

Specifications

Sectional seating and tables designed with multiple back and side options of different height, thickness, and material. Maple, Walnut, Oak, Option A Exotic veneers and laminate are available on the back and sides. Differing heights and thicknesses create varying levels of privacy for the end user and can add architectural interest to large spaces. A flat back design allows the designer to specify the sections back-to-back. Formaldehyde free Catalyzed Polyurethane in all Cumberland finishes. An optional 0.5" solid surface top is also available on all thick walls or table surfaces. These products have been independently certified to meet or exceed ANSI/BIFMA X7.1/LEED EQ4.5 standards and as such can be used for LEED points. Seat depth is 20.75"

Options – Specify:

- Top: Maple veneer self-edge tops are standard. Thick walls are also available with a 0.5" Glacier White Solid Surface with an eased edge and matte finish.
- Wood: Maple veneer is standard; Walnut, Oak, and Option A Exotic veneers may be specified at an additional charge. Laminate is also available for the same price as Maple.
- Finishes: Available in any standard MP finish on Maple, any premium WL finish on Walnut, any premium WO finish on White Oak, or any Option A Exotic species/finish selection. Custom finishes are also available. Note: All seating has a 1" wood platform at the bottom, so all pieces will require a finish choice.
- Metal: Polished or Satin Stainless Steel. Statuary Bronze and Painted Metal are available for an additional charge of \$375 list per item. Polished Brass is optional, add \$1125 list per item.
- Corner Units: Each Upholstered Corner Unit must be specified as Left Side Facing (LSF) or Right Side Facing (RSF).
- Armrests: Optional adjustable position armrests can be attached to any curved or straight section unit and can be located at any position, end-of-unit or center. Optional end-run armrests can be attached to the end of any straight 1-, 2-, or 3-seat section. Specify as LSF, RSF or both sides. These use the same fabric as specified on the seat and same metal finish as specified on legs.

Overview and Application

Walls

- Back and side walls are Maple veneer. Walnut, Oak, and Option A Exotic woods and laminate can also be specified. Walnut, Oak, and Option A Exotic veneers have an upcharge.
- 4 heights; Bench-17", Chair-29", and 41" and 51" Walls.
- Two thicknesses of walls; thin is 1" and is the lower cost alternative. Thick are 7" and allows a more creative use of space as well as creating additional work surfaces for study or work materials.
- Cerused finishes are not available as we can't guarantee finish alignment between the modular pieces.
- Different walls heights can be ganged together if that is the desired look.
- All items can be ganged with each other, but generally speaking, if the desired look is to have all the backs flush, use the Thin with Thin and Thick with Thick. You can put Thin to Thick, but the Thick backs will be offset by 6". The seats are all the same depth.

Solid Surface tops

- ½" Solid surface material is available as an option on top of all thick walls and table surfaces. This adds ½" to the overall height of the table or wall. On the short walls, this ½" sticks up above the upholstery.
- Glacier White is the standard solid surface color. Other Corian solid surface colors are available and Grades A-D are in the price list as Special Color upcharges. For other grades and colors, please call for pricing.

Armrest Option

- Optional adjustable-position armrests can be attached to any curved or straight section unit and can be located at any position, end-of-unit or center. These units are ideal for dividing space when personal space is required.
- Optional end-run armrests can be attached to the end of any straight 1, 2 or 3 seat section. Specify as LSF, RSF or both sides. This will transform 2745-2748 into lounge chairs, 2749-2752 into 2-seat sofas and 2753-2756 into 3-seat sofas. Additional cost of \$295 for each arm. These use the same fabric as specified on the seat and same metal finish as specified on legs.

Thick and Thin

Power Data Options

- **Table Top Power Data** is available in matte silver or black finish. Unit contains 2-grounded simplex outlets, 2-1 amp USB Outlets, w/ a 6' 15 amp cord, UL approved. Hardwiring is available as an option. Unit is located in the center of the table.
- **Under Seat Mount Power Data** is only available in a black finish and contains (2) grounded simplex outlet, 15-amp circuit. The device has a 6' power cord and is not available hardwired. This unit is shipped loose and installed at job site in the desired location.

