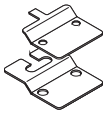
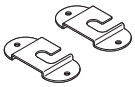
## Requirements for Freestanding Applications

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

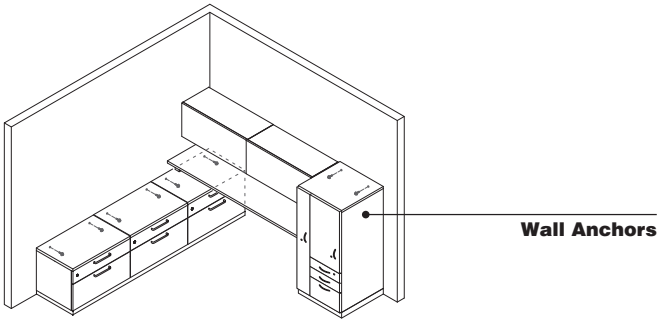
1. Counterweights are not required for lateral files, towers, cabinets, and bookcases anchored to the floor.



**Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base)** secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.
*Note:* **Local seismic requirements vary.** *Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials.*
*Tip: Anchor bracket cannot be used with pedestals.*

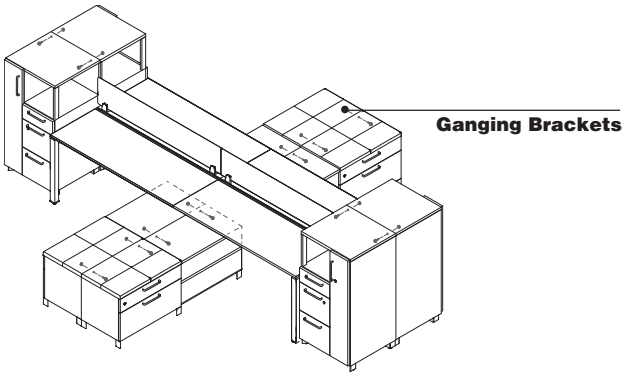


Floor anchor brackets for Universal with FrameOne foot secure lateral files and towers to the floor for stability or in seismic zones to reduce the risk of hazards during earthquakes.
*Note:* **Local seismic requirements vary.** *Compliance with local code requirements is the responsibility of the customer or their authorized agent.*



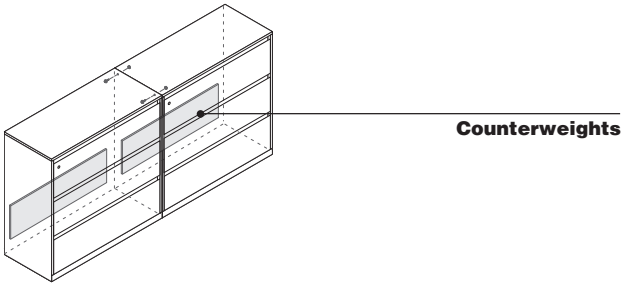
2. Counterweights are not required for lateral files, towers, cabinets, and bookcases anchored to the wall.

For wall anchoring of lateral files, towers, cabinets, and bookcases, consult with the building's designated design professional (architect or engineer) and work with local codes authorities for approvals to ensure adequate support when product is fully loaded.



3. Counterweights are not required for lateral files, towers, cabinets, and bookcases ganged back-to-back with ganging hardware.

TS Series towers which do not include ganging hardware, order *8425808SR* from Service Parts.

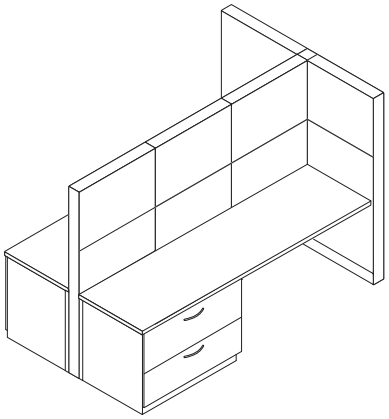


Units ganged side-by-side **require** counterweights.

## Requirements for Panel Applications

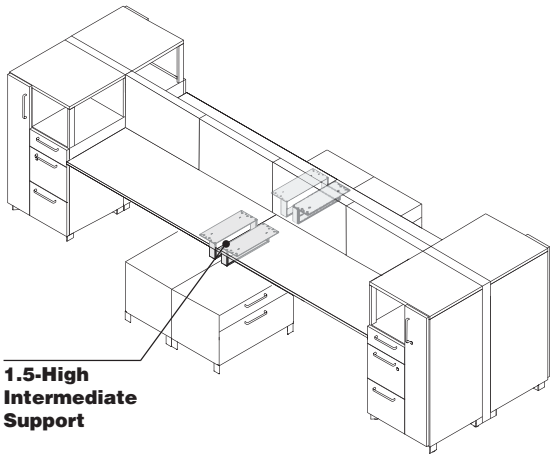
Panel stability guidelines must be met prior to determining counterweight requirements.
▶See *Panel Stability Guidelines* in the appropriate panel specification guide. (Storage may support panel stability)

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

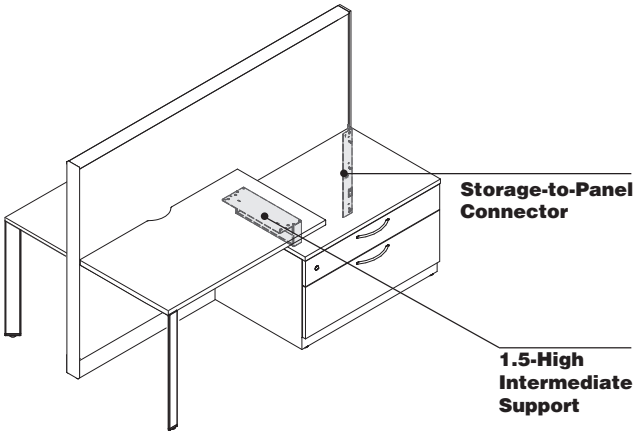


1. Counterweights are not required for Two Drawer lateral files installed right below a worksurface attached to the panel system when the application is mirrored back-to-back (a two-pack minimum).

