

JumpSeat®

The Evolution of the JumpSeat

There are many paths to innovation. And there's no telling what will inspire the next breakthrough design. For fixed seating, transformation began in Portland, Oregon when Ziba Design needed an auditorium chair to fit the narrow risers of its new space. The immediate challenge was geometric – how to make a seat that could support an adult and nearly disappear when not in use. The answer was the revolutionary JumpSeat, a sleek and compact chair that closes to as little as 4 inches deep.

Sedia Systems launched the JumpSeat globally in 2012, and the industry quickly recognized the beauty of its form and function. Inspired by more than 15 awards, Sedia Systems continues to innovate and enhance the JumpSeat product line. The Collection now consists of the JumpSeat, JumpSeat 90, JumpSeat Wall and JumpSeat WOW.

JumpSeat Collection

Each version of the patented JumpSeat builds on the same baseline features. Its distinctive design combines the rigid compression elements of a cantilevered bridge with the more flexible tension components found in the human spine. The compressive and tensile strength of birch plywood and steel produce the chair's innovative folding mechanism. The JumpSeat's space-saving characteristics allow healthcare, education and corporate facilities to use the chairs throughout their environments.

JumpSeat WOW allows direct custom printing on any version of the JumpSeat to truly customize any space.

Features

- Flex spring seat cantilevers without hinges
- Tested to 600 lbs
- Straight or radius row configurations
- Flat, sloped or tiered floor installations
- Antimicrobial product protection

Finishes

- TEXTILES: Fabric or Coated Fabric
- SURFACES: Birch Plywood (natural or stained), White Oak Veneer or Laminate
- BASE: Black or Silver

JumpSeat

The award-winning JumpSeat is well-suited to spaces that require flexible and compact seating. Available with a fixed or movable base, the JumpSeat sits at a compact and comfortable pitch. The fixed base version features 22" minimum center-to-center seat spacing that works especially well in lecture halls and auditoriums.

JumpSeat | Fixed Base

JumpSeat WOW | Movable Base

JumpSeat 90

The JumpSeat 90 combines the innovative features of the JumpSeat with the space-saving benefits of the JumpSeat Wall. Sitting at 90 degrees, this chair is floor mounted and flush to the wall, ideal for additional seating in narrow corridors, boardrooms, small offices and library stacks.

JumpSeat 90

JumpSeat Wall

The award-winning JumpSeat Wall is the perfect seating solution for space-constrained areas. Its innovative folding mechanism allows the seat to cantilever off the wall, making it ideal for corridors, patient rooms, waiting rooms and other public areas where space is at a premium. The chair is mounted 6" off the floor to facilitate cleaning, and its slim profile—less than 4" when closed—maximizes space.