Ganging Mechanisms and Installation Notes

- Each Thick & Thin item will ship with two ganging mechanisms by default.
- Ganging mechanisms, attached laptops, under seat power/data are all installed on site. Assembly instructions are provided.
- All items are shipped with levelers. Items will need to be leveled for the gaps between adjacent walls to be minimized and flush. Items need to be leveled before engaging ganging mechanisms.
- Inside Curved sections are quite large and ship assembled. Please check all entry clearances before ordering.

Half Tables

- Ganged seating allows for an infinite ganging of sections with a half table divider allowing a greater sense of privacy. The power data option with (2) 110 outlets and a powered USB port built into the tabletop allows users to power their laptops and charge PDAS and mobile phones.
- The half tables, (with and without power data) need to be specified as a part number on orders.

Overview and Features

Corner Unit Fabric Directions

In order to create a consistent pattern across seats in the configuration, 90 degree square or curved seating with corner units using directional patterned or striped fabric should have the direction of the fabric specified in writing and with a sketch at the time of order. Each corner unit needs to be described as either a Left Side Facing (LSF) or a Right Side Facing (RSF). In the absence of specific instructions, Cumberland reserves the right to upholster units at our discretion and we cannot guarantee a match with the configuration that you are using.

**Left Side Facing
Fabric Orientation**

**Right Side Facing
Fabric Orientation**

Fabric Orientation and Direction

The default direction of a directional patterned or striped fabric on the seat is always front to back on the seat and up and down on the backs. On all three-seat sectionals with any directional patterned or striped fabric, the stripe will run back to front. Certain textiles involve geometrically designed patterns that run both vertically and horizontally. Some Thick and Thin models, due to their naturally curved design, do not lend themselves aesthetically to a two-way pattern application. Units that curve out and in when connected and upholstered in geometrically designed patterns may appear to smile or frown from unit to unit as the pattern connects. Also, products with a curved design do not lend themselves well to stripes or large patterns as perfect alignment at seam cannot be achieved on this product. They are therefore not recommended.

Multiple Fabric Charges

Multiple fabrics may be specified on the seat and the back; a \$150 list price upcharge applies. Please provide a sketch or signify clearly on the order, which fabric is the back and which is the seat. When specifying multiple fabrics in different price groups, the higher price material will be used for calculating the price. Note: The vertical seat face cannot be specified in a different material than the seat top.

Yardage Calculations

Yardage amounts are based on fabric that is plain (i.e. non-directional) and a full 54" width. Large repeats may affect the quantity of the fabric that is needed.

Fabric and Leather Stretching

Some fabrics and all leathers naturally stretch with use and seat fabric tautness will vary depending upon the amount of stretch in the fabric/leather. Because of this natural stretch, the seat may appear loose with comfort wrinkles over time. We have engineered the products to minimize this, but in some cases and with some fabrics and leathers this is unavoidable and not the fault of manufacturing.

Fire Code Seating

Our upholstery standard is to meet the requirements set forth in the State of California Bureau of Home Furnishings and Thermal Insulations Technical Bulletin 117. However, for an additional charge we will add the required materials to meet the requirements set forth in the State of California Bureau of Home Furnishings and Thermal Insulations Technical Bulletin 133. Those upcharges are shown below in list price per item. If product testing or testing documentation is required, an additional charge will apply.

Thick and Thin

Information required to specify

1. Model Number: _____
2. Description: _____
3. Quantity: _____
4. Wood Species/Laminate: _____
5. Seat Fabric/Leather: _____
6. Corner Fabric Orientation: _____
7. Metal Finish: _____
8. Wood Finish Color: _____

Standard Includes

1. Maple veneer in any of our standard finishes
2. Metal Legs in Polished or Satin stainless steel
3. Matching seat and back Fabric/Leather
4. CAL117 Fire Code

Options

Numerous options exist for each piece. Determine the options using the list below and add to your specification.