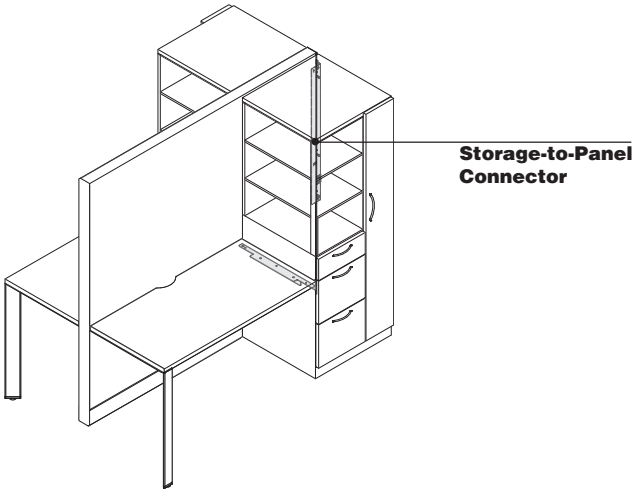
TS Series underworksurface lateral files are only intended for use under a panel-mounted worksurface and cannot be used as freestanding.



2. Counterweights are not required for One-High and 1.5-High lateral files and cabinets used with an intermediate support, when the application is mirrored back-to-back (a two-pack minimum).
*Note: This includes storage either perpendicular or parallel to the panel.*



3. Counterweights are not required for One-High, 1.5-High, and Two Drawer lateral files and cabinets used with a storage-to-panel bracket to support the panel run if the application is mirrored back-to-back (a two-pack minimum) and the panel run is equal to or greater than 6'.

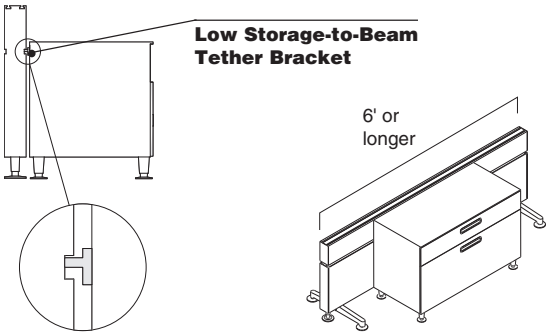


4. Counterweights are not required for towers used with a storage-to-panel connector to support the panel run, if the application is mirrored back-to-back (a two-pack minimum ) and the panel is equal to or greater than 5'.

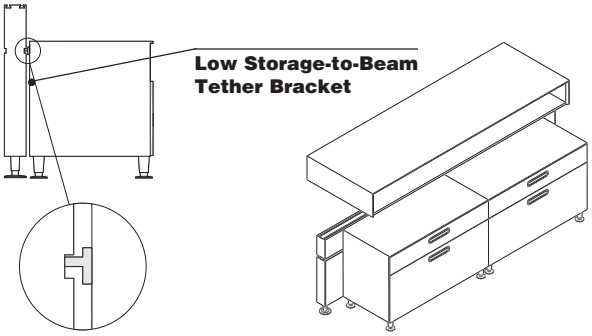
## Requirements for c:scape Tethered Applications

c:scape stability guidelines must be met prior to determining counterweight requirements.
▶ See *c:scape Stability Guidelines* in the *c:scape Specification Guide*.

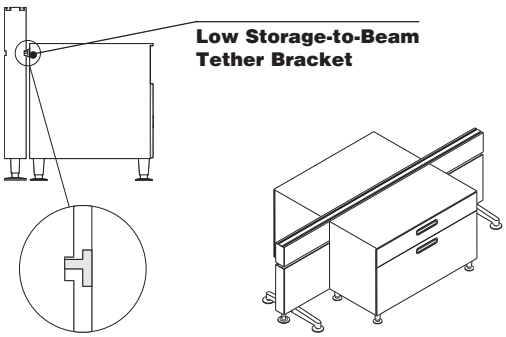
Counterweights are required as shown in the product specification pages unless any of the following conditions are met:



1. Counterweights are not required for a 1.5-High lateral file and low storage 48"W or smaller tethered to a c:scape beam when the beam width is 6' or larger.



2. Counterweights are not required for 1.5-High lateral file and low storage tethered to a c:scape beam when the beam has mid storage mounted parallel and the beam length is equal to or greater than the combined low storage width.

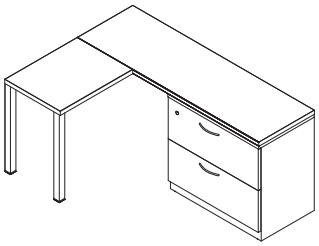


3. Counterweights are not required for 1.5-High lateral file or low storage tethered to a c:scape beam when the storage is the same size and mirrored back-to-back on both sides of the beam.

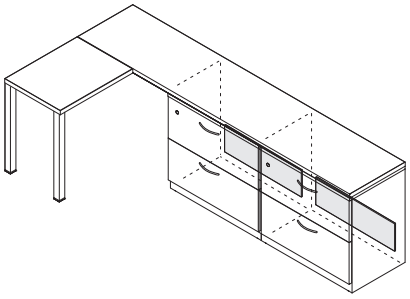
## Requirements for Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.
▶See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide*.

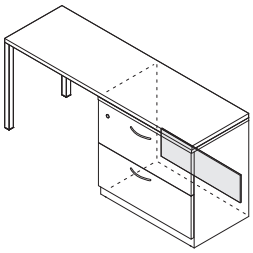
Counterweights are required as shown in the product specification pages unless any of the following conditions are met:



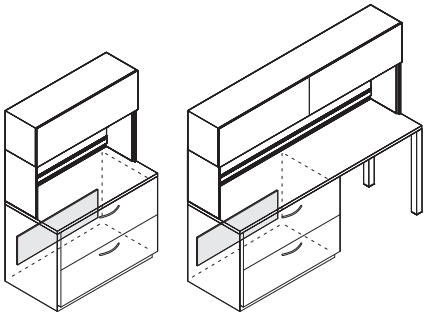
1. A counterweight is not required for a single Two Drawer lateral file attached to desks connected in an L-configuration.



