

Features

- Designed to work with a DTV+ digital system either individually or with a second digital valve (two, three, or six-port valve)
- For use in showering and/or bathing applications
- Up to 13 gpm (49.2 lpm) flow rate at 45 psi (3.1 bar) with maximum flow of 8 gpm (30.3 lpm) from one outlet
- 1/2" hot/cold supply inlets

Installation

- Two independently controllable 1/2" outlets
- Prewired with three-prong plug for connection to 110 V AC receptacle
- Mounts within standard 2" x 4" (38 x 102 mm) walls

Required Products/Accessories

[K-99695](#) System Controller Module

KOHLER® Electronic Faucets, Valves, and Controls Five-Year Limited Warranty

See website for detailed warranty information.

Required Electrical Service

One dedicated circuit required, protected with Class A Ground-Fault Circuit-Interrupter (GFCI). Outside North America, this device may be known as a Residual Current Device (RCD).

Thermostatic valve: 120 V, 15 A, 60 Hz

Technical Information

All product dimensions are nominal.

Power source: Plug - AC, included

Shower Valve:

Flow Rate (Max) @ 45 psi	13 gal/min (49.2 l/min)
Manufacturer's minimum rated flow:	1.5 gal/min (5.7 l/min)
Pressure:	45 psi (3.1 bar)
Maximum (Static) Pressure:	125 psi (8.6 bar)
Minimum (Operating) Pressure:	20 psi (1.4 bar)

Electrical component rating: Thermostatic valve: 120 V, 0.16 A, 60 Hz

Max. Ambient temp: 104°F (40°C)

Max. Relative humidity non-

Notes

Install this product according to the installation guide.

For use with showerheads or handsprays rated at 1.5 gal/min (5.7 l/min) or higher.

If used for bath-shower system, the bath spout must be connected to the #1 outlet port and restricted to 10 gal/min (37.9 l/min) maximum.

Provide access for servicing valve.

Use 1/2" supply lines.

Do not install this valve in walls exposed to subfreezing temperatures.

Avoid mounting the valve in a wall adjacent to a frequently occupied room, such as a bedroom or living room.

Pressure regulators are strongly recommended in applications where large pressure swings are anticipated or pressure differences between the supplies exist, such as commercial installations with separate hot and cold supply systems.

Water hammer arrestors and shut-offs are
