

the

ethos

of  
water

## **ethos** by SONOBATH.

Your first glimpse tells you this is much more than a vessel sink, it's an interactive sculpture.

Each piece is hand crafted in caesarstone by our artists at SONOBATH's California studio. The goal was to define the space between art and design, form and function, structure and romance. As you run your fingers over each honed, perfect plane and marvel at its disarming combination of simplicity and complexity, there will be questions...

*Where does the water go?*

To answer this you'll have to buy one, for everything else visit our website at **[www.sonobath.com](http://www.sonobath.com)**.