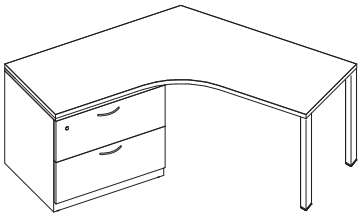
L-configurations with two or more lateral files **require** counterweights in each file.



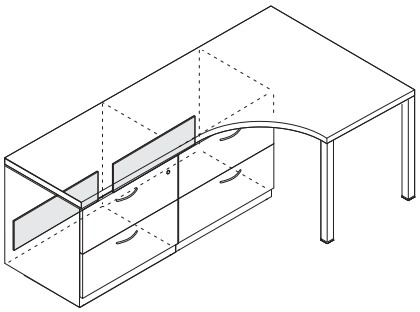
Counterweights are **required** for all lateral files in stand-alone desk or credenza applications.



Hutch kit applications with lateral files always **require** counterweights in the lateral files.



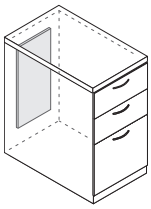
2. A counterweight is not required for a single Two Drawer lateral file attached to a desk made with corner, extended corner, or 120° corner worksurfaces.



Configurations with two or more lateral files **require** counterweights in each file.

## Requirements for Pedestals in Freestanding Applications

Counterweights are required for all freestanding applications.



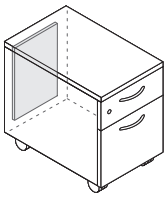
1. Universal fixed pedestals converted to freestanding pedestals require a counterweight.

Universal fixed to freestanding pedestal conversion kit includes ⅛"H steel top and counterweight package.

Fixed pedestals, converted to freestanding with a laminate or veneer top, require a counterweight.

TS Series fixed pedestals are only intended for use under a panel-mounted worksurface and cannot be converted to freestanding.

Laminate fixed pedestals can never be freestanding.



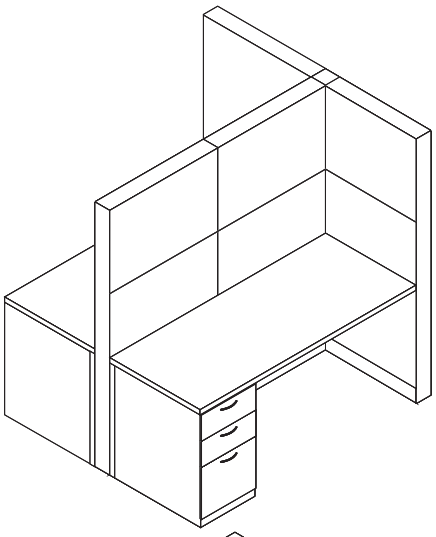
2. Mobile pedestals include counterweight as standard.

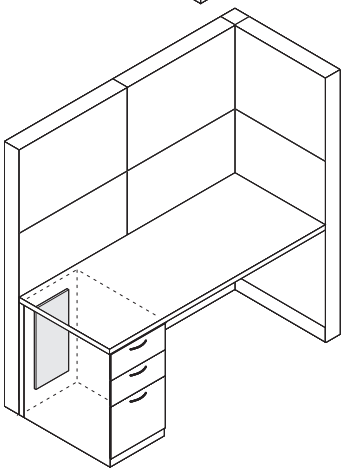
## Requirements for Pedestals in Panel Applications

Panel stability guidelines must be met prior to determining counterweight requirements.

▶ See *Panel Stability Guidelines* in the appropriate panel specification guide.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:



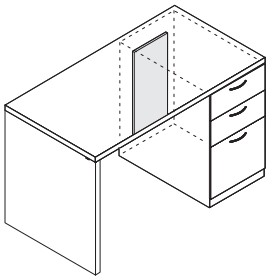


Counterweights are not required for fixed pedestals installed below a worksurface attached in a panel spine application. Single workstation applications **require** a counterweight in each pedestal.

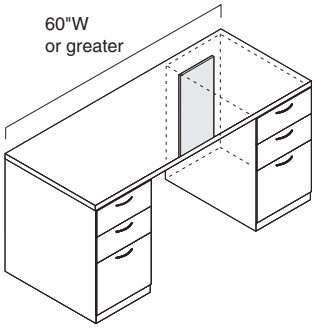
## Requirements for Pedestals in Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.
▶See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide.*

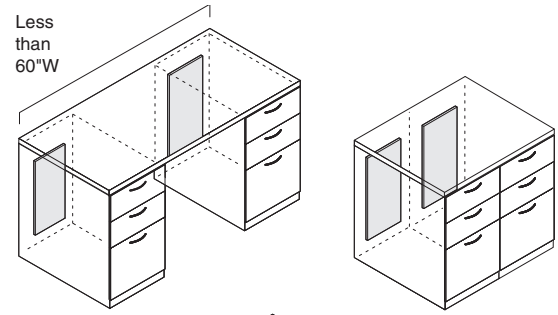
Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

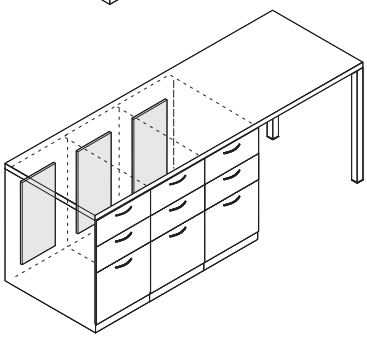


1. Single pedestal desks less than 48"W require a counterweight. Single pedestal desks with 30"D pedestals require a counterweight.

