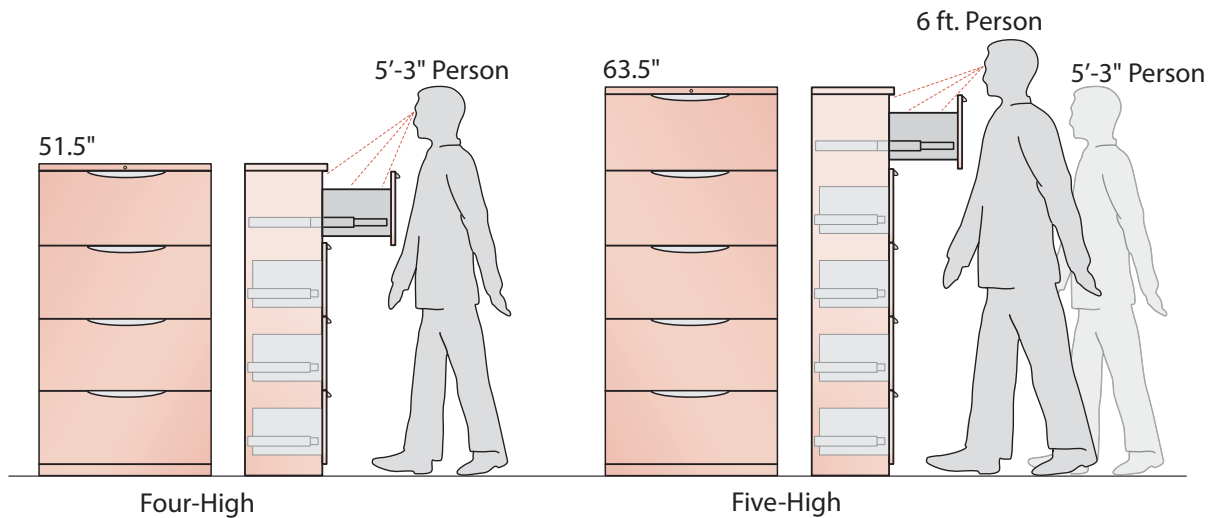

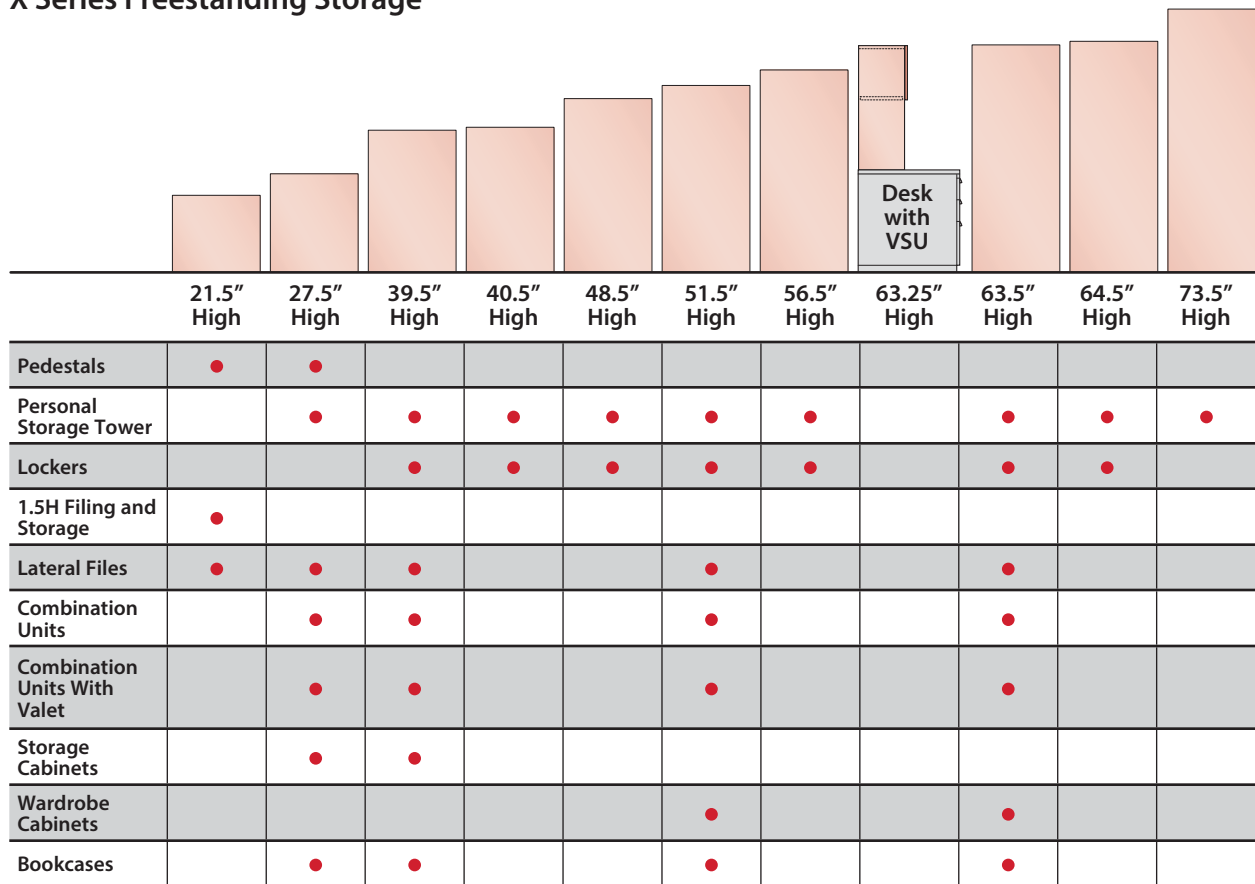

- Shown with Power Module mounted above the Shelf.

- Field drilling is required to route power cords out of the back of the lockers. Give consideration to the location of the hole to prevent it from being exposed above worksurfaces or panels.
- Lockers with Power Modules installed in them will require adequate clearance behind the locker to route cables.

Product Application – Height Comparisons

UniGroup and PLACES Systems Panel Heights Compared to X Series and V Series Storage

- Filing and storage product heights differ from most system panel heights. Storage must be specified to fall below or above the top of the panel.
- Uneven floors will require glide adjustment on storage and systems products to keep them level. This can affect the overall height by as much as 1 ½”.
- Some personal storage towers are available with casters, adding 3” to the overall height.

The following illustrations shows how X Series and V Series Storage Products integrate with varying height UniGroup and PLACES Panels:

