

Tributaire Training Tables

Versatile Tributaire training tables offer an unparalleled selection of styles to meet any need. Choose from fixed and height-adjustable bases, fixed or nesting tops, and three shapes. Add options such as power modules and modesty panels in PET felt or laminate.

Sharing Knowledge

Tributaire training tables feature flowing lines that spark the flow of ideas and dialogue in professional or educational environments. Functional and visually stunning, Tributaire defines training and learning spaces that encourage collaboration and knowledge sharing.

Features

- Three heights: 29, 36, 42"
- Fixed or adjustable base (screw or pneumatic): 29-42"
- Fixed or nesting top (patented inline design)
- Three top shapes: rectangle, round*, half-round* **nesting only*
- Two edge options: 74P or Knife* **knife edge only on user-side for ganging and accessories (rectangles only)*
- Optional power (3-prong or single circuit) with wire management
- Optional modesty panel in PET felt or laminate
- Optional polished aluminum foot/top block complements powdercoated column (top block is nesting only)
- Three caster colors: black, warm grey, cottonwood with warm grey tread
- Three glide colors: black, warm grey, cottonwood
- Select models integrate with Bobbr Undermount Storage, Monitor Arms, Keyboard Trays, and Universal Screens

Construction

- Standard worksurface tops are 1-1/4" thick with a high-pressure laminate surface. Laminate surface is finished with a 2mm edge in either a flat or knife edge profile.
- Base is constructed of an extruded aluminum upright mechanically fastened to a cast aluminum foot designed for inline nesting.
- Casters include two locking and two non-locking per table. Twin-wheeled and constructed of nylon with a soft durometer wheel for ease of mobility on carpet or hard floors.
- Adjustable glides are constructed of die cast aluminum that is finished to match the table base finish. These glides offer approximately 1.2" of adjustment range. The glide has a two-piece molded nylon lower. The nylon pad is field replaceable.
- Tables can be ganged at the worksurface using a plastic ganger without tools after the pegs are installed.
- Optional PET felt modesty panels. PET felt modesty panels constructed of sound absorbing 100% polyester felt. PET felt modesty panels swing away to a storage position when nesting tables are nested.
- Optional laminate modesty panels. Panels are 3/4" thick with 2mm (73P) edge and are backed in matching laminate. Laminate modesty panels on fixed top tables are secured into place with a stationary bracket. Laminate modesty panels on nesting tables swing away for nesting.
- Wide variety of electrical modules and grommets are standard. Grommets provide cord management from the worksurface. Electrical modules support a variety of needs with USB-A and C charging ports and simplex receptacles. Modules are available with either a 3-prong cord, or with Pattern single-circuit system.

Product Highlights

Sophisticated Finish Options

Unlike any other KI table, Tributaire allows you to specify contrasting finishes on the foot and leg upright when polished aluminum is selected. High-end laminate options and a choice of casters in black, warm grey, or cottonwood with a warm grey tread further support your unique design vision.