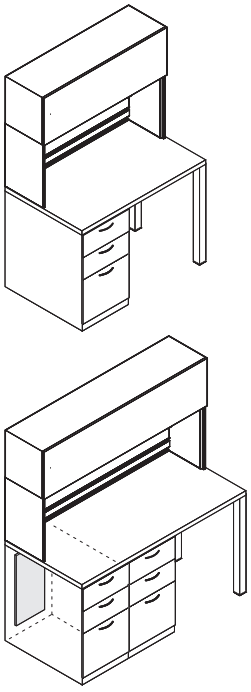


2. Double pedestal desks 60"W and wider only require one pedestal with counterweight.



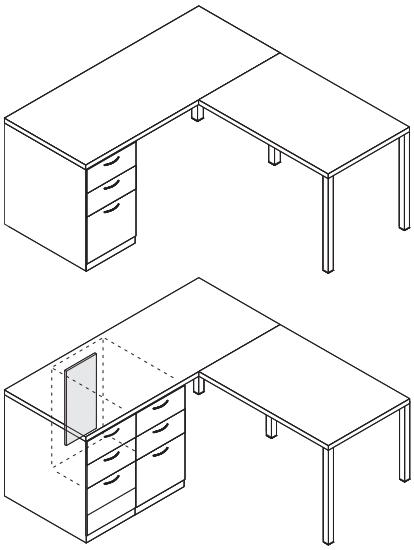


All other desk applications with multiple pedestals **require** a counterweight for each pedestal.

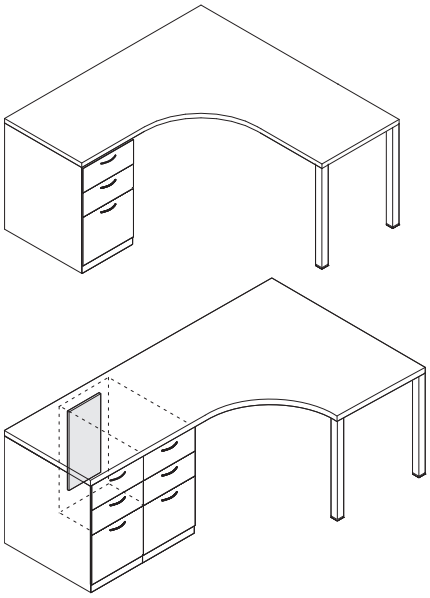


3. Counterweights are not required for a single fixed pedestal in desk with hutch kit applications. Any additional pedestals within the application **require** counterweights.

## Requirements for Pedestals in Answer Freestanding Desk Applications, continued



4. A counterweight is not required for a single fixed pedestal attached to a desk attached to another worksurface in an L-configuration. Any additional pedestals within the application require counterweights.



5. A counterweight is not required for a single fixed pedestal attached to desks made with corner, extended corner, or 120° corner worksurfaces. Any additional pedestals within the application require counterweights.

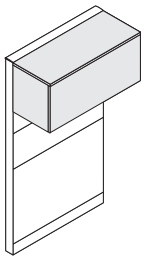
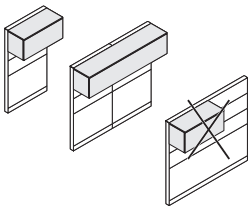
## On-Module Brackets and Hooks



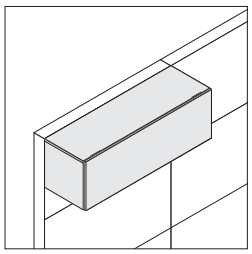
**On-module brackets and hooks** are used to mount overhead bins and universal shelves to panels with vertical slot patterns. Answer, Kick, Avenir, and Montage panels can support on-module attachment brackets.

**Universal personal shelves** can attach on-module to all panels except Montage.



**Width of overhead storage unit** must match the width of the panel or panels that it is attached to. Storage bins or shelves may span up to two panels.

**Additional support** for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on the opposite sides of the panels increases stability.
*Tip: See* Stability Guidelines *in each corresponding specification guide.*



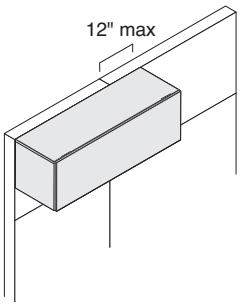
**On-module attachment brackets** install in panel seams.

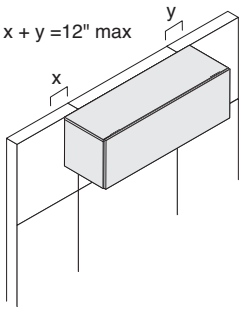
**On-module brackets** can be used above and adjacent to slatwall on Answer and Montage panels.

**On-module brackets** can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

**Off-module brackets** are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

## Off-Module Brackets

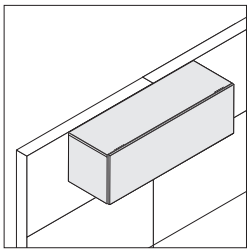




**Vertical off-module brackets,** optional, can be used to mount one or two sides of the overhead bin off-module on Answer, Kick, Avenir, Montage, and V.I.A. with vertical-slot-patterned panels. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin. Vertical off-module brackets allow bins to be installed a maximum of 12" off-module. Vertical off-module brackets can be used with 30"W to 60"W Montage bins only.

**Vertical off-module brackets** can be used above and adjacent to slatwall on Answer and Montage panels.

**Vertical off-module brackets** can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.



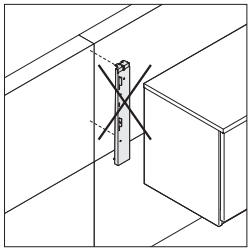
**Horizontal off-module brackets,** optional, accommodate off-module installations of overhead storage bins on panels with horizontal slot patterns. Enhanced off-module Montage frames can support horizontal off-module brackets. Horizontal off-module brackets can be used with 24"W to 48"W Montage bins only.

**Horizontal off-module brackets** can be used above and adjacent to slatwall on Montage panels.

**Horizontal off-module brackets** can be used with a panel stacker on Montage panels. Follow standard panel stacker guidelines for each panel.

**Enhanced off-module Montage frames** have horizontal slot patterns and must be specified for horizontal off-module Montage configurations.

**Horizontal off-module brackets** push bin out from panel 5/8" on enhanced off-module Montage panels.



**Horizontal off-module brackets** cannot span a vertical or joint where two frames come together on enhanced off-module Montage panels. Shift the bin to avoid the joint.