Seating Options and Upcharges

1. Veneer Species:
 - a. Oak/Walnut
_____ Add \$220 upcharge to item price
 - b. Option A Exotic Veneer:
_____ Add upcharge from Item Price Matrix
2. Fabric Orientation on Corner Units:
 - a. Left Side Facing Corner Unit:
_____ Add suffix LSF to Model Number
 - b. Right Side Facing Corner Unit:
_____ Add suffix RSF to Model Number
3. Metal Finish:
 - a. Statuary Bronze/Painted Metal:
_____ Add \$375 upcharge to item price
 - b. Polished Brass:
_____ Add \$1125 upcharge to item price
4. Arm Rest Option:
 - a. End Run Left Side Facing, Qty 1:
_____ Specify model 2744-LSF, +\$556
 - b. End Run Right Side Facing, Qty 1:
_____ Specify model 2744-RSF, +\$556
 - c. End Run Left and Right Side, Qty 2:
_____ Specify model 2744-LR, +\$1112
 - d. Adjustable Location Armrest
_____ Specify Model 2765, +\$339
5. Contrasting Back Fabric/Leather:
 - a. Contrasting
_____ Add \$150 upcharge to item price
6. Power/Data:
 - a. Under Seat Mount, Power Only, Black:
_____ Specify model 2801, +\$405
7. Solid Surface Top for Thick Wall:
 - a. Glacier White Solid Surface:
_____ Add upcharge from Item Price Matrix
 - b. Grade A-D Corian (Special Solid Surface):
_____ Add upcharge from Item Price Matrix
8. CAL133 Fire Code (see page 137):
 - a. Back Cushion Yardage (0-1.25 yards per piece):
_____ Specify CAL133, +\$280 upcharge to item price
 - b. Back Cushion Yardage (1.26-2.74 yards per piece):
_____ Specify CAL133, +\$440 upcharge to item price
 - c. Back Cushion Yardage (2.75-3.5 yards per piece):
_____ Specify CAL133, +\$600 upcharge to item price
9. Bolsters:
 - a. Bolster, Qty 1:
_____ Specify model 2799, See Item Price Matrix

Table Options and Upcharges

1. Veneer Species:
 - a. Oak/Walnut
_____ Add \$220 upcharge to item price
 - b. Option A Exotic Veneer:
_____ Add upcharge from Item Price Matrix
2. Metal Finish:
 - a. Statuary Bronze/Painted Metal:
_____ Add \$375 upcharge to item price
 - b. Polished Brass:
_____ Add \$1125 upcharge to item price
3. Solid Surface Top for Thick Wall:
 - a. Glacier White Solid Surface:
_____ Add upcharge from Item Price Matrix
 - b. Grade A-D Corian (Special Solid Surface):
_____ Add upcharge from Item Price Matrix
4. Solid Surface top for Table Top Surface:
 - a. Glacier White Solid Surface:
_____ Add upcharge from Item Price Matrix
 - b. Grade A-D Corian (Special Solid Surface):
_____ Add upcharge from Item Price Matrix
5. Power/Data:
 - a. Under Seat Mount, Power Only, Black:
_____ Specify model 2801, +\$405
 - b. Table Top Power/Data; Black or Silver:
_____ Specify model 2802, +\$650

Curved Corner Sections

Designed by Charlie Kane of XLG

Thick and Thin Modular

Available in either 90° or 45° sections. 29" and 41" walls can be ganged together, if that is the desired effect. The default direction of a directional patterned or striped fabric on the seat is always front to back on the seat and up and down on the backs.

Unique Product Options – *Specify:*

Fabric: In order to create a consistent pattern across seats in the configuration each corner unit needs to be described as either a Left Side Facing (LSF) or a Right Side Facing (RSF).

Top: Thick walls can be specified with a ½" Corian top surface.

Straight sections are available in 24", 48", or 75" lengths.

Unique Product Options – Specify:

Top: Thick walls can be specified with a ½" Corian top surface.

Armrests: Optional armrests can be attached to the end of any straight 1-, 2-, or 3-seat section. Specify as LSF, RSF or both sides (LR). Arms use the same fabric as the seat and same metal as on legs.