Product Application – Height Comparisons

UniGroup Too Systems Panel Heights Compared to X Series and V Series Storage

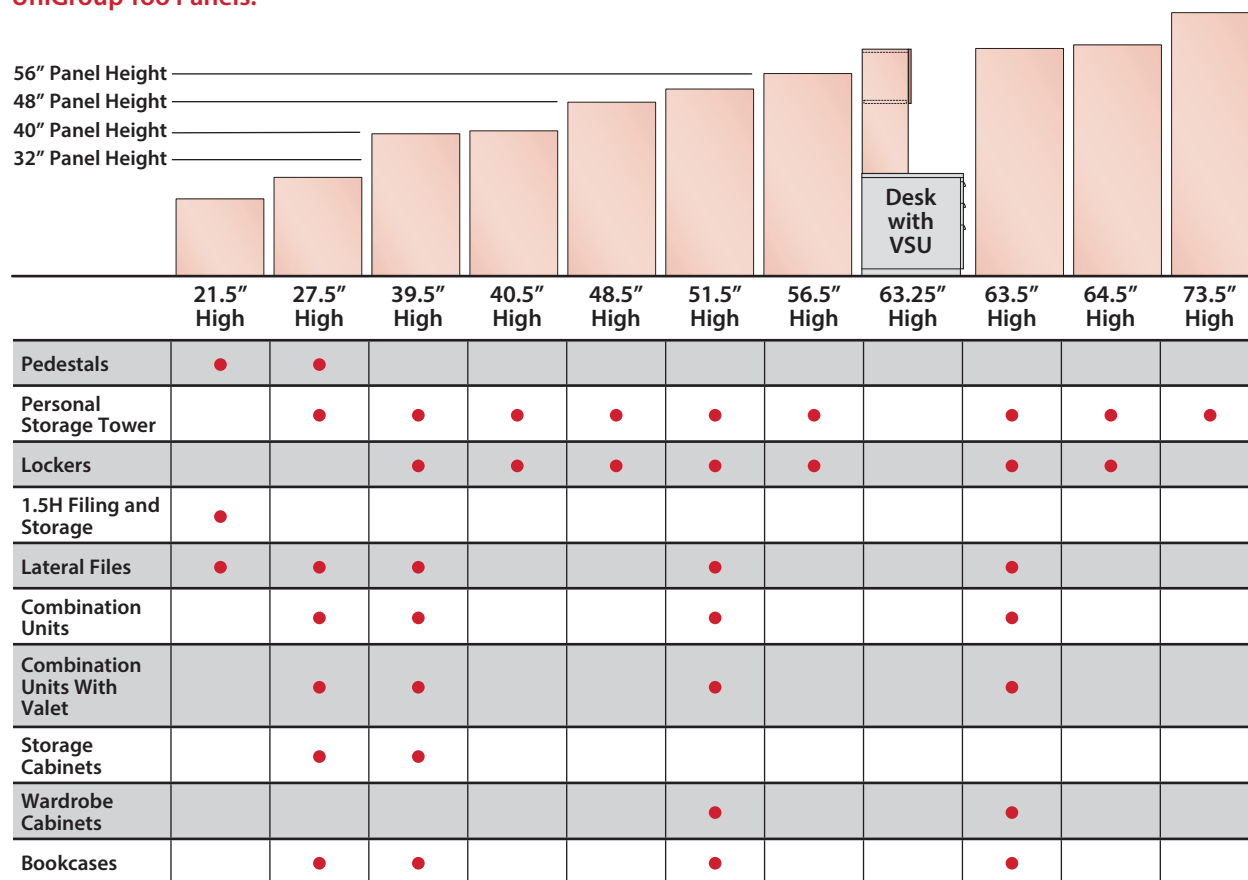

Personal Storage Tower in a Panel Application

Personal Storage Towers (PSTs) are not intended to be the same height as a panel system, therefore actual PST heights do not match system panel heights. The top of a PST falls either above or below the system's panel height based on the actual PST height. This height difference allows the desired aesthetic to be specified.

Additional height factors that can impact the overall application height and aesthetic:

- PSTs with Legs: adds 5½" – 7" to the overall PST height (legs are an option on specific PST heights only)
- PSTs with Casters: adds 3" to the overall PST height (casters are an option on specific PST heights only)
- Uneven Floors: requires glides to be adjusted on the system panel and/or the PST

Personal Storage Tower in a Panel Application

Personal Storage Towers (PSTs) are not intended to be the same height as a panel system, therefore actual PST heights do not match system panel heights. The top of a PST falls either above or below the system's panel height based on the actual PST height. This height difference allows the desired aesthetic to be specified.

Additional height factors that can impact the overall application height and aesthetic:

- PSTs with Legs: adds 5½" – 7" to the overall PST height (legs are an option on specific PST heights only)
- PSTs with Casters: adds 3" to the overall PST height (casters are an option on specific PST heights only)
- Uneven Floors: requires glides to be adjusted on the system panel and/or the PST

The following illustrations shows how X Series and V Series Storage Products integrate with varying height of Compose Panels:

COM Yardage Requirements

Procedure

To confirm approval of or request new approval for COM's, contact the **Haworth Inquiry Center (1.800.426.8562)**, or **<http://hub.Haworth.com>**, or **www.haworth.com** > **surface collection** > **COM Library** to determine if the COM you have selected has already been tested and approved for use on our product.