**Only two pairs of off-module brackets** and associated storage can be mounted per frame.

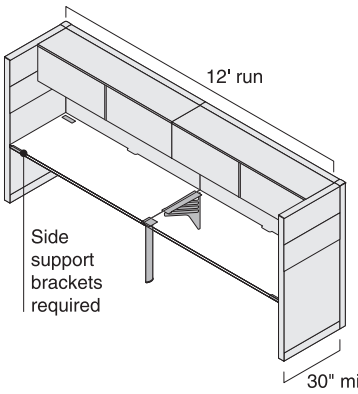
**Hutch kit** supports bin at 66" height.

# Application Rules for Overhead Storage on Answer and Kick Panels

For complete panel specific stability guidelines, see the corresponding panel specification guide.

## Answer Panel



**Guidelines for Universal Bins.** Applies to universal sliding door bin or universal in the case bin on Answer and Kick panels.

**The following application restrictions** must be complied with when hanging universal overhead bins on Answer and Kick panels. Otherwise, standard Answer and Kick application guidelines apply.

- Universal sliding door bin, universal in the case bins, and universal curved front bins cannot hang on an Answer or Kick panel above the 66"H connection point.
- The maximum panel run length when using a universal overhead bin on Answer or Kick panels is 12'.
- Top of bins and shelves are not designed to support the weight of a seated person. Bins and shelves may be mounted at 38"H or lower only if another panel-mounted component prevents it from being seated upon.
- When ganging binder bins, the use of a tie plate is required.

**⚠WARNING**

Failure to comply to these guidelines may result in personal injury.

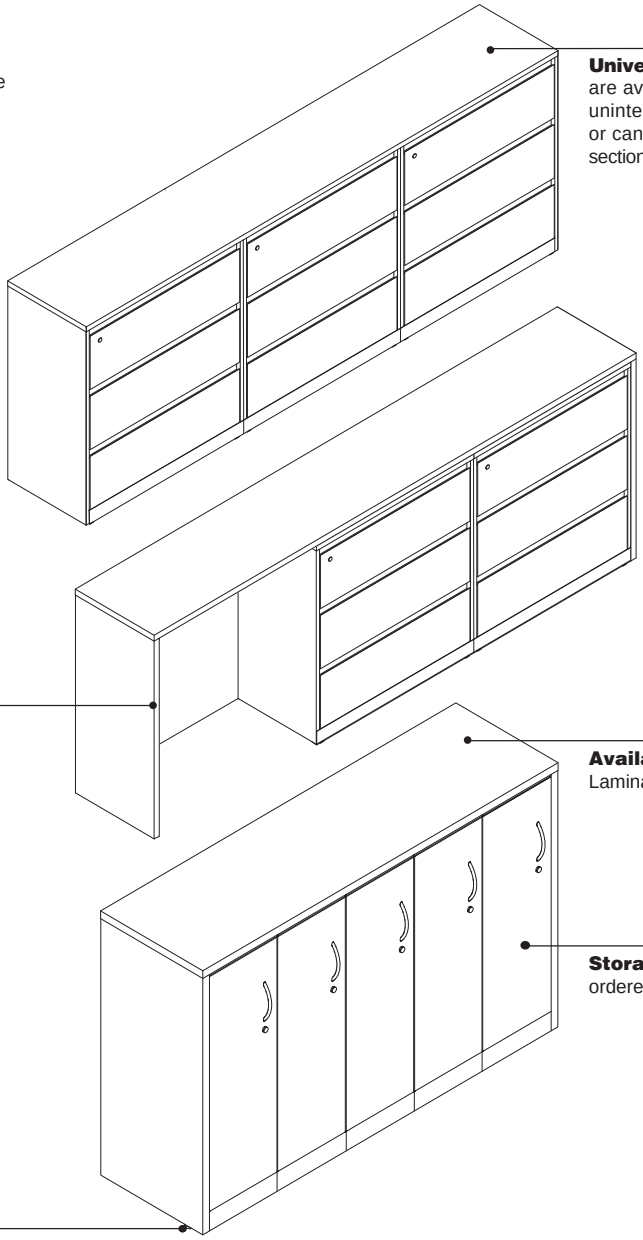
# Universal File Surrounds

For Use with Universal and TS Series Storage

**File surrounds** are used to encase storage units to provide a seamless, finished look in High-Pressure Laminate or veneer. Top, back, and end panels come together to wrap the storage units. They are available in a variety of configurations and parametric sizes that surround Universal and TS Series storage.

▶Specifying, page 284

▶See SmartTools for complete specification and pricing.



**Universal file surrounds** are available with an uninterrupted worksurface or can be specified with a sectioned worksurface top.

**Tops, end panels, and back panels** are 1 3/16" thick.

**Available** in High-Pressure Laminate or veneer.

**Storage units** must be ordered separately.

**Leveling glides** adjust up to 1 1/4" to install file surround on uneven floors.

## Actual Dimensions

| | Outside Dimensions | Inside Dimensions |
|---|---|---|
| Depth | 15 15/64" to 59 21/32" | 15" to 58 1/4" |
| Width | 16 35/64" to 359 31/32" | 15" to 358 9/16" |
| Height | 17 3/16" to 67 1/32" | 16" to 65 55/64" |
| Thickness | 1 3/16" | N.A. |

*Tip: Dimensions are available parametrically to every 1/16".*

## Product Details

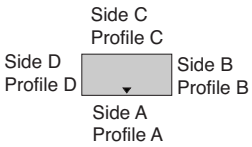
**SmartTools** must be used to order the file surround to ensure correct configuration, fit, and alignment.

**Multiple configurations** are available with the file surround and include surrounding a single row or back-to-back storage units with or without open spaces. Open spaces are allowed between storage units or on the ends of storage units (when back panel is specified).

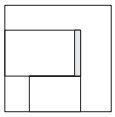
**Storage units** must be placed under the file surround. File surrounds are designed to work with Universal steel and TS Series storage units but must be ordered separately.

