Oval HD *Finish:* Wilsonart, 7850-60 Beigewood.
Trumpet HD *Finish: Wilsonart, 7850-60 Beigewood; Frame: Silver.*

Durability That Can't Be Beat

Made from rotationally molded polyethylene, the award-winning Hardi series is virtually indestructible. The one-piece construction of every model is a breeze to clean and extremely robust. Offering a complete family of products, the Hardi series gives specifiers the ability to bring Spec into more behavioral health applications.

Safety First
All products in the Hardi series are TB 133–compliant and meet seating durability tested to 500 lbs; the bed is static load tested to 1400 lbs.

Extra Weight
All Hardi seating and bed designs can be weighted on site with sand if desired. A spun-in cap on the underside closes the opening, secured with tamper-resistant fasteners.

Comforting and Calm

Blending safety and well-being into one contoured design, each product in the Hardi series offers comfort to the eye and to the user. Winner of the Best of NeoCon Gold Award for Healthcare Patient Seating, the Hardi rocker's soothing, yet subtle rocking motion provides relief and a place for reflection. Products in the Hardi series are available in six nature-inspired colors.

Hardi Rocker *Finish*: RAL 6021, Green; *Finish:* RAL 7015, Grey.

Hardi Dining Armless *Finish*: RAL 7037.
Hardi Club *Finish*: RAL 5014.

Sit Back and Relax

The Hardi club chair brings the look of the classic club-style chair to behavioral health facilities. The club chair creates a seamless transition between armrests and back, reducing ligature points. Chairs can be ganged together or fastened to the floor in high-risk patient spaces for added security.

For the Little Ones

Winner of the Silver Nightingale award, the Hardi children's model offers a safer seating solution for young patients. Fasten chairs to the floor or add extra weight on site using sand to keep them from being easily moved. The smooth contours of the roto-molded build make Hardi a child-friendly option for behavioral and healthcare environments.

Hardi Bedside Table *Finish*: RAL 5014.
Hardi Club *Finish*: RAL 7006.

Safe Retreat

Keep a consistent design throughout a facility using the Hardi series—all the way to the patient room. A roto-molded patient bed and bedside table with biophilic texture on the outer case bring an element of the outdoors in. Aesthetically pleasing, easy to clean, and, above all, comfortable, these models create calming personal spaces for patients. Care was taken when designing both products to prevent crevices or corners for patients to hide contraband.

Extra Security
The Hardi bed can be weighted on site with sand as needed, and both the bed and the bedside table can be fastened to the floor with concealed anchors for added security.

Comfort First
Urethane foam mattresses are available in a 4" thickness with or without a built-in pillow and a 6" thickness without a built-in pillow. Tamper-resistant vinyl mattress covers are optional with pillow-free mattresses.

Choose Your Hardi

The collection features 10 designs that can be placed anywhere, from the most clinical of settings to calming therapy rooms.

It's All in the Details

To make sure every need is met, the Hardi series seating products, features and options address the requirements of behavioral health spaces.

Hardi sits tightly to the ground. Nylon glides are optional.

Shallow hand grips make Hardi designs difficult to pick up yet easy to adjust while seated.

Optional ganging brackets allow users to connect seating together when glides are specified.

As an extra safety measure, floor-mounting straps are available for seating models (excluding rockers).

Finishes

Create a welcoming environment with Hardi by choosing from six earthy colors that match our Spectone RAL offering.

Hardi for Every Space

We've partnered with Cortech USA to bring you additional molded designs, each carefully crafted for quality and strength. Designed to work seamlessly with the entire Hardi collection, the new products round out the robust collection and can fill every patient area, from supervised to unsupervised.

From activity spaces, patient rooms, to cafeterias and beyond, Hardi has a solution—all models feature the same durable build.
