# Power/Data

Cumberland's line of power/data modules is available for use in the Metros conference tables. A wide variety of data and communication modules are available to meet your specific power and data needs through a range of aesthetic and functional options. All of these solutions have appropriate wiring channels below the work surface. Wire routing and an access door will also be included in the table bases. These power and data wire management systems are some of the finest and best looking on the market. These units not only put data and electric hook-up right at your fingertips, they also allow you to change your data modules as your needs change. Each of these units (except 5006) can also be configured for hard wire installations.
