

## Tributaire Lectern

An articulating top adapts the Tributaire lectern from flat to angled for any presenter's preference. Available in fixed or height-adjustable styles with modesty panel and optional storage.

# Presenting Elegantly

---

Tributaire lecterns beautifully integrate flexibility for user preferences in any presentation setting – classrooms, lecture halls, training rooms and more. The articulating top supports laptop use in flat mode and active presenting in the angled position.

## Features

- Patent-pending articulating top adapts from a flat position (as for use with laptop) to an angled position (as for active presentation) with a simple toolless hinge movement
- Fixed height (42”) or pneumatic height-adjustable (34-48”) or screw height-adjustable (34-47”)
- Comes with modesty panel in PET felt or laminate
- Specify with or without storage cabinet, which features an adjustable shelf, steel accent between doors, ganging slot to join with table, and options for power and locks
- 3 caster colors: black, warm grey, cottonwood with warm grey tread
- 3 glide colors: black, warm grey, cottonwood
- Accessory options include cup holder or bag hook

## Construction

- Lectern worktop is fastened to a steel platform and then hinged to allow for two-position top from flat to 12 degree tilt.
- The tilted position locks into place with a steel stay which can swing out of the way to unlock the worktop to flat when needed.
- Lectern worktop is  $\frac{3}{4}$ ” thick construction with high pressure laminate top and 2mm (73P) edge.
- Base for lectern constructed of cast aluminum X base fastened to extruded aluminum upright.
- Casters include two locking and two non-locking per lectern. Twin-wheeled and constructed of nylon with a soft durometer wheel for ease of mobility on carpet or hard floors.
- Adjustable glides are constructed of die cast aluminum that is finished to match the table base finish. These glides offer approximately 1.2” of adjustment range. The glide has a two-piece molded nylon lower. The nylon pad is field replaceable.
- Modesty panels are standard on all models and are available in PET felt or laminate construction.
- Optional two-door storage cabinet is laminate with 2 mm (73P) edge
- Storage cabinet features perforated steel accent which can be powdercoated in contrasting or complementing colors
- Storage can be specified with MiniTap power module which supplies 2 receptacles
- All storage units include surface grommet for cord management (regardless of power specification)
- Optional storage locks are Satin Chrome

## Product Highlights

---

### Adjustable Height Range

Tributaire lecterns are available in fixed and adjustable heights. Pneumatic height adjustment allows swift transitions between seated and standing positions, while screw-set height adjustment accommodates varying lectern heights based on facility requirements. A fixed 42" height lectern offers consistency for standard teaching or training needs.

### Storage Cabinet Option

An optional locking cabinet integrates the function of storage and power with Tributaire lecterns. Inside the cabinet, an adjustable shelf supports various storage needs. Outside the cabinet, a surface grommet passes cords to the top surface, when power is specified, or provides wire management when power is not specified. A perforated steel accent between the two cabinet doors offers an additional opportunity for design enhancement with powdercoat colors. Most notably, a ganging slot on the cabinet allows the lectern to gang with Tributaire tables for a combination desk-lectern unit.

### Modesty Panel Finishes

All models come with a modesty panel available in a variety of PET felt and laminate colors. Sizes vary by model.