**Dimensions of the file surround** are based on the storage that is being surrounded. These dimensions are actual and automatically generated through SmartTools.

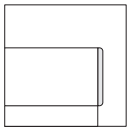
**The internal dimensions of the file surround cavity** are used to determine pricing. These internal dimensions will be displayed in the SmartTools specification.
*Tip: Use SmartTools to see the actual external dimensions of the file surround when planning.*



**File surrounds** allow for each edge profile on the top to be specified- profile A, profile B, profile C, and profile D. Wood veneer worksurfaces can have a 3 mm wood square edge or .5 mm veneer edge. Laminate worksurfaces can have a 3 mm or 1 mm plastic square edge.

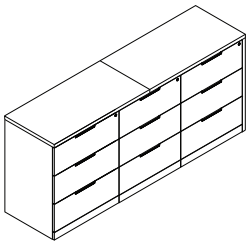


.5 mm or 1 mm square edge



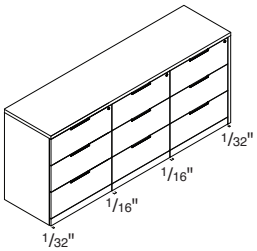
3 mm square edge

**File surround top edges** that are a 1 mm plastic or .5 mm wood veneer square edge will align with the face of the storage unit. A 3 mm plastic or wood veneer square edge band will overhang the face of the storage unit by 3 mm. To ensure a tight fit and connection with the wall or adjacent storage, a 1 mm plastic or .5 mm wood square edge is recommended for all sides or sides B, C, and D.



**Sectioned tops** are optional based on the width of the top. One- to four- sections are allowed between specific ranges that can be realized through SmartTools.
*Tip: A singular top is considered one-section.*

*Tip: When two-, three-, or four- sections are specified, the top will be split into sections equal in width.*

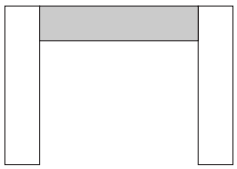


**1/16"** is added for space between each unit plus an additional 1/32" on each end. Example: Three 30"W units would have 90 3/16" interior width.

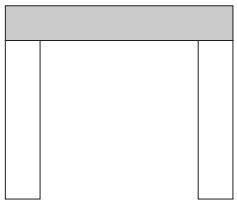
**End panels** are specifiable on the left side, right side, or both.

**One end panel** is only allowable when storage is placed on the end of the file surround that does not have the end panel and there is no back panel specified.

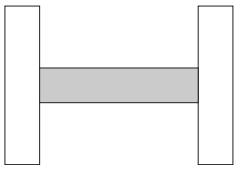
Inset at 0"

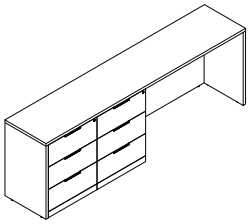


Proud



Inset Centered

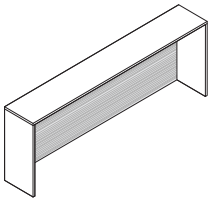




**Unsupported open spaces** are allowed in the middle or ends of the file surround. Open spaces in the middle of the file surround can be up to 54"W without a worksurface brace and up to 72"W with a worksurface brace. Open spaces on the ends of the file surround must be supported with a back panel.

**Grain direction on end panels** is available in horizontal or vertical grain.
*Tip: Laminate grain direction must be vertical if the height greater than 60".*

**Woodgrain laminate sectioned tops** will not be grain matched over 120"W. Please refer to specials if grain matching is desired on sectioned tops greater than 120"W.



**Grain direction on back panels** will always have horizontal grain direction.

**The recommended grain direction on the file surround** is long grain direction on the top and vertical grain direction on the end panels. This creates the waterfall look.

## Connections

**Worksurface braces** are required for unsupported open spaces greater than 54"W up to 72"W.
▶Worksurface brace, *Answer Solution Specification Guide.*

**Assembly hardware** is included with the file surround. To attach to storage, the attachment hardware is included with the storage units.

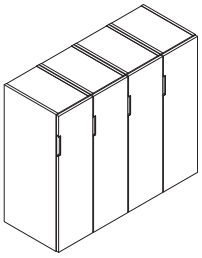
# Stability Guidelines

## Single Run of Lockers

Individual single- or double-wide lockers cannot stand alone. If not secured to the building structure, the minimum locker numbers that need to be ganged depend on depth, height, and width, and are shown in the table below.

If locker widths vary in the application, rules for the narrowest width applies. A double wide locker counts as two lockers.

| Locker Depth (inches) | Locker Height (inches) | Locker Width (inches) | Minimum Locker Number |
|---|---|---|---|
| 18≤ D ≤24 | ≤70 | any | 3 |
| | >70 | ≥15 | 4 |
| | | <15 | 6 |
| 16≤ D <18 | ≤57 | any | 3 |
| | >57 | ≥15 | 6 |
| | | 12≤ W <15 | 7 |
| | | 9≤ W <12 | 8 |
| 12≤ D <16 | any | 18≤ W ≤24 | 13 |
| | | 15≤ W <18 | 15 |
| | | 12≤ W <15 | 17 |
| | | 9≤ W <12 | 19 |

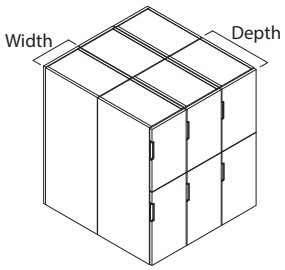


## Back-to-Back Lockers

Individual lockers cannot stand alone. If not secured to the building structure, the minimum locker numbers that need to be ganged depend on width and are shown in the table below.

