

ENVIRONMENTAL BEST PRACTICES

Inspired by nature. Proud to protect it.

CAMBRIA® NATURAL STONE SURFACES

BRITTANICCA™

CARING FOR THE ENVIRONMENT FROM START TO FINISH

Cambria® practices transparency and environmental responsibility from raw mineral procurement all the way through manufacturing and finishing processes to create beautiful natural stone surfaces that make a big impact in any space, but not on the environment.

CONSCIENTIOUS PROCUREMENT

- Our quartz is responsibly procured from sources including our own mine.

PROTECTING INDOOR ENVIRONMENTS

- Cambria is NSF 51 certified safe for use as a food preparation surface.
- Cambria has earned Greenguard Gold Certification for low VOC emissions.
- Cambria can contribute to US Green Building Council's LEED v.4 program in areas such as Indoor Air Quality.*

PRODUCT TRANSPARENCY

- Cambria is listed as Health Product Declaration (HPD) v2.1 which promotes transparency for projects focused on sustainability, wellness, and environmental responsibility.
- Cambria is Living Building Challenge (LBC) compliant and our Declare Label has no Red List or EPA/COC/REACH chemicals.
- Cambria is part of the mindful MATERIALS product certification library for product transparency and product sustainability information.

WASTE REDUCTION

- We recycle 100% of the water used in the slab production process, saving an estimated 1.6 billion gallons annually.
- Optimized transportation to and from our mine leaves a smaller, greener carbon footprint.
- 100% of the power used at our mine is hydroelectric.
- The Cambria Processing Facility uses only energy-saving LED lighting.
- All metal tooling is recycled.