If the fabric is approved, and the directional orientation (directional rightway, directional railroad, or non-directional) of the tested fabric has been confirmed, then refer to the appropriate column in the chart for yardage requirements.

Steps to follow to calculate fabric usage:

- 1) Identify product type and size.
- 2) Determine method in which fabric is to be cut (directional rightway, directional railroad or non-directional).
- 3) Determine fabric roll width.
- 4) Find corresponding fabric usage value from the table.
- 5) Calculate fabric required using the formula below:

Fabric usage = number of units x number of sides with fabric x fabric usage (from tables) + C (constant).

Constant — Compose®, PREMISE®, PLACES® and UniGroup®

Product	C
Panels	2.5
Desktop Screens	1.5
Tackboards, Tackstrips	1.5
OSUs and Flipper Doors	1.5
LFBs and VSUs	1.5
Trim Covers (Finish Post, End of Run)	1.5
Stackable Pads	1.5
Add-ons and Wainscot Panels	1.5

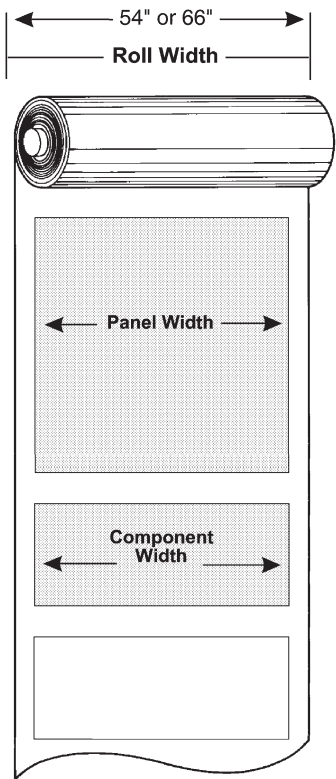

Constant — RACE®

Product	C
Desktop Screens	1.5
RACE Privacy Screens*	0.0
RACE Pads	0.0

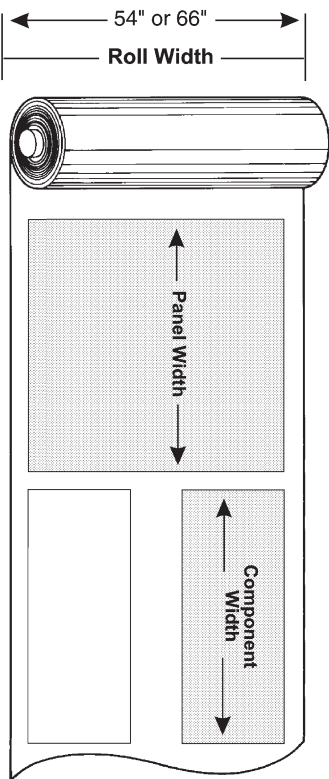

*Includes fabric for both sides. Sizes 51"-78" include two screens.

- 6) Repeat steps 1-5 for each product type, size and fabric.
 - 7) Add all values together to find total number of linear yards required for the order. Add the appropriate percentage shown below to the total yardage to accommodate fabric flaws, wrinkles and other imperfections.

Product Compatibility and Limited Warranty Policy

Great Expectations

You have them as a Haworth customer and so do we. And because we value our customers, we cover our products with the Haworth North America Product Compatibility and Limited Warranty Policy.

Our Commitment To Product Compatibility – Integrated Product Platforms

As a market leader in the design and manufacture of workspaces that adapt to change, we strive to maintain product compatibility within our various generations of integrated product platforms. In both circumstances, we often can provide products with comparable function and performance.