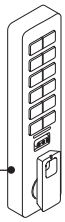
If locker depths are different on both sides, then the rules for the shallower depth applies. A double-wide locker counts as two lockers. These guidelines apply to all locker heights (38.0625"–84").

| Depth | Locker Width | Minimum Locker Number side-to-side |
|---|---|---|
| Any | ≥ 12" | 2 |
| | <12" | 3 |



# Electronic Lock Options

**Keypad** has visual and audible indicators.

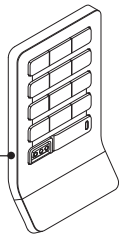


Digilock Versa Keypad

Digilock Versa RFID

**Digilock RFID locks** utilize 13.56 MHz frequency communication.

**Keypad locks** operate by entry of 4–7 digit code.

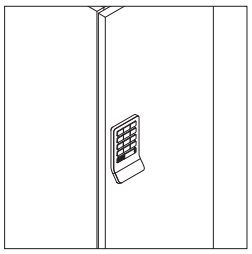


Digilock Aspire Keypad

Digilock Aspire RFID

**ADA compliant pull handle.**

## Product Details

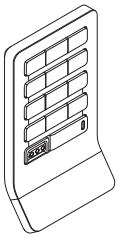


**Locks** are surface mounted on the door.

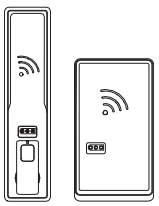
**Locks** come set to a shared use mode. The user locks with their credential and unlocks with the same credential. Once unlocked, the lock is reset for another user.

**Digilock Aspire and Versa locks** are powered by four AA premium batteries.

**Digilock Versa keypad locks** are powered by two lithium 2450 batteries.



**Digilock Aspire keypad locks** have an ADA compliant pull handle.



**Compatibility of radio frequency identification (RFID) credentials with Digilock locking solutions** utilize an RFID interface.

**RFID/NFC Standards Digilock RFID locks** utilize 13.56 MHz frequency communication and meet the following RFID/NFC Standards:

- ISO 14443A
- ISO 14443 B
- ISO 15693

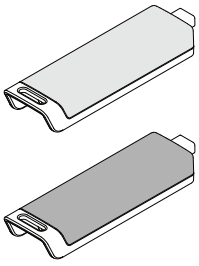
**Credentials** that are compatible with the above standards include:

- HID iClass
- NXP Mifare (Classic 1K-4K, Ultralight, DESFire EV1/EV2, Plus S)
- FeliCa
- Legic Advant

**Some credential types** may require an encryption key from the end user/ manufacturer for read permissions. Digilock will work with the key holder(s) designated by the end user to ensure compatibility.

**Dual Technology Credentials**
Some RFID credentials may support multiple formats within the 13.56 MHz frequency. These credentials might experience a delay or issue operating Digilock RFID locks. To confirm compatibility, contact your Digilock representative.

**Low Frequency**
Digilock RFID locks do not utilize low proximity frequency communication and are not compatible with LF or Prox cards or credentials that run between 125 – 134 kHz due to the lack of security possible with such systems. Dual credential cards that contain RFID tags for both low frequency and high frequency transponders may work with Digilock locks. To confirm compatibility, contact your Digilock representative.



**The programming key and manager key,** ordered separately, are required if the electronic lock option is selected.
▶ Specifying, page 312

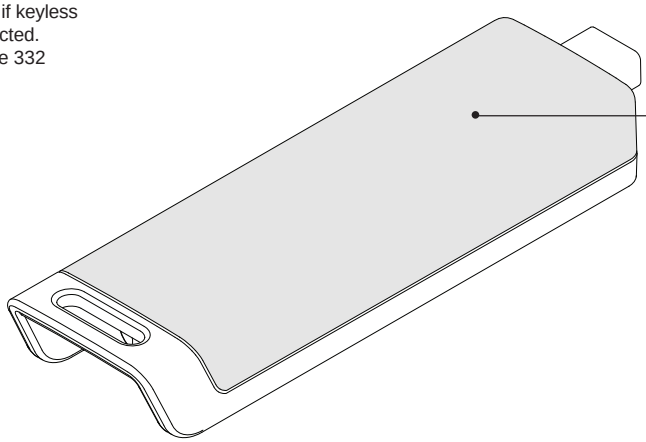
## Surface Materials

**Lock body**

- 9211 Nickel

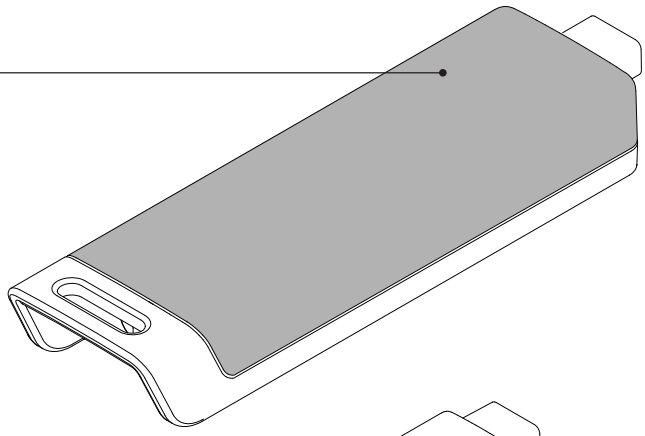
# WorkValet Digilock Keys

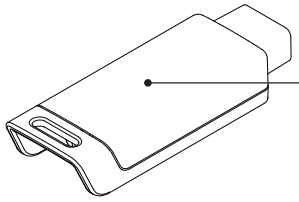
**Digilock Versa and Aspire locks** enable facility managers to modify lock programming with an unique programming key and override locks using manager keys. Programming and manager keys are required if keyless lock option is selected.
▶ Specifying, page 332



**The programming key** is used during installation to pair the manager key to the lock.

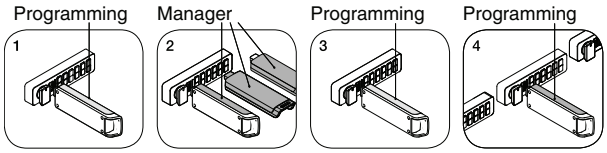
**The manager key** is used to override the lock when a credential is lost or forgotten or the battery loses power. Additional manager keys can be paired at any time. One manager keys may be paired to infinite locks; however, each lock may only pair with up to six manager keys.





