Altitude® A8

Companies are shifting away from more traditional panel walls in search of options lighter in scale that don't sacrifice the benefits of private workstations. The result is a more collaborative and agile work environment that responds to the changing needs of business.

Altitude® A8 and Radii™ transform a standard height adjustable table into a fully functional and agile workstation. Here are seven applications that include a variety of adaptability, storage options and price ranges. Use these as inspiration to create a workspace that supports the needs of your individual users.

Allsteel®

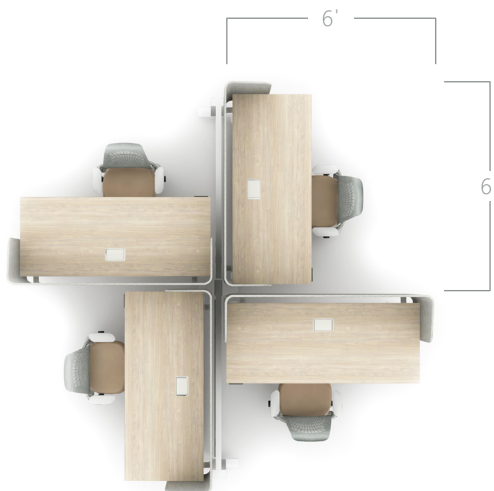

Cross-Platform Application

Allsteel®

ALTITUDE® A8 + RADII™

This unique configuration breaks the mold with an efficient workspace solutions that keeps teams connected while maintaining privacy. Configure in linear or pinwheel shapes using the same kit-of-parts. Height-adjustable tables are equipped with undermount personal storage that moves with the worksurface.

Allsteel®

Maximum Adaptability

ALTITUDE® A8 + RADII™

Allsteel®

How do you optimize user adaptability? By offering a specific place for everything and a lightness of scale to keep users agile. Clutter is visually organized within alcoves built into the workstation and storage. Height-adjustable tables on slide glides provide users the freedom to change, and change again.
