DESCRIPTION

Scala Baffles are part of the Scala series by Anya Sebtón. The inspiration comes from the many houses in Iceland, where not only the roofs, but the facades too, are covered by corrugated iron. It gave birth to the idea of bringing it into the space. The design of the sound-absorbent Scala is not only developed for visual reasons, but primarily to contribute to a softer soundscape.

BENEFITS

Designed for the Environment: Scala is manufactured on the basis of technical, environmental and production ethical requirements. There are no emissions to air, water or land during the production of Scala. The sound-absorbent core of Scala contains recycled materials. Scala Baffles are recyclable.

- No VOCs
- California 01350 Emissions Compliant
- EPD
- HPD

Improved Sound Absorption: Scala Baffle is ideal for high-frequency absorption and achieves an NRC 0.65 rating.