**The user key** is ADA compliant and is available for users that require additional assistance in operating the keypad on the lock.

## How to Program



1. Insert the programming key. A two-toned beep will be heard and the LED light will start to flash.
2. While the LED light is flashing, insert one manager key at a time. A beep will be heard for each manager key that is programmed.
3. Insert the programming key. A two-toned beep will be heard and the LED light will stop flashing.
4. Repeat previous steps for each lock.

*Tip: The locks will arrive in the factory setting. During the process of pairing the manager key(s), the locks will be programmed into the shared setting.*

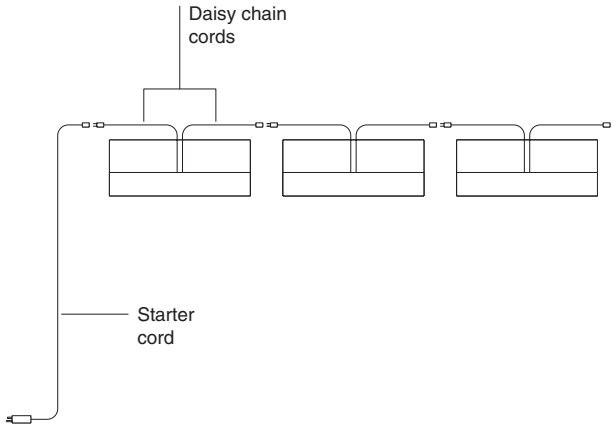
# Daisy Chaining

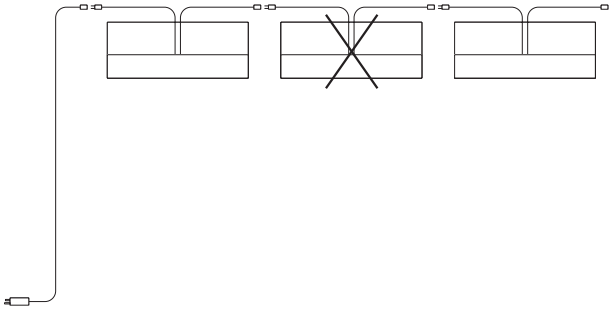
For Standard and Bottomline Lights

**Daisy chaining shelf lights** together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

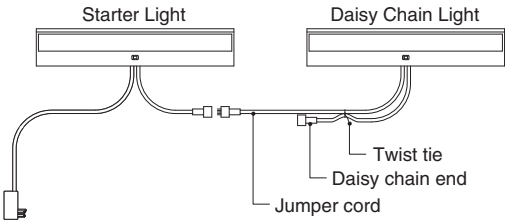
**For Standard shelf lights,** starter cord is required with daisy chain cords to bring power to the first shelf light in a daisy chain so there's no need to designate where each fixture will be used within the chain.



**Power will not be interrupted** in a chain even if one of the shelf lights is turned off or its lamp has burned out. That's because the path of power through the chain doesn't pass through the lamps or switches.



**For Bottomline lights,** starter light is required with daisy chain lights to bring power to the first light in the daisy chain.



*Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.*

*Tip: Overhead cabinets and shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.*

*Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.*

# Vertical Wire Manager

**Vertical wire manager** conceals cords and cables that are routed vertically outside of the panels.

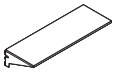
# TS Series Laminate Common Shelves



*Tip: For anticipated heavy loads on 42" and 48"W laminate common shelves, a field-installed reinforcing channel (TSATRC39) can be used.*

*Tip: Standard shelves are 1⅛" thick. However, the actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) shelves is slightly different. It is recommended that only shelves of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications. Please use caution when mixing and matching different shelves types.*

*Tip: Width includes dimension of laminate common shelf and support brackets. Laminate shelf is undersized by ½" to accommodate two support bracket mounting orientations.*

**For laminate price group 2 and 3 pricing,** *please refer to the electronic catalog or SmartTools.*

## Custom Surfaces

### Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of $102 U.S. per unit, plus the cost of the laminate.
High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.
When processing orders for Open Line laminate on Universal worksurfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

**Laminate Approval and Material Requirements**
To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:
- Visit *www.steelcase.com*

**For additional information,** refer to the *Steelcase Surface Materials Reference Manual*.

## Wood

Applies to:
- Universal Storage tops and fronts
- Universal file surrounds
- High-Density storage
- Overhead storage

*Tip: Wood is not offered as a finish on the value package for High-Density storage cases.*

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:
- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

### Steelcase Surfaces

**Veneers** are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

**Open-pore finish** is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

▶ See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

## Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on *village.steelcase.com* for sample information and product line availability. All premium veneers are in clear-coat.

## Select Surfaces

### Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available in our Select Surfaces program as Wood Group 1 pricing. Composite veneers are not available on Answer trims.

## Custom Surfaces

**Customiz stain** is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer. A $500 stain-matching fee applies on CUSTOMIZ requests (Exception: The $500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The $500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed. In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A $1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a $1,000 fee at any point within five years after the $1,500 initiation fee was paid. If the finish is not reactivated within five years after the $1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the $1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable. Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate. Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual.*

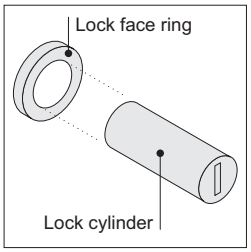
# Lock and Keying Options

## Universal Steel Storage, TS Series Storage, and High-Density Storage

**All locking products** are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

*Exceptions: Individual locking drawers are only available with field-installed locks.*



**Locks** consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

**Two types of locks** are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

### Factory-Installed Keying

**Factory-installed locks** are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

*Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.*

▶See example at right.

### Field-Installed Keying

**Field-installed locks** are only available on products that include factory-installed lock mechanisms.

**Specify "plug"** when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

*Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.*

**Front-removable lock cylinders** must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

*Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.*

**Lock cylinders** will be shipped separately so that you can install the locks when you are ready.

**Three keying choices** are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

**Key random** means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

*Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.*

**Key specific** means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

*Tip: Designate the quantity per key number in your specification.*

▶See below.

**Key consecutive** means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).
