# AIRCONE

DESIGNER	Stefan Borselius
CONTENT	Core: 100% Molded Polyester Felt Cover: 100% Polyester Felt (Air Series) or 100% NZ Wool (Focus & Mélange)
THICKNESS	3.3"
DIMENSIONS	20" (h) x 18.7" (w)
WEIGHT	.35 lbs
FLAMMABILITY	Inquire
ACOUSTIC	NRC: 0.85

APPLICATION	Wall, Ceiling
DESCRIPTION	Aircone is a sound absorbing module with a simple triangular design that is angled and tapered to permit sound diffusion. Component modules are made from molded polyester felt fiber and are available in many colorways. Half modules are also available to create straight edges in a design.

**BENEFITS**

**Designed for the Environment:** Aircone is manufactured on the basis of technical, environmental and production ethical requirements. There are no emissions to air, water or land during the production of Aircone. The sound-absorbent core of Aircone contains recycled materials. Aircone is recyclable.

**Installation:** Airbloom may be mounted to the ceiling or wall with a straight rail in two lengths, 59" or 78.75. Those rails can be joined or cut on site. Modules hook into one another using small plastic clips creating screen partitions.

**Improved Sound Absorption:** Aircone is ideal for high frequency absorption and achieves an NRC 0.85

**Accessories Provided:** Drop ceiling brackets to mount Aircone directly to a drop ceiling. A wire kit which includes (4) 118" wires, (4) wire locks and hardware to hang the rail a distance from the ceiling. A roller is also available allowing the Aircone modules roll along the rail, used in lieu of attachment clips.

**General Care:** To preserve the fabric color and appearance of the fabric, Air series modules should be vacuumed regularly with a soft nozzle.

**Stain Removal:** Use uncolored paper towels or cloths to soak up as much of the stain as possible. Dried stains should be vacuumed. Moisten the stain lightly with a clean white cotton cloth, lukewarm water, and possibly a small amount of pH-neutral detergent. Press a dry cloth or uncolored paper towel against the fabric so that moisture and dirt are absorbed. Repeat process until the stain is gone. Be sure to use clean water without detergent for the final treatment.
