ACOUSTIC

NRC: 0.35 (see graph on following page)

APPLICATION

Screen

DESCRIPTION

Create a functional acoustic environment in your office with Softline table screens. The table screen consists of a sound-absorbent filling mounted within a solid wood frame. The screen is upholstered with fabric on both sides. Steel desk fittings (colors: black, white, and grey).

BENEFITS

Designed for the Environment: Softline is manufactured on the basis of technical, environmental and production ethical requirements. There are no emissions to air, water or land during the production of Softline. The sound-absorbent core of Softline contains recycled materials. Softline is recyclable.

- Mindful MATERIALS
- Low-VOC
- Declare CDHP Emissions Compliant
- EPD
- HPD

Improved Sound Absorption: Softline Table Screens are ideal for high frequency absorption and achieves an NRC 0.35.

Acrylic Top Divider: Acrylic glass tops for the Softline floor and table screens are available. The top bracket can be mounted directly from the factory, or it is easy to mount the brackets and acrylic top yourself, on an existing screen. The acrylic top is compatible with all models of floor and table screens in the Softline series.

Care: To preserve the fabric color and appearance of the fabric, Softline Table Screen should be vacuumed regularly with a soft nozzle attachment. To remove wet stains, use uncolored paper towels or a cloth to soak up as much of the wet stain as possible. Dried stains should be vacuumed. Moisten the stain lightly with a clean cotton cloth, lukewarm water and a very small amount of pH-neutral detergent. Press a dry cloth or uncolored paper towel against the fabric so that moisture and dirt are absorbed. Repeat process if necessary.

SOFTLINE TABLE SCREEN PERFORMANCE

Softline Floor Screen (NRC .75)
