Alia

Contrasting materials for unique appeal

**Alia Stool**  
**Designed by Cumberland**

Appealing contrasts between solid wood and fine upholstery give Alia barstools their unique appeal. A hardwood frame serves as the foundation. A natural wood panel extends partially up the stool's back until it meets the upholstery and the juxtaposition of materials creates a pleasing contrast. The rounded forms of the plush, upholstered seat and back harmonize with the crisp edges of the chair's frame and legs.

Wood and upholstery complement one another for a unique appeal

Counter and barstool heights make Alia appropriate for a number of uses

**Specifications**

The stool is available with an upholstered seat cushion. The frame is constructed of maple veneer and solids, with double-dowel construction and corner blocked legs and rails. Legs have nylon glides. The seat is 2"-thick, multi-density polyurethane foam. Catalyzed lacquer finish in all Cumberland Maple finishes.

**Options**

- Finishes: Standard and custom finishes on Maple
- Stretcher: Standard is wood. An optional metal covering is available in polished or satin stainless steel. Statuary Bronze is also available
